WARNING

ASBESTOS HAZARD

DO NOT handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned. There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death.

WARNING

COMPRESSED AIR

Compressed air used for cleaning or drying purposes, or for clearing restrictions, should never exceed 30 psi (207 kPa). Wear protective clothing (goggles/shield, gloves, etc.) and use caution to avoid injury.

WARNING

COUPLING AND UNCOUPLING TRAILER

All personnel must stand clear of towing vehicle and trailer during coupling and uncoupling operations. Failure to follow this warning may result in serious injury or death.

WARNING

DRY CLEANING SOLVENT

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100° F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

WARNING

ELECTRICAL SYSTEM

- When troubleshooting an electrical malfunction or performing electrical maintenance, ALWAYS disconnect intervehicular electrical cable from towing vehicle. Failure to do so may result in injury or death due to electric shock.
- Battery acid (electrolyte) is extremely dangerous. Use care when removing battery shop door caps. Serious injury to personnel may result if battery acid contacts skin or eyes.
- Auxiliary power cable must be disconnected from outside housing before performing any work on 110-volt electrical system. Failure to follow this warning may result in injury or death.

INTRODUCTION**

Section I. GENERAL INFORMATION

Paragraph Title	Page Number
Destruction of Army Materiel to Prevent Enemy Use	1-1
Maintenance Forms, Records, and Reports	1-1
Preparation for Storage or Shipment	1-1
Reporting Equipment Improvement Recommendations (EIRs)	1-1
Scope	1-1

1-1. SCOPE.

a. This manual describes the operation and unit, direct support, and general support maintenance, including repair parts and special tools lists for:

- Trailer, Cargo: 1 1/2-Ton, 2-Wheel, M105A1 with trailer chassis M103A1.
- Trailer, Cargo: 1 1/2-Ton, 2-Wheel, M105A2 with trailer chassis M103A3.
- Trailer, Cargo: 1 1/2-Ton, 2-Wheel, M105A2C (with vacuum/hydraulic brake system).
- Trailer, Tank, Water: 1 1/2-Ton, 2-Wheel, 400-Gallon, M107A1 (with single line air/hydraulic brake system).
- Trailer, Tank, Water: 1 1/2-Ton, 2-Wheel, 400-Gallon, M107A2 and M107A2C (with dual line air/hydraulic brake system).
- Trailer, Van, Shop: Folding sides, 1 1/2-Ton, 2-Wheel, M448 with trailer chassis M103A3.

b. Throughout the manual, the terms “right” and “left” are used to describe views of the trailers, as viewed from the rear.

1-2. MAINTENANCE FORMS, RECORDS, AND REPORTS.

Department of the Army forms and procedures used for equipment maintenance will be those prescribed by DA Pam 738-750, The Army Maintenance Management System (TAMMS).

1-3. DESTRUCTION OF ARMY MATERIEL TO PREVENT ENEMY USE.

For destruction of Army materiel to prevent enemy use, refer to TM 750-244-6.

1-4. PREPARATION FOR STORAGE OR SHIPMENT.

For information on preparing the trailers for storage or shipment, refer to Chapter 4, Section XV.

1-5. REPORTING EQUIPMENT IMPROVEMENT RECOMMENDATIONS (EIRs).

if your trailer needs improvement, let us know, Send us an EIR. You, the user, are the only one who can tell us what you don't like about your equipment. Let us know why you don't like the design. Put it on an SF 368 (Quality Deficiency Report). Mail it to us at: Commander, U. S. Tank-Automotive Command, ATTN: AMSTA-MP, Warren, MI 48937-5000. We will send you a reply.

Section II. EQUIPMENT DESCRIPTION AND DATA

Paragraph Title	Page Number
Differences Between Models	1-9
Equipment Characteristics, Capabilities, and Features	1-2
Equipment Data.	1-9
Location and Contents of Plates	1-8
Location and Description of Major Components	1-3

1-6. EQUIPMENT CHARACTERISTICS, CAPABILITIES, AND FEATURES.

a. The M103A1 and M103A3 chassis are used with the following:

- (1) Cargo Trailer Series M105A1, M105A2, and M105A2C. Carry a maximum payload of 3000 lb (1362 kg) either cross-country or highway.
- (2) Water Tank Series M107A1, M107A2, and M107A2C. Transport water with a maximum payload of 3335 lb (1514 kg) either cross-country or highway.
- (3) Folding Side Shop Van Trailer M448. Equipped with a 110-volt electrical system and is used as a mobile battery or paint shop. The M448 has a maximum payload of 3000 lb (1362 kg) either cross-country or highway.

b. The trailers are designed to be towed by the M35 2 1/2-Ton Cargo Truck. Maximum allowable speed is 50 mi/h (80 km/h) highway and 30 mi/h (48 km/h) cross-country.

c. The trailers are equipped with:

- (1) A 24-volt electrical system capable of operating under standard and blackout modes,
- (2) An adjustable caster assembly to support front of trailer when uncoupled from the towing vehicle.
- (3) An automatic emergency braking in the event of trailer breakaway from the towing vehicle.
- (4) Manually operated parking brakes used to secure the trailer when stopped or parked.
- (5) Two-wheel single axle with leaf spring suspension to absorb road shock.

NOTE

All models of the M103 Series Chassis built after 1977 have two air lines.

- (6) Single-line air/hydraulic (M103A1 and M107A1), dual-line air/hydraulic (M103A3, M107A2, and M107A2C), or vacuum/hydraulic brake system (M105A2C) which receives air or vacuum pressure from the towing vehicle.

1-7. LOCATION AND DESCRIPTION OF MAJOR COMPONENTS

a. M103 Series Chassis Trailer.

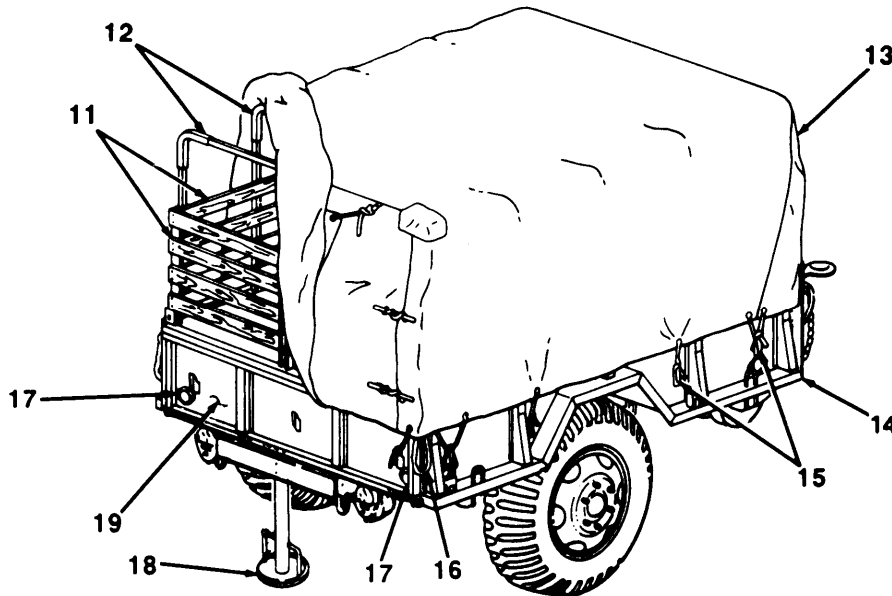

Key	Component	Description
1	Intervehicular Cable	Connects trailer electrical system to the towing vehicle.
2	Handbrake Levers (All Except M107A1)	Used to activate the handbrakes when the trailer is stopped or parked.
3	Handbrake Levers (M107A1)	Used to activate the handbrakes when the trailer is stopped or parked.
4	Light Assemblies	Consist of blackout, tall, and composite lights, indicate presence of trailer to vehicles traveling behind.
5	Leaf Spring	Component of suspension system which serves to cushion road shock.
6	Frame Assembly	Composed of two pressed-steel siderails reinforced by six pressed-steel crossmembers. Serves to support the trailer load.
7	Intervehicular Air Hose(s)	Connect(s) trailer service brake system to the towing vehicle.
8	Adjustable Caster Assembly	Supports front of trailer when not coupled to the towing vehicle.
9	Safety Chains	Hook to eyebolts on towing vehicle to prevent the trailer from fully breaking away.
10	Drawbar Ring	Used to couple trailer to towing vehicle pintle.

TA505223

1-7. LOCATION AND DESCRIPTION OF MAJOR COMPONENTS (Con't).

b. M105 Series Cargo Trailer.

Key	Component	Description
11	Stake Racks	Verticality extend the cargo body to provide a larger cargo area.
12	Roof Bows	Provide support for paulin.
13	Paulin	Used to protect cargo from inclement weather.
14	Cargo Body	One-piece welded construction used to carry a maximum payload of 3000 lb (1362 kg). Left- and right-side body walls have stake pocket holes for mounting of stake racks.
15	Lashing Hooks	Attach paulin to the cargo body.
16	Tailgate Chains	Support the tailgate when open and lock the tailgate closed.
17	Reflectors	indicate trailer presence to vehicles traveling behind.
18	Rear Support Leg	Stabilizes rear of cargo body.
19	Tailgate	Provides access to trailer cargo.

TA505224

1-7. LOCATION AND DESCRIPTION OF MAJOR COMPONENTS (Con't).

c. M107 Series Water Tank Trailer.

Key	Component	Description
20	Tank	Holds 400 gal. (1514 l) of water for transport.
21	Vent	Allows air circulation in tank.
22	Manhole	Provides access to the tank interior for filling, cleaning, and inspection.
23	Fender	Protects tires, tank, and vehicles traveling behind from thrown dirt or stones.
24	Fender Extension	Used as a step for access to manhole and vent.
25	Manifold Valve	Directs flow of water to the faucets.
26	Discharge Valve	Allows distribution of water from the tank through the piping.
27	Faucets	Allow for dispensing water contained in the tank.
28	Piping	Provides passageway for water from the tank to the faucets.

TA505225

1-7. LOCATION AND DESCRIPTION OF MAJOR COMPONENTS (Con't).

d. M448 Shop Van Trailer.

Key	Component	Description
29	Ladder	Provides access to the shop van body.
30	Side Door Latch Handle	Locks the side door closed.
31	Canvas Cover	Protects the battery generating unit when not in use.
32	Side Door	Swings down for use as a work area.
33	Leveling Jacks	Stabilize rear of the trailer.
34	Rear Door Hold-open Clip and Retainer	Holds rear door in open position.
35	Rear Door	Opens to provide access to inside of the shop van.
36	Locking Handle	Operates the door latch mechanism to open and close right rear door.

TA505226

1-7. LOCATION AND DESCRIPTION OF MAJOR COMPONENTS (Con't).

Key	Component	Description
37	Junction Box	Contains four receptacles which provide 110-volt power supply to the operator.
38	Circuit Breaker	Protects the electrical system and equipment from damage in case of a power overload.
39	110-volt Auxiliary Power Cable	Connects auxiliary power source to 110-volt electrical system.
40	110-volt Receptacle	Connects 110-volt auxiliary power cable to the trailer electrical system.
41	Ground Rod	Grounds the trailer when 110-volt electrical system is in use. Protects personnel from serious electric shock.

TA606227

1-8. LOCATION AND CONTENTS OF PLATES.

- a. The following illustration shows the location and contents of all chassis trailer plates.
- b. Maintain all plates so that all information remains legible. If any plate is missing or no longer legible, notify unit maintenance.

CHAPTER 2 OPERATING INSTRUCTIONS

Section I. DESCRIPTION AND USE OF OPERATOR'S CONTROLS AND INDICATORS

Paragraph Title	Page Number
Controls and Indicators	2-1
General	2-1

2-1. GENERAL.

This section shows the location and function of all trailer controls and indicators. Review this section thoroughly before operating the trailer.

2-2. CONTROLS AND INDICATORS.

a. M103 Series Chassis Trailer.

Key	Control or Indicator	Description
1	Release Handle	Secures the adjustable caster assembly in up or down position.
2	Handcrank	Operates the gearbox to raise or lower the adjustable caster assembly.
3	Ground Pad Handle	Used to raise or lower the adjustable caster assembly.
4	Handbrake Levers (all except M107A1)	Used to activate handbrakes when the trailer is stopped or parked.
5	Handbrake Levers (M107A1)	Used to activate handbrakes when the trailer is stopped or parked.

TA505229

2-2. CONTROLS AND INDICATORS (Con't).

b. M107 Series Water Tank Trailer.

Key	Control or Indicator	Description
6	Faucets	Used to draw water from the tank.
7	Manhole Cover Latch	Secures the manhole cover closed.
8	Manhole Cover	Provides access to the tank body for filling, cleaning, and inspection.
9	Discharge Valve	Opens the tank for water distribution through the piping.
10	Manifold Valve	Directs water to the faucets.

TA505230

2-2. CONTROLS AND INDICATORS (Con't).

c. M448 Shop Van Trailer.

Key	Control or Indicator	Description
11	Handle Assembly	Used to raise or lower the leveling jack.
12	Circuit Breaker Switch	Allows electrical power to reach the receptacles.

Section II. OPERATOR/CREW PREVENTIVE MAINTENANCE CHECKS AND SERVICES (PMCS)

Paragraph Title	Page Number
General	2-4
General PMCS Procedures	2-4
Leakage Definitions	2-5
Operator/Crew Preventive Maintenance Checks and Services (PMCS), Table 2-1	2-6
Reporting Repairs	2-4
Service Intervals	2-4
Specific PMCS Procedures	2-5

2-3. GENERAL.

a. To ensure that the M105 and M107 Series Trailers and M448 Shop Van are ready for operation at all times, they must be reinspected on a regular basis so that defects may be found before they result in serious damage, equipment failure, or injury to personnel. This section contains systematic instructions on inspections, adjustments, and corrections to be performed by the operator/crew.

b. While performing PMCS, read and follow all safety instructions found in the Warning Summary at the front of this manual. Keep in mind all WARNINGS and CAUTIONS.

2-4. SERVICE INTERVALS.

Perform PMCS, found in Table 2-1, at the following intervals:

- (1) Perform Before (B) PMCS just before operating the trailer.
- (2) Perform During (D) PMCS while operating the trailer,
- (3) Perform After (A) PMCS right after operating the trailer,

2-5. REPORTING REPAIRS.

All defects which the operator cannot fix must be reported on a DA Form 2404, Equipment Inspection and Maintenance Worksheet, immediately after completing PMCS. If a serious problem is found, IMMEDIATELY report it to your supervisor.

2-6. GENERAL PMCS PROCEDURES.

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

a. Keep equipment clean. Dirt, oil, and debris may cover up a serious problem. Clean as you work and as needed. Use dry cleaning solvent (Item 6, Appendix E) on all metal surfaces, Use soap (Item 5, Appendix E) and water on rubber, plastic, and painted surfaces.

2-6. GENERAL PMCS PROCEDURES (Con't).

b. While performing specific PMCS procedures, inspect the following components:

(1) Bolts, Nuts, and Screws. Ensure that they are not loose, missing, bent, or broken. Report loose or missing bolts, nuts, and screws to unit maintenance.

(2) Welds. Inspect for gaps where parts are welded together. Check for loose or chipped paint, rust, and cracks. Report bad welds to unit maintenance.

(3) Electric Conduit, Wires, or Connectors. Inspect for cracked or broken conduit insulation, bare wires, and loose or broken connectors. Report loose connections and faulty wiring to unit maintenance.

(4) Hoses, Lines, and Fittings. Inspect for wear, damage, and leaks. Ensure that clamps and fittings are tight. Report any damage, leaks, or loose fittings and clamps to unit maintenance.

c. Check that components are adequately lubricated in accordance with Chapter 3, Section I.

2-7. SPECIFIC PMCS PROCEDURES.

a. Operator/crew PMCS are provided in Table 2-1. Always perform PMCS in the order listed. Once it becomes a habit, anything that is not right can be spotted in a minute.

b. Before performing PMCS, read all the checks required for the applicable interval and prepare all the tools needed. Have several clean rags (Item 11, Appendix E) handy. Perform ALL inspections at the applicable interval.

c. If anything wrong is discovered through PMCS, perform the appropriate troubleshooting task in Chapter 3, Section II. If any component or system is not serviceable, or if a given service does not correct the problem, notify your supervisor.

d. The columns in Table 2-1 are defined as follows:

(1) Item No. Provides a logical sequence for PMCS to be performed and is used as a source of item numbers for the "TM ITEM NO" column when recording PMCS results on DA Form 2404.

(2) Interval. Specifies the interval at which PMCS is to be performed.

(3) Item To Be Inspected. Lists the system and common name of items that are to be inspected. Included in this column are specific servicing, inspection, replacement, or adjustment procedures to be followed.

NOTE

The terms "ready/available" and "mission-capable" refer to the same status: Equipment is on hand and is able to perform its combat missions (AR 700-138).

(4) Equipment is Not Ready/Available If: Explains when the trailer is nonmission-capable.

2-8. LEAKAGE DEFINITIONS.

a. It is important to know how fluid leakage affects the status of the trailer. Following are types/classes of leakage an operator must know to determine whether the trailer is mission-capable. Learn these leakage definitions. When in doubt, notify your supervisor.

2-8. LEAKAGE DEFINITIONS (Con't).

Leakage Definitions for Crew/Operator PMCS

- Class I Seepage of fluid (as indicated by wetness or discoloration) not great enough to form drops.
- Class II Leakage of fluid great enough to form drops, but not great enough to cause drops to drip from item being inspected.
- Class III Leakage of fluid great enough to form drops that fall from item being inspected.

CAUTION

When operating with Class I or II leaks, continue to check fluid levels in addition to that required in PMCS, Parts without fluid will stop working or may be damaged.

b. Equipment operation is allowed with minor (Class I or II) Leakage. Fluid levels in an item/system affected with such leakage must be checked more frequently than required in PMCS. When in doubt, notify your supervisor.

c. Report Class III leaks IMMEDIATELY to your supervisor.

Table 2-1. Operator/Crew Preventive Maintenance Checks and Services (PMCS).

	•	•		f. Check circuit breakers (28), panel, and box (26) for proper mounting, operation, and general condition.	

TA505239

Section III. OPERATION UNDER USUAL CONDITIONS

Paragraph Title	Page Number
Coupling Trailer to Towing Vehicle	2-15
General	2-15
Loading Cargo Trailer (M105 Series)	2-18
Operating 110-volt Electrical Power Source (M448)	2-19
Towing Instructions	2-17
Uncoupling Trailer from Towing Vehicle	2-17
Water TANK Trailer (M107 Series)	2-18

2-9. GENERAL.

a. This section contains instructions for safely operating the trailers under usual conditions. Unusual operating conditions are defined and described in Section IV of this chapter.

b. Perform all Before (B) PMCS in Table 2-1 before operating the trailer.

c. Review all towing vehicle operating instructions to prepare for coupling and **uncoupling** operations.

2-10. COUPLING TRAILER TO TOWING VEHICLE.

WARNING

All personnel must stand clear of towing vehicle and trailer during coupling operation. Failure to follow this warning may result in serious injury or death to personnel.

2-10. COUPLING TRAILER TO TOWING VEHICLE (Con't).

CAUTION

Have assistant direct you during backing operations. Damage to equipment may result if caution is not followed.

- a. Aline towing vehicle with trailer and slowly back towing vehicle until pintle (6) is adjacent to drawbar ring (7).
- b. Remove pintle lockpin (5) and open pintle (6).
- c. Release trailer handbrake(s) and, with assistance, move trailer as required to engage drawbar ring (7) in pintle (6).
- d. Close pintle (6) and install pintle lockpin (5).
- e. Cross safety chains (11) under drawbar ring (7) and attach to towing vehicle eyebolts (10).
- f. Connect intervehicular cable (1) to towing vehicle receptacle (4).
- g. Connect service air hose (2) to towing vehicle gladhand (3). If coupling an M105A2C, also connect emergency air hose (9) to towing vehicle gladhand (8).
- h. Turn on towing vehicle air valves to apply vacuum or pressure as required.
- i. Pull out release handle (13) and at same time, begin raising adjustable caster assembly (12). Let go of release handle while raising adjustable caster assembly.

WARNING

If cargo trailer is equipped with an old-style, single-wheel adjustable caster assembly, use extreme caution to ensure that locking pin of handle has securely locked the adjustable caster assembly in the raised position. If locking pin is not fully locked, adjustable castor assembly may fall, resulting in serious injury.

- j. Raise adjustable caster assembly (12) until release handle (13) locks adjustable caster assembly in position. Ensure that release handle is fully engaged.

TA606240

2-11. TOWING INSTRUCTIONS.

WARNING

Before moving trailer, ensure that all loose equipment is properly stowed and that nothing will drag on ground. If trailer is loaded, ensure that load is properly secured. Failure to follow this warning may result in injury to personnel or damage to equipment.

- a. Perform all During (D) PMCS in Table 2-1 while operating the trailer.
- b. When towing the trailer, overall length of the unit must be kept in mind when passing other vehicles and when turning.
- c. Turning and backing operations will be affected because the towing vehicle and trailer are a hinged unit.
- d. Always tow the trailer at safe speeds and note any driving irregularities.
- e. When parking for extended periods, set the handbrakes on both towing vehicle and trailer.
- f. If the towing vehicle and trailer are parked on a hill, chock wheels.
- g. Refer to FM 21-305 for further information on proper driving practices.

2-12. UNCOUPLING TRAILER FROM TOWING VEHICLE.

WARNING

- **All personnel must stand clear of towing vehicle and trailer during uncoupling operation. Failure to follow this warning may result in serious injury or death.**
- **If cargo trailer is equipped with an old-style, single-wheel castor assembly, use extreme caution to ensure that locking pin of handle has securely locked the adjustable caster assembly in the lowered position. If locking pin is not fully locked, adjustable caster assembly may collapse, resulting in serious injury.**

- a. Support adjustable caster assembly (2) and at the same time pull out release handle (1). Lower adjustable caster assembly. Ensure that release handle is fully engaged.

TA505241

2-12. UNCOUPLING TRAILER FROM TOWING VEHICLE (Con't).

- b. Disconnect service air hose (4) from towing vehicle gladhand (5). If uncoupling an M105A2C, also disconnect emergency air hose (11) from towing vehicle gladhand (10).
- c. Disconnect intervehicular cable (3) from towing vehicle receptacle (6) and stow on trailer,
- d. Disconnect safety chains (13) from towing vehicle eyebolts (12) and stow on trailer,
- e. Remove pintle lockpin (7) and open pintle (8).
- f. With assistance, move trailer as required to disengage drawbar ring (9) from pintle (8). Apply handbrake(s).
- g. Move towing vehicle a safe distance from trailer.
- h. Perform all After (A) PMCS in Table 2-1.

2-13. LOADING CARGO TRAILER (M105 SERIES).

- a. Load capacity of the trailer is 3000 lb (1362 kg) on highway or cross-country. All loads must be evenly distributed over trailer floor. Do not exceed load capacity.
- b. Trailer may be loaded with a forklift truck if rear stake rack is removed and tailgate is opened.

2-14. WATER TANK TRAILER (M107 SERIES).

a. Filling Tank.

WARNING

- The highest sanitary practices must be exercised in handling water for drinking purposes. Serious illness may result from impure drinking water.
- M107 Series Water Tank Trailers, when used to haul NONPOTABLE WATER, must be so marked.

(1) Position water tank trailer next to water supply on solid level ground.

TA505242

2-14. WATER TANK TRAILER (M107 SERIES) (Con't)

- (2) Open manhole cover (2).

NOTE

All water tank trailers must be filled from an overhead, free-flowing source, or by a pressure pump.

- (3) Fill tank (1) through manhole opening (3).
- (4) Close manhole cover (2).

b. Drawing Water from Tank.

NOTE

During periods of inactivity, water should be drained from tank piping, discharge valve (7), manifold valve (6), and faucets (4).

- (1) Open discharge valve (7), permitting water to flow from tank (1) to manifold valve (6).
- (2) Open manifold valve (6), permitting water to flow to faucets (4).
- (3) Squeeze handles (5) on top of faucets (4) as required to dispense water.

2-15. OPERATING 110-VOLT ELECTRICAL POWER SOURCE (M448).

a. Connecting.

- (1) Park shop van trailer near auxiliary power source.

2-15. OPERATING 110-VOLT ELECTRICAL POWER SOURCE (M448) (Con't).

(2) Remove two leveling jacks (6) from stowed position. Place one leveling jack under each rear corner of shop van trailer.

CAUTION

Leveling jacks (6) are used to provide support when personnel enter and exit trailer. They must not be used to raise rear of trailer. Failure to follow this caution will result in damage to leveling jacks.

(3) Remove lockpin (5) and extend leveling jack (6) until rear of trailer is supported. Insert lockpin to hold leveling jack in extended position. Repeat for other leveling jack.

(4) Remove ground rod (7) from stowed position and drive into ground.

(5) Connect 110-volt auxiliary power cable (4) to receptacle (3).

(6) Turn electrical power on at circuit breaker (2).

(7) Plug electrical equipment into outlets (1) as needed for use.

b. Disconnecting.

(1) Turn off all electrical equipment and unplug from outlets (1).

(2) Turn off electrical power at circuit breaker (2).

(3) Disconnect 110-volt auxiliary power cable (4) from receptacle (3).

(4) Remove ground rod (7) from ground and stow.

(5) Remove lockpin (5) and lower leveling jack (6). Insert lockpin and stow leveling jack in shop van trailer. Repeat for other leveling jack.

TA505244

Section IV. OPERATION UNDER UNUSUAL CONDITIONS

Paragraph Title	Page Number
Fording	2-22
General	2-21
Operation in Extreme Cold	2-21
Operation in Extreme Heat	2-21
Operation in Mud	2-22
Operation in Saltwater Areas	2-22
Operation in Sandy or Dusty Areas	2-22
Operation in Snow	2-22

2-16. GENERAL.

This section contains instructions for safely operating the trailers under unusual conditions. In addition to normal preventive maintenance service, special care must be taken to keep the trailers operational in extreme temperatures and humidity.

2-17. OPERATION IN EXTREME COLD.

a. Special care must be taken when operating the trailers in cold weather. Refer to FM 9-207 for information regarding the water tank trailer. Refer to FM 21-305 for special instructions for all trailers.

b. Refer to Chapter 3, Section I for proper lubrication during extreme cold weather.

c. Care must be taken when handling cables. Extreme cold weather can cause insulation material on electrical wire to crack, causing short circuits. Construction material may become hard, brittle, and easily damaged or broken.

d. When parking for any period of time in temperature below 0°F (-18°C), park in a sheltered area out of the wind and clean off any buildup of ice or snow. Place a footing of planks or brush under tires and adjustable caster assembly to prevent them from freezing to the ground. Ensure that the tires are properly inflated (para 1-10). Underinflated tires will freeze, resulting in flat spots.

e. The following steps should be followed for the M107 Series Water Tank Trailers:

(1) Water trailers equipped with an aluminum water tank body may use the M67 Immersion Heater to prevent contents from freezing. Refer to TM5-4540-202-12&P for Installation, operation, and maintenance of the M67 Immersion Heater.

(2) Drain water from piping, valves, and faucets during periods of inactivity by closing discharge valve and opening manifold valve and all faucets (para 2-14).

(3) In areas where temperatures will drop below 32°F (0°C), manhole cover should be tightly closed.

2-18. OPERATION IN EXTREME HEAT.

a. Refer to Chapter 3, Section I for proper lubrication during extreme heat conditions.

b. Do not park the trailer in sunlight for long periods of time. Heat and sunlight shorten tire life.

c. Shelter or cover the trailer with canvas, if available.

2-19. OPERATION IN SANDY OR DUSTY AREAS.

- a. Clean, inspect, and lubricate the trailer more often in sandy or dusty areas (Chapter 3, Section 1),
- b. Maintain proper tire pressure:
 - (1) Reduce tire pressure to 25 psi (172 kPa) for operation on soft sand,
 - (2) Reduce tire pressure to 35 psi (241 kPa) for operation on cross-country terrain. Tire pressure must be returned to 50 psi (345 kPa) when operation resumes on hard-surface roads if tactical situation permits.
- c. Take precautions to prevent water for drinking purposes from becoming contaminated with sand and dust.

2-20. OPERATION IN SALTWATER AREAS.

Clean, inspect, and lubricate the trailer more often when operating in saltwater areas (Chapter 3, Section 1).

2-21. OPERATION IN MUD.

- a. Immediately after operation in mud, thoroughly clean, inspect, and lubricate if tactical situation permits (Chapter 3, Section 1).
- b. Pack wheel bearings as required (Chapter 3, Section 1).

2-22. OPERATION IN SNOW.

- a. Refer to FM 21-305 for special instructions on driving hazards in snow.
- b. Reduce tire pressure to 25 psi (172 kPa).

2-23. FORDING.

- a. Refer to the towing vehicle operating instructions for information on fording. Towing vehicle instructions are also applicable to the trailer,
- b. Refer to TM 9-238 for fording instructions.

CHAPTER 3 OPERATOR MAINTENANCE

Section I. LUBRICATION INSTRUCTIONS

Paragraph Title	Page Number
General	3-1
Lubrication Chart	3-2
Specific Lubrication Instructions	3-1

3-1. GENERAL.

NOTE

These instructions are MANDATORY.

- a. The trailers must receive lubrication with approved lubricants at recommended intervals in order to be mission-ready at all times.
- b. The KEY lists lubricants to be used in all temperature ranges and shows the intervals.
- c. The lubrication chart shows lubrication points, names items to be lubricated, the required lubricant, and recommended intervals for lubrication. Any special lubricating instructions required for specific components are contained in the NOTES section of the chart.
- d. Recommended intervals are based on normal conditions of operation, temperature, and humidity. When operating under extreme conditions, lubricants should always be changed more frequently. When in doubt, notify your supervisor.

3-2. SPECIFIC LUBRICATION INSTRUCTIONS.

- a. Keep all lubricants in a closed container and store in a clean, dry place away from extreme heat. Keep container covers clean and do not allow dust, dirt, or other foreign material to mix with lubricants. Keep all lubrication equipment clean and ready for use.
- b. Maintain a record of lubrication performed and report any problems noted during lubrication. Refer to DA Pam 738-750 for maintenance forms and procedures to record and report any findings.

WARNING

Wipe excess lubricant from the area of brakeshoe linings to avoid grease soaking the linings. If brakeshoe linings become soaked, have unit maintenance replace them. Failure to follow this warning may cause brakes to malfunction, resulting in serious injury or death.

- c. Keep all external parts of equipment not requiring lubrication free of lubricants. After lubrication, wipe off excess oil or grease to prevent accumulation of foreign matter.
- d. Refer to FM 9-207 for lubrication instructions in cold weather.
- e. Refer to TM 9-238 for lubrication instructions before and after fording operations.
- f. After operation in mud, sandy, or dusty conditions, clean and inspect all points of lubrication for fouled lubricants. Change lubricants as required.

LUBRICATION CHART

CHASSIS TRAILER: 1-1/2-TON, 2-WHEEL, M103 SERIES

TRAILER, CARGO: 1-1/2-TON, 2-WHEEL, M105 SERIES

**TRAILER, TANK, WATER: 1-1/2-TON, 2-WHEEL,
400-GALLON, M107 SERIES**

**TRAILER, VAN, SHOP: FOLDING SIDES, 1-1/2-TON,
2-WHEEL, M448**

Intervals (on-condition and hard time) and related man-hour times are based on normal operation. The man-hour time specified is the time you need to do all services prescribed for a particular interval. Decrease the intervals if your lubricants are contaminated, or if you are operating equipment under adverse conditions, including longer-than-usual operating hours. The intervals may be extended during periods of low activity. If extended, adequate preservation precautions must be taken.

Dotted leader lines indicate lubrication is required on both sides of the equipment.

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated

area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

Clean all fittings and area around lubrication points with dry cleaning solvent (Item 6, Appendix E) or equivalent before lubricating equipment. After lubrication, wipe off excess oil or grease to prevent accumulation of foreign matter.

The lowest level of maintenance authorized to lubricate a point is indicated in parentheses by one of the following: (C) for Operator/Crew; or (O) for Unit Maintenance.

BFS (MIL-L-46176) Brake Fluid Silicone, Automotive	All Temperatures			
GAA (MIL-G-10924) Grease, Automotive and Artillery	All Temperatures			

FOR ARCTIC OPERATION, REFER TO FM 9-207.

NOTES:

1. OIL CAN POINTS.

- Every six months, lubricate linkage pins, clevises, and all exposed adjusting threads with OE/HDO.
- If cargo trailer is equipped with old-style, single-wheel adjustable caster assembly, quarterly, or as required, clean all debris and dirt from locking pin area and lubricate with OE/HDO.

2. WHEEL BEARINGS. Every 12 months, remove, clean, and pack with GAA. Refer to TM 9-214, *Inspection, Care, and Maintenance of Antifriction Bearings*.

3. MASTER CYLINDER AND HYDRAULIC TANK. Every three months, check fluid level. Add fluid to within 1/2 in. (13 mm) from top.

Section II. TROUBLESHOOTING PROCEDURES

Paragraph Title	Page Number
Explanation of Columns	3-7
General	3-7
Operator/Crew Troubleshooting, Table 3-1	3-8
Troubleshooting Symptom Index	3-8

3-3. GENERAL.

a. This section provides information for identifying and correcting malfunctions which may develop while operating your trailer.

b. The Troubleshooting Symptom Index in paragraph 3-5 lists common malfunctions which may occur, and refers you to the proper page in Table 3-1 for a troubleshooting procedure.

c. If you are unsure of the location of an item mentioned in troubleshooting, refer to paragraph I-7 or to the maintenance task where the item is replaced.

d. Before performing troubleshooting, read and follow all safety instructions found in the Warning Summary at the front of this manual.

e. This section cannot list all malfunctions that may occur, nor all tests or inspections and corrective actions. If a malfunction is not listed, or is not corrected by the listed corrective actions, notify your supervisor.

f. When troubleshooting a malfunction:

(1) Locate the symptom or symptoms in the Troubleshooting Symptom Index in paragraph 3-5 that best describe the malfunction.

(2) Turn to the page in Table 3-1 where the troubleshooting procedures for the malfunction in question are described. Headings at top of each page show how each troubleshooting procedure is organized: MALFUNCTION, TEST OR inspection (in step number order), and CORRECTIVE ACTION.

(3) Perform each step in the order listed until the malfunction is corrected. DO NOT perform any maintenance task unless the troubleshooting procedure tells you to do so.

3-4. EXPLANATION OF COLUMNS.

The columns in Table 3-1 are defined as follows:

(1) **MALFUNCTION.** A visual or operational indication that something is wrong with the trailer.

(2) **TEST OR inspection.** A procedure to isolate the problem in a component or system.

(3) **CORRECTIVE ACTION.** A procedure to correct the problem.

3-5. TROUBLESHOOTING SYMPTOM INDEX.

MALFUNCTION	TEST OR INSPECTION	CORRECTIVE ACTION
--------------------	---------------------------	--------------------------

ELECTRICAL SYSTEM

1. ALL LAMPS FAIL TO LIGHT,

- step 10 Check that towing vehicle lights are turned on.
 Refer to towing vehicle technical manual for Instructions.
- Step 2. Check intervehicular cable for proper connection,
 Connect Intervehicular cable (para 2-10).
- Step 3. Check towing vehicle circuit breaker/fuse.
 Refer to towing vehicle technical manual for Instructions.

2. ONE OR MORE LAMPS (BUT NOT ALL) FAIL TO LIGHT.

- Check for loose plug connectors at affected light assemblies.
 Connect loose plug connector.

Table 3-1. Operator/Crew Troubleshooting (Con't).

MALFUNCTION	TEST OR INSPECTION	CORRECTIVE ACTION
<i>110-VOLT ELECTRICAL SYSTEM (M448)</i>		
3. NO POWER.	<p>Step 1. Check auxiliary power cable for loose connection.</p> <p style="padding-left: 40px;">Connect auxiliary power cable (para 2-15).</p> <p>Step 2. Check if circuit breakers in 110-volt control box are tripped (para 2-15).</p> <p style="padding-left: 40px;">Reset circuit breakers (para 2-15).</p>	
4. CIRCUIT BREAKER TRIPS.	<p>Check for power overload.</p> <p style="padding-left: 40px;">Unplug excess power equipment. Reset circuit breaker (para 2-15).</p>	
<hr/> <i>BRAKES</i>		
5. BRAKES DO NOT ENGAGE.	<p>Step 1. Check for closed air valve on towing vehicle.</p> <p style="padding-left: 40px;">Open air valve. Refer to towing vehicle technical manual for instructions.</p> <p>Step 2. Check for brake fluid leaks.</p> <p style="padding-left: 40px;">Open air valves. If brake fluid is leaking, notify unit maintenance.</p>	
6. BRAKES DO NOT RELEASE.	<p style="text-align: center;">NOTE</p> <p style="text-align: center;">All models have two air hoses except for M103A1 and M105A1. These models have one air hose.</p> <p>Step 1. Check for loose air hose(s).</p> <p style="padding-left: 40px;">Connect air hose(s) (para 2-10).</p> <p>Step 2. Ensure that air valves on towing vehicle are open.</p> <p style="padding-left: 40px;">Open air valves. Refer to towing vehicle technical manual for instructions.</p>	

Section III. OPERATOR MAINTENANCE

Paragraph Title	Page Number
Handbrake Lever Adjustment (All Except M107A1)	3-10
Operational Air Leak Check	3-10
Wheel Replacement	3-11

3-6. HANDBRAKE LEVER ADJUSTMENT (ALL EXCEPT M107A1).

WARNING

If trailer is not coupled to towing vehicle, ensure that wheels are securely chocked. Failure to do so may cause trailer to roll, resulting in injury to personnel or damage to equipment.

NOTE

- Handbrake lever (1) is properly adjusted when additional force is required to move handbrake lever beyond two-thirds distance of travel toward the applied position.
- Both handbrake levers (1) preadjusted the same way. This procedure covers one handbrake lever,
 - a. Release handbrake lever (1).
 - b. Turn adjustment knob (2) clockwise to tighten or counterclockwise to loosen.
 - c. Check adjustment, Repeat steps a and b as required.

3-7. OPERATIONAL AIR LEAK CHECK.

- a. Couple trailer to towing vehicle and connect all air hoses (para 2-10).
- b. Start towing vehicle and watch vacuum gage (1) or air pressure gage (2) for normal reading. Refer to towing vehicle technical manual for instructions.

TASOS248

3-7. OPERATIONAL AIR LEAK CHECK (Con't).

- c. Push brake pedal down to applied position and hold.
- d. Shut down engine.
- e. Watch vacuum gage (1) or air pressure gage (2) for two minutes. If pressure or vacuum drops more than 10% within two minutes, notify unit maintenance.

3-8. WHEEL REPLACEMENT.

a. Removal.

- (1) Apply handbrake(s).

NOTE

Hub studs and wheel nuts are marked R on right wheel and L on left wheel. Nuts must be turned in opposite direction of normal forward rotation of wheel to be loosened or removed.

- (2) Loosen, but do not remove, six nuts (4) from wheel (1).

3-8. WHEEL REPLACEMENT (Con't).

(3) Position floor jack under axle (3) near wheel (1) to be removed, and raise trailer until wheel is off ground.

(4) Remove six nuts (4).

(5) Remove wheel (1) from wheel studs (2).

b. Installation.

(1) Position wheel (1) on wheel studs (2).

(2) Install six nuts (4) fingertight.

(3) Lower floor jack until wheel (1) is on ground. Remove floor jack.

(4) Tighten six nuts (4) using tightening sequence shown. Have unit maintenance tighten nuts to 340-370 lb. -ft. (461-502 N.m) as soon as possible.

CHAPTER 4 UNIT MAINTENANCE

Section 1. REPAIR PARTS; SPECIAL TOOLS; TEST, MEASUREMENT, AND DIAGNOSTIC EQUIPMENT (TMDE); AND SUPPORT EQUIPMENT

Paragraph Title	Page Number
Common Tools and Equipment	4-1
Repair Parts	4-1
Special Tools; Test, Measurement, and Diagnostic Equipment (TMDE); and Support Equipment	4-1

4-1, COMMON TOOLS AND EQUIPMENT.

Refer to the *Modified Table of Organization and Equipment (MTOE)* for authorized common tools and equipment applicable to your unit.

4-2. SPECIAL TOOLS; TEST, MEASUREMENT, AND DIAGNOSTIC EQUIPMENT (TMDE); AND SUPPORT EQUIPMENT.

No special tools, TMDE, or support equipment are required to maintain the trailers.

4-3. REPAIR PARTS.

Repair parts are listed and illustrated in Appendix F of this manual.

Section II. SERVICE UPON RECEIPT

Paragraph Title	Page Number
General	4-2
Inspection Instructions	4-2
Servicing Instructions	4-2

4-4. GENERAL.

When anew, used, or reconditioned trailer is first received, determine whether it has been properly prepared for service and is condition to perform its mission . Follow the inspection instructions in paragraph 4-5 and servicing instructions in paragraph 4-6.

4-5. INSPECTION INSTRUCTIONS.

- a. Refer to DD Form 1397 for procedures on unpacking the trailer.
- b. Remove all straps, plywood, tape, seals, and wrappings.

WARNING

Drycleaning solvent P-D-680 is toxic and flammable, Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

- c. Remove rust preventive compound from coated exterior parts of the trailer using dry cleaning solvent (Item 6, Appendix E) and rags (Item 11, Appendix E).
- d. Inspect the trailer for damage incurred during shipment. Check also to see if the equipment has been modified.
- e. Check the equipment against the packing list to ensure that the shipment is complete. Report any discrepancies in accordance with instructions in DA Pam 738-750.

4-6. SERVICING INSTRUCTIONS.

- a. Perform all operator/crew and unit PMCS. Schedule the next PMCS on DD Form 314.
- b. Lubricate all lubrication points as described in Chapter 3, Section 1, regardless of interval.
- c. Report any problems on DA Form 2407.
- d. Perform a break-in road test of 25 mi (40 km) at a maximum speed of 50 mi/h (80 km/h).

Section III. UNIT PREVENTIVE MAINTENANCE CHECKS AND SERVICES (PMCS)

Paragraph Title	Page Number
General	4-3
General PMCS Procedures	4-3
Unit Preventive Maintenance Checks and Services (PMCS), Table 4-1	4-4
Reporting Repairs	4-3
Service intervals	4-3
Specific PMCS Procedures	4-4

4-7. GENERAL.

To ensure that the M105 and M107 Series Trailers and M448 Shop Van are ready for operation stall times, they must be inspected on a regular basis so that defects may be found before they result in serious damage, equipment failure, or injury to personnel. This section contains systematic instructions on inspections, adjustments, and corrections to be performed by unit maintenance.

4-8. SERVICE INTERVALS.

Perform PMCS, found in Table 4-1, at the following intervals:

- (1) Perform *Quarterly* (Q) PMCS once every three months.
- (2) Perform *Semiannual* (S) PMCS once every six months.
- (3) Perform *Annual* (A) PMCS once each year.

4-9. REPORTING REPAIRS.

Report all defects and corrective actions on DA Form 2404. If a serious problem is found, report it to your supervisor immediately.

4-10. GENERAL PMCS PROCEDURES.

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F(38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

- a. Keep equipment clean. Dirt, oil, and debris may cover up a serious problem. Clean as you work and as needed. Use dry cleaning solvent (Item 6, Appendix E) on all metal surfaces. Use soap (Item 5, Appendix E) and water on rubber, plastic, and painted surfaces.
- b. While performing PMCS, inspect the following components:
 - (1) **Bolts, Nuts, and Screws.** Ensure that they are not loose, missing, bent, or broken. Tighten any that are loose.
 - (2) **Welds.** Inspect for gaps where parts are welded together. Report bad welds to your supervisor.

4-10. GENERAL PMCS PROCEDURES (Con't).

(3) Electric Wires or Connectors. Inspect for cracked or broken insulation, bare wires, and loose or broken connectors. Make repairs or replace as required.

(4) Hoses, Lines, and Fittings. Inspect for wear, damage, and leaks. Ensure that clamps and fittings are tight. If a leak originates from a loose fitting or connector, tighten it. If a component is broken or worn, correct problem if authorized by the Maintenance Allocation Chart (MAC) (Appendix B). If not authorized, report it to your supervisor.

4-11. SPECIFIC PMCS PROCEDURES.

a. Unit PMCS are provided in Table 4-1. Always perform PMCS in the order listed. Once it becomes a habit, anything that is not right can be spotted in a minute. If anything wrong is discovered through PMCS, perform the appropriate troubleshooting task in Section IV of this chapter. If any component or system is not serviceable, or if given service does not correct problem, notify your superisor.

b. Before performing preventive maintenance, read all the checks required for the applicable interval and prepare tools needed to make all checks. Have several clean rags (Item 11, Appendix E) handy. Perform ALL inspections at the applicable interval.

c. The columns in Table 4-1 are defined as follows:

- (1) Item No. Provides a logical sequence for PMCS to be performed and is used as a source of item numbers for the "TM ITEM NO" column on DA Form 2404 in recording PMCS results.
- (2) Interval. Specifies interval at which PMCS is to be performed.
- (3) Item to be Inspected. Lists the system and common name of items that are to be inspected. Included in this column are specific servicing, inspection, replacement, or adjustment procedures to be followed.
- (4) Procedures. Tells you how to do the required check or service.

Table 4-1. Unit Preventive Maintenance Checks and Services (PMCS).

Section IV. UNIT TROUBLESHOOTING PROCEDURES

Paragraph Title	Page Number
Explanation of Columns	4-6
General	4-6
Unit Troubleshooting, Table 4-2.	4-7
Troubleshooting Symptom Index	4-7

4-12. GENERAL.

a. This section provides information for identifying and correcting malfunctions which may develop when operating or maintaining the trailer.

b. The Troubleshooting Symptom Index in paragraph 4-14 lists common malfunctions which may occur and refers you to the proper page in Table 4-2 for a troubleshooting procedure.

c. This section cannot list all malfunctions that may occur, nor all tests or inspections and corrective actions. If a malfunction is not listed, or is not corrected by the listed corrective actions, notify your supervisor,

d. When troubleshooting a malfunction:

(1) Question the operator to obtain any information that might help determine the cause of the problem. Before continuing, ensure that all applicable operator/crew troubleshooting was performed.

(2) Locate the symptom (s) in paragraph 4-14 that best describes the malfunction. If the appropriate symptom is not listed, notify your supervisor.

(3) Turn to the page in Table 4-2 where the troubleshooting procedures for the malfunction in question are described. Headings at the top of each page show how each troubleshooting procedure is organized: MALFUNCTION, TEST OR INSPECTION (in step number order), and CORRECTIVE ACTION.

(4) Perform each step in the order listed until the malfunction is corrected. DO NOT perform any maintenance task unless the troubleshooting procedure tells you to do so.

4-13. EXPLANATION OF COLUMNS.

The columns in Table 4-2 are defined as follows:

(1) MALFUNCTION. A visual or operational indication that something is wrong with the trailer.

(2) TEST OR INSPECTION, A procedure to isolate the problem in a component or system.

(3) CORRECTIVE ACTION. A procedure to correct the problem.

4-14. TROUBLESHOOTING SYMPTOM INDEX.

	Troubleshooting Procedure Page
BRAKE SYSTEM	
Brakes do Not Engage	4-10
Brakes Do Not Release	4-10
ELECTRICAL SYSTEM	
All Lamps Dim or Flickering	4-7
One or More Lamps (But Not All) Fail to light	4-8
110-VOLT ELECTRICAL SYSTEM (M448)	
Circuit Breaker Trips	4-9
No Power	4-9

Table 4-2. Unit Troubleshooting.

MALFUNCTION	TEST OR INSPECTION	CORRECTIVE ACTION
-------------	--------------------	-------------------

ELECTRICAL SYSTEM

1. ALL LAMPS DIM OR FLICKERING.

WARNING

When troubleshooting an electrical malfunction, ALWAYS disconnect inter vehicular electrical cable from towing vehicle. Failure to do so may result in injury or death due to electric shock,

NOTE

Refer to paragraph 4-27 to determine routing of electrical wires and location of electrical components.

Step 1. Check continuity between terminal ground wire 90 and frame drawbar.

If there is no continuity, remove and clean mating surfaces (para 4-26).

Step 2. Check continuity between terminal ground wire 90 and socket of inter vehicular cable plug,

if there is no continuity, replace intervehicular cable (para 4-26).

Table 4-2, Unit Troubleshooting (Con't).

MALFUNCTION	TEST OR inspection	CORRECTIVE ACTION
-------------	--------------------	-------------------

2. ONE OR MORE LAMPS (BUT NOT ALL) FAIL TO LIGHT.

WARNING

When troubleshooting an electrical malfunction, ALWAYS disconnect Inter vehicular electrical cable from towing vehicle. Failure to do so may result in injury or death due to electric shock.

NOTE

Refer to paragraph 4-27 to determine routing of electrical wires and location of electrical components.

Step 1. Check affected lamps.

Replace lamps (para 4-21, 4-22, or 4-23).

Step 2. Check continuity between edge of lamp socket and frame.

If there is no continuity, remove and clean mating surfaces (para 4-21, 4-22, or 4-23).

Step 3. Check continuity between center post of lamp socket and related light assembly plug connectors.

If there is no continuity, replace affected light assembly (para 4-21, 4-22, or 4-23).

Step 4. Check related chassis wiring harness plug connectors for presence of 24 volts.

If 24 volts are not present, proceed to step 5.

Step 5. Check related inter vehicular cable plug connectors for presence of 24 volts.

If 24 volts are present, replace chassis wiring harness (para 4-24).

Step 6. Check towing vehicle receptacle pin connector for presence of 24 volts.

If 24 volts are present, replace intervehicular cable (para 4-26).

If 24 volts are not present, refer to the towing vehicle unit maintenance manual.

Table 4-2. Unit Troubleshooting (Con't).

MALFUNCTION	TEST OR INSPECTION	CORRECTIVE ACTION
-------------	--------------------	-------------------

*110-VOLT ELECTRICAL SYSTEM (M448)***3. CIRCUIT BREAKER TRIPS.****WARNING**

When troubleshooting an electrical malfunction, **ALWAYS** disconnect Intervehicular electrical cable from towing vehicle. Failure to do so may result in injury or death due to electric shock.

NOTE

Refer to paragraph 4-27 to determine routing of electrical wires and location of electrical components.

Step 1. With equipment unplugged from outlet and auxiliary power cable connected, turn circuit breaker off, then on.

If circuit breaker still trips, disconnect auxiliary power cable (para 2-15). Proceed to step 2.

WARNING

To prevent electric shock, auxiliary power cable must be disconnected. Failure to do so may result in serious injury or death.

Step 2. Check for loose or broken wires in 110-volt electrical system.

Tighten or replace wires (para 4-69).

4. NO POWER.**WARNING**

When troubleshooting an electrical malfunction, **ALWAYS** disconnect Intervehicular electrical cable from towing vehicle. Failure to do so may result in injury or death due to electric shock.

NOTE

Refer to paragraph 4-27 to determine routing of electrical wires and location of electrical components.

Step 1. Check for unserviceable circuit breaker (para 4-70).

Replace circuit breaker (para 4-69).

Table 4-2. Unit Troubleshooting (Con't).

MALFUNCTION	TEST OR INSPECTION	CORRECTIVE ACTION
-------------	--------------------	-------------------

4. NO POWER.

step 2. Check for unserviceable auxiliary power cable (para 4-70).

Replace auxiliary power cable (Appendix C).

Step 3. Check for loose or broken wires.

If loose or broken, tighten or replace wires (para 4-69 or 4-71).

Step 4. Check for unserviceable outlets (para 4-70).

Replace outlets (para 4-69).

BRAKE SYSTEM**5. BRAKES DO NOT RELEASE.**

Step 1. Check handbrake cable for binding and proper adjustment.

Replace or adjust as required (para 4-30, 4-31, or 4-32).

Step 2. In cold weather, check for frozen brakeshoe linings.

Remove wheel (para 3-8). Heat brakedrum to thaw.

NOTE

Step 3 applies to all models except M105A2C.

Step 3. Check for proper brake adjustment.

Adjust brakes (para 4-33 or 4-34).

NOTE

Step 4 applies only to M105A2C.

Step 4. Check for obstruction in service or emergency vacuum hoses or lines.

Clear obstruction or replace affected hose or line (para 4-42).

6. BRAKES DO NOT ENGAGE.**NOTE**

Step 1 applies only to M105A2C.

Step 1. Check fluid level in hydraulic tank and master cylinder.

Fill hydraulic tank and master cylinder to within ½ in. (13 mm) from top (Chapter 3, Section 1). Bleed brakes (para 4-39).

Table 4-2. Unit Troubleshooting (Con't).

MALFUNCTION	TEST OR INSPECTION	CORRECTIVE ACTION
-------------	--------------------	-------------------

NOTE**Stop 2 applies to all models except M105A2C.**

- Step 2. Check fluid level in master cylinder,
 Fill master cylinder to within ½ in. (13 mm) from top (Chapter 3, Section 1). Bleed
 brakes (para 4-39).
- Step 3. Check air filter for obstructions.
 Replace air filter (para 4-45).
- Step 4. Check for obstruction in service air hose or line.
 Clear obstruction or replace hose or line (para 4-46).
- Step 5. Check for worn brakeshoe linings. Brakeshoe linings should have a minimum thickness of
 1/8 in. (3.2 mm).
 Replace worn brakeshoes (para 4-33 or 4-34).

Section V. GENERAL MAINTENANCE INSTRUCTIONS

Paragraph Title	Page Number
Cleaning instructions	4-13
General	4-12
Inspection Instructions	4-14
Repair instructions	4-14
Tagging Wires and Hoses	4-14
Work Safety.	4-12

4-15. GENERAL.

a. These general maintenance instructions contain general shop practices and specific methods you must be familiar with to properly maintain your trailer. You should read and understand these practices and methods before performing any unit maintenance tasks.

b. Before beginning a task, find out how much repair, modification, or replacement is needed to fix the equipment. Sometimes the reason for equipment failure can be seen right away, and complete teardown is not necessary. Disassemble equipment only as far as necessary to repair or replace damaged or broken parts.

c. The following “initial Setup” information applies to all procedures:

(1) Resources are not listed unless they apply to the procedure.

(2) Personnel are listed only if more than one technician is required to complete the task, If “Personnel Required” is not listed, one technician can complete the task.

d. All tags and forms attached to equipment must be checked to learn the reason for equipment’s removal from service, Modification Work Orders (MWO) and Technical Bulletins (TB) must also be checked for equipment changes and updates.

e. In some cases, a part may be damaged by removal. If the part appears to be good, and other parts behind it are not defective, leave it on and continue with the procedure. Here are a few simple rules:

(1) Do not remove dowel pins or studs unless loose, bent, broken, or otherwise damaged.

(2) Do not remove bearings or bushings unless damaged. If you need to remove them to access parts behind, pull bearings and bushings out carefully.

(3) Replace all gaskets, seals, and preformed packings.

4-16. WORK SAFETY.

a. Observe all WARNINGS and CAUTIONS. Always use power tools carefully.

b. Protect yourself against injury. Wear protective gear such as safety goggles or lenses, safety shoes, rubber apron, or gloves.

c. When lifting heavy parts, have someone help you. Ensure that lifting/jacking equipment is working properly, is suitable for the assigned task, and is secure against slipping.

4-17. **CLEANING INSTRUCTIONS.****WARNING**

Improper cleaning methods and use of unauthorized cleaning liquids or solvents can injure personnel and damage equipment. To prevent this, refer to TM 9-247 for further instructions.

a. General. Cleaning instructions will be the same for a majority of parts and components which make up the trail. The following should apply to all cleaning operations:

(1) Clean all parts before inspection, after repair, and before assembly.

(2) Keep hands free of grease which can collect dust, dirt, and grit.

(3) After cleaning, all parts should be covered or wrapped to protect them from dust and dirt. Parts that are subject to rust should be lightly oiled.

b. Steam Cleaning

(1) Before steam cleaning exterior of trailer, protect all electrical equipment which could be damaged by steam or moisture.

(2) Place disassembled parts in a suitable container to steam clean. Parts that are subject to rust should be dried and lightly oiled after cleaning.

c. Castings, Forgings, and Machined Metal Parts.**WARNING**

Dry cleaning solvent P-D-680 is toxic and flammable, Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

(1) Clean inner and outer surfaces with dry cleaning solvent (Item 6, Appendix E).

(2) Remove grease and accumulated deposits with a stiff bristle brush.

WARNING

Compressed air used for cleaning or drying purposes, or for clearing restrictions, should never exceed 30 psi (207 kPa). Wear protective clothing (goggles/shield, gloves, etc.) and use caution to avoid injury to personnel.

(3) Clear all threaded holes with compressed air to remove dirt and cleaning fluids.

CAUTION

Do not wash oil seals, electrical cables, and flexible hoses with dry cleaning solvent or mineral spirits. Serious damage or destruction of material would result.

d. Oil Seals, Electrical Cables, and Flexible Hose. Wash electrical cables and flexible hose with a solution of soap (Item 5, Appendix E) and water and wipe dry.

e. Bearings. Clean bearings in accordance with TM 9-214.

4-18. INSPECTION INSTRUCTIONS.

NOTE

All damaged areas should be marked for repair or replacement.

- a. All components and parts must be carefully checked to determine if they are serviceable for use, can be repaired, or must be scrapped,
- b. inspect drilled and tapped (threaded) holes for the following:
 - (1) Wear, distortion, cracks, and any other damage in or around holes.
 - (2) Threaded areas for wear distortion (stretching), and evidence of cross-threading.
- c. Inspect metal lines, flexible lines (hoses), and metal fittings for the following:
 - (1) Metal lines for sharp kinks, cracks, bad bends, and dents.
 - (2) Flexible lines for fraying, evidence of leakage, and loose metal fittings or connectors.
 - (3) Metal fittings and connectors for thread damage and worn or rounded hex heads.
- d. Inspect castings, forgings, and machined metal parts for the following:
 - (1) Machined surfaces for nicks, burrs, raised metal, wear, and other damage.
 - (2) Inner and outer surfaces for breaks and cracks.
- e. inspect air lines, fittings, and connectors for leaks by coating them with a solution of soap (Item 5, Appendix E) and water, No leakage is permissible.
- f. inspect bearings in accordance with TM 9-214,

4-19. REPAIR INSTRUCTIONS.

- a. Repair casting, forgings, and machined metal parts using the following instructions:
 - (1) Repair minor cracked casting or forgings in accordance with TM 9-237.
 - (2) Repair minor damage to machined surfaces with a fine mill file or an abrasive cloth (item 4, Appendix E) dipped in dry cleaning solvent (item 6, Appendix E).
 - (3) Replace any deeply nicked machined surface that could affect the assembly operation.
 - (4) Repair minor damage to threaded capscrew holes with thread tap of same size to prevent cutting oversize.
- b. Refer to paragraphs 4-37 and 4-42 for maintenance on metal lines, flexible lines (hoses), and metal fittings.
- c. After repair, clean all parts thoroughly to prevent dirt, metal chips, or other foreign material from entering any working parts.

4-20. TAGGING WIRES AND HOSES.

- a. As soon as first wire or hose is disconnected, write number " 1 " on two tags. Secure one tag to wire or hose and other tag to terminal, nipple, or fitting. After disconnecting second wire or hose, write number " 2 " on two tags. Secure one tag to wire or hose, and second tag to terminal, nipple, or fitting. Do the same for all hoses and fittings.

4-20. TAGGING WIRES AND HOSES (Con't).

- b. Note which numbers you used, in pencil, on art in manual. This will help you accurately retag, if tags are removed to perform cleaning and maintenance work,
- c. Remove all tags when finished.

Section VI. ELECTRICAL SYSTEM MAINTENANCE

Paragraph Title	Page Number
Blackout Stoplight Maintenance	4-15
Chassis Wiring Harness Replacement	4-24
Composite Marker Light Maintenance	4-22
Intervehicular Cable Replacement	4-28
Service and Blackout Taillight Maintenance	4-18
Wiring Diagrams	4-30
Wiring Harness Repair	4-26

4-21. BLACKOUT STOPLIGHT MAINTENANCE.

This Task Covers:

- a. Lamp Replacement
 - c. Installation
 - b. Removal
-

Initial Setup:

Equipment Conditions:

- Intervehicular cable disconnected from towing vehicle (para 2-12).

Materials/Parts:

- One lockwasher

Tools/Test Equipment:

- General mechanic's tool kit:
-

4-21. BLACKOUT STOPLIGHT MAINTENANCE (Con't).

a. LAMP REPLACEMENT

1. Remove two screws (1) and door (2) from housing (4).
2. Inspect gasket (3) for damage. If damaged, remove and discard.
3. Remove lamp (6) from socket (5) by pushing lamp in and turning counterclockwise.
4. Install new lamp (6) in socket (5) by pushing lamp in and turning clockwise.
5. If removed, install new gasket (3) in door (2).
6. Install door (2) on housing (4) with two screws (1).

b. REMOVAL

1. Disconnect plug connector (7) from housing (4).
2. Remove bolt (9), lockwasher (10), and housing (4) from bracket (8). Discard lockwasher.

c. INSTALLATION

1. Install housing (4) on bracket (8) with new lockwasher (10) and bolt (9).
2. Connect plug connector (7) to housing (4).

4-21. BLACKOUT STOPLIGHT MAINTENANCE (Con't).

**FOLLOW-ON TASKS:**

- Connect intervehicular cable to towing vehicle (para 2-10).
- Check operation of light.

4-22. SERVICE AND BLACKOUT TAILLIGHT MAINTENANCE.

This Task Covers:

- a. Lamp Replacement
 - b. Removal
 - c. Installation
-

Initial Setup:

Equipment Conditions:

- Intervehicular cable disconnected from towing vehicle (para 2-1 2).

Materials/Parts:

- Marker tags (as required) (item 16, Appendix E)
- Two lockwashers

Tools/Test Equipment:

- General mechanic's tool kit
-

a. LAMP REPLACEMENT

NOTE

Service taillight lamps and blackout taillight lamps are replaced the same way except blackout taillight has two lamps and service taillight has three lamps.

1. Loosen six screws (2) and remove door (1) from body (4).
2. inspect preformed packing (8) for damage. if damaged, remove and discard.
3. Remove two lamps (6) and lamp (7) from sockets (3) and socket (5) by pushing lamps in and turning counterclockwise.
4. Install two new lamps (6) and lamp (7) in sockets (3) and socket (5) by pushing lamps in and turning clockwise.

4-22. SERVICE AND BLACKOUT TAILLIGHT MAINTENANCE (Con't).

5. If removed, install new preformed packing (8) in door (1).
6. Install door (1) on body (4) and tighten six screws (2).

b. REMOVAL**NOTE**

Service taillight and blackout taillight are removed the same way except blackout taillight has two plug connectors and service taillight has three plug connectors.

1. Tag wires for installation if identification bands are missing or not legible (para 4-20).
2. Remove three plug connectors (11 and 12) from clips (13) and disconnect.
3. Remove grommet (10) from framerail (9). Discard grommet if damaged.
4. Remove three plug connectors (11) through hole in framerail (9).

4-22. SERVICE AND BLACKOUT TAILLIGHT MAINTENANCE (Con't).

5. Remove two screws (14), lockwashers (15), and body (4) from bracket (16). Discard lockwashers.

c. INSTALLATION

NOTE

Service taillight and blackout taillight are installed the same way except blackout taillight has two plug connectors and service taillight has three plug connectors.

1. Install body (4) on bracket (16) with two new lockwashers (15) and screws (14).
2. Insert three plug connector (11) through hole in framerail (9).
3. Install grommet (10) in framerail (9).
4. Connect three plug connectors (11 and 12) and install in clips (13).

4-22. SERVICE AND BLACKOUT TAILLIGHT MAINTENANCE (Con't).

**FOLLOW-ON TASKS:**

- Connect intervehicular cable to towing vehicle (para 2-10).
- Check operation of light.

4-23. COMPOSITE MARKER LIGHT MAINTENANCE.

This Task Covers:

- | | |
|---------------------|-----------------|
| a. Lamp Replacement | c. Installation |
| b. Removal | |

Initial Setup:

Equipment Conditions:

- Intervehicular cable disconnected from towing vehicle (para 2-12).

Material/Parts:

- Marker tags (as required) (Item 16, Appendix E)
- Two lockwashers

Tools/Test Equipment:

- General mechanic's tool kit

a. LAMP REPLACEMENT

1. Loosen six screws (2) and remove lens (1) from body (8).
2. Inspect preformed packing (3) for damage. If damaged, remove and discard.
3. Remove four lamps (4, 5, and 10) from sockets (6, 7, and 9) by pushing lamps in and turning counter-clockwise.
4. Install new lamps (4, 5, and 10) in sockets (6, 7, and 9) by pushing lamps in and turning clockwise.
5. If removed, install new preformed packing (3) in lens (1).
6. Install lens (1) on body (8) and tighten six screws (2).

TA505257

4-23. COMPOSITE MARKER LIGHT MAINTENANCE (Con't).

b. REMOVAL

1. Tag wires for installation if identification bands are missing or not legible (para 4-20),
2. Remove four plug connectors (13 and 14) from clips (15) and disconnect.
3. Remove grommet (12) from framerail (11). Discard grommet if damaged.
4. Remove four plug connectors (13) through hole in framerail (11).
5. Remove two screws (16), lockwashers (17), and body (8) from bracket (18), Discard lockwashers.

c. INSTALLATION

1. Install body (8) on bracket (18) with two new lockwashers (17) and screws (16).
2. Insert four plug connectors (13) through hole in framerail (11).
3. Install grommet (12) in framerail (11).
4. Connect four plug connectors (13 and 14) and install in clips (15).

FOLLOW-ON TASKS:

- Connect intervehicular cable to towing vehicle (para 2-10).
- Check operation of light.

4-24. CHASSIS WIRING HARNESS REPLACEMENT.

This Task Covers:

- a. Removal b. Installation
-

Initial Setup:

Equipment Conditions:

- InterVehicular cable disconnected from towing vehicle (para 2-12).

Materials/Parts:

- Marker tags (as required) (Item 16, Appendix E)

Tools/Test Equipment:

- General mechanic's tool kit
-

NOTE

Chassis wiring harness (2) removal is the same for all models except MI 05A1 and M107A1 which have five plug connectors (8) at front of trailer. All other models have six plug connectors.

1. Tag wires for installation if identification bands are missing or not legible (para 4-20).
2. Remove six plug connectors (7 and 8) from clips (6) and disconnect.
3. Remove screws (9) and clamps (1 O) from drawbar (11).
4. Remove three plug connectors (12 and 13) from clips (14) and disconnect. Repeat on opposite side of trailer.
5. Remove eight screws (1), clamps (3), and chassis wiring harness (2) from framerail (5) and crossmember (4).

b. INSTALLATION

NOTE

Chassis wiring harness (2) installation is the same for all models except MI 05A1 and MI 07A1 which have five plug connectors (8) at front of trailer. All other models have six plug connectors.

1. Position chassis wiring harness (2) and clamps (3) on framerail (5) and crossmember (4) and install eight screws (1).
2. Connect three plug connectors (12 and 13) and install in clips (14). Repeat on opposite side of trailer.
3. Connect six plug connectors (7 and 8) and install in clips (6).
4. Secure chassis wiring harness (2) to drawbar (11) with clamps (10) and screws (9).

4-24. CHASSIS WIRING HARNESS REPLACEMENT (Con't).

FOLLOW-ON TASKS:

- Connect Intervehicular cable to towing vehicle (para 2-10).
- Check operation of light.

4-25. WIRING HARNESS REPAIR.

This Task Covers:

- | | |
|------------------------------------|----------------------------|
| a. Identification Band Replacement | c. Male Connector Repair |
| b. Terminal Replacement | d. Female Connector Repair |
-

Initial Setup:

Equipment Conditions:

- Intervehicular cable disconnected from towing vehicle (para 2-12).

Tools/Test Equipment:

- General mechanics tool kit
- Common No. 2 shop set
- Electric etcher

Materials/Parts:

- Contacts (as required)
 - Identification bands (as required)
 - Terminals (as required)
-

a. IDENTIFICATION BAND REPLACEMENT

1. Remove identification band (2) from wire lead (1) and discard.
2. Mark new identification band (2) with proper identification number.
3. Position new identification band (2) on wire lead (1) and bend tabs over wire lead.

b. TERMINAL REPLACEMENT

1. Cut terminal (3) off wire lead (4) and discard.
2. Strip insulation off wire lead (4) equal to depth of new terminal (3).
3. Position new terminal (3) on wire lead (4). Crimp terminal.

4-25. WIRING HARNESS REPAIR (Con't).

c. MALE CONNECTOR REPAIR

1. Slide shell (7) back and remove washer (8) from wire lead (6), Cut contact (5) from wire lead and discard. Remove shell.
2. Strip insulation off wire lead (6) equal to depth of new contact (5).
3. Slide shell (7) on wire lead (6).
4. Position new contact (5) on wire lead (6) and crimp.
5. Position washer (8) on wire lead (6). Slide shell (7) over washer and contact (5).

d. FEMALE CONNECTOR REPAIR

1. Slide connector (12) and insulator (11) back and cut terminal (9) from wire lead (10). Discard terminal.
2. Remove insulator (11) and connector (12) from wire lead (10),
3. Strip insulation off wire lead (10) equal to depth of new terminal (9).
4. Slide connector (12) and insulator (11) on wire lead (10).
5. Position new terminal (9) on wire lead (10) and crimp.
6. Slide insulator (11) and connector (12) over terminal (9).

FOLLOW-ON TASKS:

- Connect intervehicular cable to towing vehicle (para 2-10).
- Check operation of lights.

4-26. INTERVEHICULAR CABLE MAINTENANCE.

This Task Covers:

- | | |
|-----------------|-----------|
| a. Removal | c. Repair |
| b. Installation | |

Initial Setup:

Equipment Conditions:

- Intervehicular cable disconnected from towing vehicle (para 2-1 2).

Materials/Parts:

- Marker tags (as required) (Item 16, Appendix E)

Tools/Test Equipment:

- General mechanic's tool kit

a. REMOVAL

NOTE

Intervehicular cable (2) removal is the same for all models except M105A1 and M107A1 which have five plug connectors (9). All other models have six plug connectors.

1. Tag wires for installation if identification bands are missing or not legible (para 4-20).
2. Remove six plug connectors (9 and 10) from clips (1) and disconnect.
3. Remove two screws (5), clip (6), and terminal (7) from drawbar (8).
4. Remove three screws (4), straps (3), and intervehicular cable (2) from drawbar (8).

TA505262

4-26. INTERVEHICULAR CABLE MAINTENANCE (Con't).

b. INSTALLATION**NOTE**

Intervehicular cable (2) installation is the same for all models except M105A1 and M107A1 which have five plug connectors (9). All other modes have six plug connectors.

1. Position intervehicular cable (2) and three straps (3) on drawbar (8) and install three screws (4).
2. Install terminal (7) and clip (6) on drawbar (8) with two screws (5).
3. Connect six plug connectors (9 and 10) and install in clips (1).

c. REPAIR**NOTE**

Repair of intervehicular cable (2) consists of replacement of identification bands, terminal (7) and repair of plug connectors (9).

Refer to paragraph 4-25 for repair instructions.

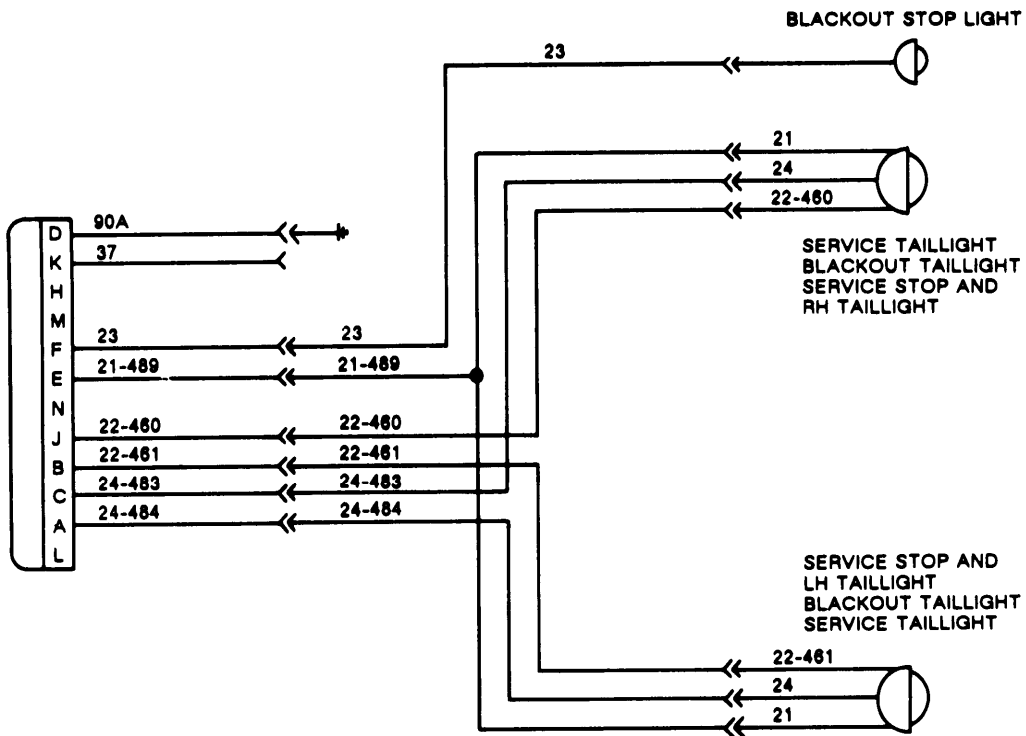

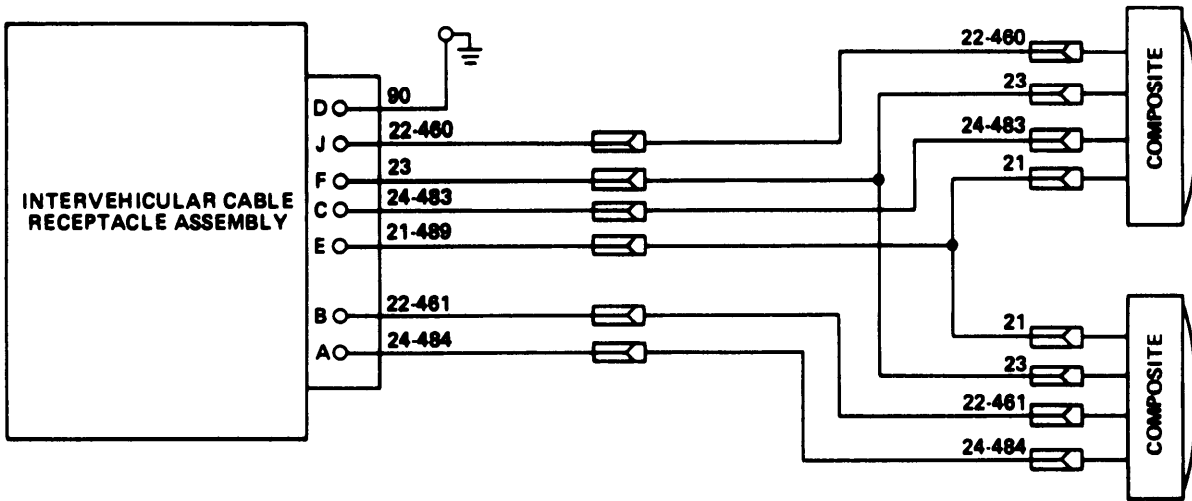

FOLLOW-ON TASKS:

- Connect intervehicular cable to towing vehicle (para 2-10).
- Check operation of lights.

4-27. WIRING DIAGRAMS.

NOTE

- This paragraph contains the trailer wiring diagrams. Refer to these diagrams when performing electrical troubleshooting and when performing electrical repair and maintenance.
- For information on manufacturing wires, refer to Appendix G.

TA505263

Section VII. BRAKE SYSTEM MAINTENANCE

Paragraph Title	Page Number
Airbrake Chamber Replacement	4-70
Air Coupling and Hose Assembly Maintenance	4-74
Air Filter Maintenance	4-72
Air Reservoir Replacement	4-71
Bleeding Hydraulic Brake System	4-61
Emergency Relay Valve Replacement	4-75
Handbrake Cable Adjustment	4-40
Handbrake Cable Replacement (All Except M107A1)	4-34
Handbrake Cable Replacement (M107A1)	4-37
Handbrake Lever Replacement (All Except M107A1)	4-32
Handbrake Lever Replacement (M107A1)	4-33
Hydraulic Lines, Hoses, and Fittings Replacement	4-56
Hydraulic Tank Maintenance (M105A2C)	4-59
Master Cylinder Replacement (All Except M105A2C)	4-53
Service Brake Assembly Maintenance (M103A1, M105A1, and M107A1)	4-42
Service Brake Assembly Maintenance (M103A3, M105A2, M105A2C, M107A2, and M107A2C)	4-48
Vacuum Chamber and Master Cylinder Replacement (M105A2C)	4-63
Vacuum Lines, Hoses, and Fittings Replacement (M105A2C)	4-68
Vacuum Quick Coupling Replacement (M105A2C)	4-66
Wheel Cylinder Replacement (All Except M105A2C)	4-55

4-28. HANDBRAKE LEVER REPLACEMENT (ALL EXCEPT M107A1).

This Task Covers:

- a. Removal b. Installation
-

Initial Setup:

Materials/Parts:

- One cotter pin
- Two lockwashers

Tools/Test Equipment:

- General mechanic's tool kit
-

a. REMOVAL

WARNING

If trailer is not coupled to towing vehicle, ensure that wheels are securely chocked. Failure to do so may cause trailer to roll, resulting in injury to personnel or damage to equipment.

1. Remove cotter pin (3), flatwasher (2), clevis pin (9), and disconnect clevis (5) from handbrake lever (1). Discard cotter pin.
2. Remove two nuts (6), lockwashers (7), screws (8), and handbrake lever (1) from crossmember (4). Discard lockwashers.

b. INSTALLATION

1. Install handbrake lever (1) on crossmember (4) with two screws (8), new lockwashers (7), and nuts (6).
2. Connect clevis (5) to handbrake lever (1) with clevis pin (9), flatwasher (2), and new cotter pin (3).

FOLLOW-ON TASKS:

- Adjust handbrake lever (para 3-6).

TA506264

4-29. HANDBRAKE LEVER REPLACEMENT (M107A1).

This Task Covers:

a. Removal

b. Installation

Initial Setup:

Materials/Parts:

- One cotter pin
- Two lockwashers

Tools/Test Equipment:

- General mechanic's tool kit

a. REMOVAL

WARNING

If trailer is not coupled to towing vehicle, ensure that wheels are securely chocked. Failure to do so may cause trailer to roil, resulting in injury to personnel or damage to equipment.

1. Remove cotter pin (8) and clevis pin (2), and disconnect clevis (1) from handbrake lever (6). Discard cotter pin.
2. Remove two nuts (4), lockwashers (3), bolts (7), and handbrake lever (6) from siderail (5). Discard lockwashers.

b. INSTALLATION

1. Install handbrake lever (6) on siderail (5) with two bolts (7), new lockwashers (3), and nuts (4).
2. Connect clevis (1) to handbrake lever (6) with clevis pin (2) and new cotter pin (8).

FOLLOW-ON TASKS:

- Adjust handbrake cable (para 4-32).

TA505265

4-30. HANDBRAKE CABLE REPLACEMENT (ALL EXCEPT M107A1).

This Task Covers:

- | | |
|------------|-----------------|
| a. Removal | b. Installation |
|------------|-----------------|
-

Initial Setup:

Equipment Conditions:

- Hub and brakedrum removed (para 4-49).

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- One cotter pin
 - Two lockwashers
-

a. REMOVAL

WARNING

If trailer is not coupled to towing vehicle, ensure that wheels are securely chocked. Failure to do so may cause trailer to roll, resulting in injury to personnel or damage to equipment.

1. Disconnect handbrake cable (3) from brake lever (2).

NOTE

Step 2 applies only to M103A1.

2. Loosen two bolts (5) from bracket (4) and backing plate (1).

NOTE

Step 3 applies only to M103A3.

3. Loosen two nuts (6) from guide bracket (7) and backing plate (1).
4. Pull handbrake cable (3) out from backing plate (1).

TA505266

4-30. HANDBRAKE CABLE REPLACEMENT (ALL EXCEPT M107A1) (Con't).

5. Loosen two nuts (11) on turnbuckle (12). Remove cotter pin (1 O), flatwasher (9), and clevis pin (20), and disconnect clevis (19) from handbrake lever (8). Discard cotter pin.
6. Remove two nuts (15), lockwashers (16), bolts (13), bracket (14), and handbrake cable (3) from crossmember (17), Discard lockwashers.
7. Remove turnbuckle (12) and two nuts (11) from handbrake cable (3) and rod (18).

b. INSTALLATION

1. Loosely install turnbuckle (12) and two nuts (11) on handbrake cable (3) and rod (18).
2. Position handbrake cable (3) on trailer. Install handbrake cable and bracket (14) on crossmember (17) with two bolts (13), new lockwashers (16), and nuts (15).
3. Connect clevis (19) to handbrake lever (8) with clevis pin (20), flatwasher (9), and new cotter pin (10).
4. Insert handbrake cable (3) in backing plate (1).

NOTE

Step S applies only to M103A3.

5. Tighten two nuts (6) at guide bracket (7) and backing plate (1).

TA505267

4-30. HANDBRAKE CABLE REPLACEMENT (ALL EXCEPT M107A1) (Con't).

NOTE

Step 6 applies only to M103A1.

6. Tighten two bolts (5) at bracket (4) and backing plate (1).
7. Connect handbrake cable (3) to brake lever (2).

FOLLOW-ON TASKS:

- Install hub and brakedrum (para 4-49).
- Adjust handbrake cable (para 4-32).

4-31. HANDBRAKE CABLE REPLACEMENT (M107A1).

This Task Covers:

- a. Removal b. Installation
-

Initial Setup:

Equipment Conditions:

- Hub and brakedrum removed (para 4-48).

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- One cotter pin
 - Two lockwashers
-

a. REMOVAL

WARNING

if trailer is not coupled to towing vehicle, ensure that wheels are securely chocked. Failure to do so may cause trailer to roll, resulting in injury to personnel or damage to equipment.

NOTE

Both handbrake cables (2) are removed the same way. This procedure covers one handbrake cable.

1. Disconnect handbrake cable (2) from brake lever (1).
2. Loosen two bolts (4) from bracket (3) and backing plate (5).

TA505269

4-31. HANDBRAKE CABLE REPLACEMENT (M107A1) (Con't).

3. Remove screw (15) and clip (16) from siderail (8).
4. Remove cotter pin (11) and clevis pin (10), and disconnect clevis (9) from handbrake lever (12). Discard cotter pin.
5. Remove two nuts (6), lockwashers (7), bolts (13), bracket (14), and handbrake cable (2) from siderail (8). Discard lockwashers.

b. INSTALLATION

NOTE

Both handbrake cables (2) are installed the same way. This procedure covers one handbrake cable.

1. Position handbrake cable (2) on trailer, Install handbrake cable and bracket (14) on siderail (8) with two bolts (13), new lockwashers (7), and nuts (6).
2. Connect clevis (9) to handbrake lever (12) with clevis pin (10) and new cotter pin (11),
3. Install clip (16) on siderail (8) with screw (15).

4-31. HANDBRAKE CABLE REPLACEMENT (M107A1) (Con't).

4. Position handbrake cable (2) and bracket (3) on backing plate (5) and tighten two bolts (4).
5. Connect handbrake cable (2) to brake lever (1).

**FOLLOW-ON TASKS:**

- Install hub and brakedrum (para 4-48),
- Adjust handbrake cable (para 4-32).

4-32. HANDBRAKE CABLE ADJUSTMENT.

This Task Covers:

- a. Adjustment (All Except M107A1) b. Adjustment (M107A1)
-

Initial Setup:

Equipment Conditions:

- Brakes adjusted (para 4-33 or 4-34).

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- One cotter pin
-

a. ADJUSTMENT (ALL EXCEPT M107A1)

NOTE

When handbrake cable (4) is properly adjusted, handbrake lever (1) should only require 1/3 of its full travel to apply handbrake.

1. Release handbrake lever (1).
2. If tightened, loosen two nuts (2) on turnbuckle (3). Do not allow handbrake cable (4) to twist.
3. Rotate turnbuckle (3) as required to eliminate excess slack or tension.
4. Tighten two nuts (2) on turnbuckle (3). Do not allow handbrake cable (4) to twist.
5. Check handbrake lever (1) and handbrake cable (4) for proper operation. Adjust as required,

b. ADJUSTMENT (M107A1)

NOTE

When handbrake cable (5) is properly adjusted, handbrake lever (9) should only require 1/3 of its full travel to apply handbrake.

1. Release handbrake lever (9).
2. Loosen nut (6). Remove cotter pin (10) and clevis pin (8), and disconnect clevis (7) from handbrake lever (9). Discard cotter pin.
3. Turn clevis (7) clockwise to tighten or counterclockwise to loosen handbrake cable (5).
4. Tighten nut (6) on handbrake cable (5) and clevis (7).
5. Connect clevis (7) to handbrake lever (9) with clevis pin (8) and new cotter pin (10).
6. Check handbrake lever (9) and handbrake cable (5) for proper operation. Adjust as required.

4-32. HANDBRAKE CABLE ADJUSTMENT (Con't).

4-33. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A1, M105A1, AND M107A1).

This Task Covers:

- | | |
|----------------------------|---------------------|
| a. Disassembly | d. Major Adjustment |
| b. Cleaning and Inspection | e. Minor Adjustment |
| c. Assembly | |
-

Initial Setup:

Equipment Conditions:

- Hub and brakedrum removed (para 4-48).
- Axle hydraulic lines disconnected from backing plate, if removing backing plate (para 4-37)

Tools/Test Equipment:

- General mechanic's tool kit
- Floor jack
- Jackstand

Materials/Parts:

- Dry cleaning solvent (Item 6, Appendix E)
 - Two cotter pins
 - Fifteen lockwashers
-

a. DISASSEMBLY

WARNING

DO NOT handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned. There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death to personnel.

NOTE

if replacing brakeshoes (10 and 23) only, perform steps 1 through 7.

1. Disconnect handbrake cable (15) from brake lever (11).
2. Remove cotter pin (14), nut (13), flatwasher (12), shoulder bolt (9), and brake lever (11) from brakeshoe (10). Discard cotter pin.
3. Remove cotter pin (16), nut (17), flatwasher (18), shoulder bolt (6), and strut (7) from brakeshoe (23). Discard cotter pin.
4. Remove return spring (8) from brakeshoes (10 and 23).
5. Remove two slotted washers (19) and flatwashers (20) from brakeshoes (10 and 23) and anchor pins (27).
6. Remove four lockpins (21) and flatwashers (22) from guide pins (2).
7. Remove brakeshoes (10 and 23) from backing plate (3).
8. Remove two flatwashers (24) and flatwashers (25) from anchor pins (27).
9. Remove four flatwashers (5) and springs (4) from guide pins (2).

4-33. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A1, M105A1, AND M107A1) (Con't).

10. Remove two nuts (29), lockwashers (28), and anchor pins (27) from backing plate (3). Discard lockwashers.
11. Remove 12 nuts (31), lockwashers (30), screws (26), and backing plate (3) from axle (1). Discard lockwashers.

4-33. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A1, M105A1, AND M107A1) (Con't).

b . CLEANING AND INSPECTION**WARNING**

- **DO NOT** handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned. There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death.
 - Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and **DO NOT** breathe vapors. **DO NOT** use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). if you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.
1. Clean all parts with dry cleaning solvent. Dry thoroughly.
 2. inspect all parts for damage. Replace any damaged parts.
 3. Inspect brakeshoe surfaces for cracks, distortion, and excessive wear. Brakeshoe linings should have a minimum thickness of 1/8 in. (3.2 mm). Replace brakeshoes if cracked or if lining thickness is less than 1/8 in. (3.2 mm).

c. ASSEMBLY**NOTE**

If replacing brakeshoes (10 and 23) only, perform steps 5 through 12.

1. Position backing plate (3) on axle (1) and install 12 screws (26), new lockwashers (30), and nuts (31).
2. Insert two anchor pins (27) in backing plate (3) and install two new lockwashers (28) and nuts (29).
3. Position four springs (4) and flatwashers (5) on guide pins (2).
- 4* Position two flatwashers (25) and flatwashers (24) on anchor pins (27).
5. Position two shoulder bolts (6 and 9) and brakeshoes (10 and 23) on backing plate (3).
6. Install four flatwashers (22) and lockpins (21) on guide pins (2).
7. Install two flatwashers (20) and slotted washers (19) on anchor pins (27).
8. Install return spring (8) on brakeshoes (10 and 23).
9. Position strut (7) on brakeshoe (23) and install flatwasher (18), nut (17), and new cotter pin (16).
10. Position brake lever (11) on brakeshoe (10), and aline with strut (7). Install flatwasher (12), nut (13), and new cotter pin (14).

4-33. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A1, M105A1, AND M107A1) (Con't).

11. Connect handbrake cable (15) to brake lever (11).
12. If disconnected, connect axle hydraulic lines to backing plate (para 4-37).
13. Install hub and brakedrum (para 4-48).

4-33. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A1, M105A1, AND M107A1) (Con't).

d. MAJOR ADJUSTMENT

NOTE

Perform this adjustment at each wheel when new brakeshoes are installed.

1. Remove nut (37), lockwasher (36), and cover (35) from brakedrum (33). Discard lockwasher.
2. Rotate brakedrum (33) until inspection hole (34) is 1½ in. (3.8 cm) from anchor pin (39) and adjacent to rear brakeshoe.
3. Loosen nut (38) on anchor pin (39).
4. Insert a 0.010 in. (.25 mm) feeler gage in inspection hole (34).
5. Adjust brakeshoe by turning anchor pin (39) on backing plate (3) until a slight drag is felt with feeler gage. Remove feeler gage.

6. Rotate brakedrum (33) until inspection hole (34) is 1½ in. (3.8 cm) from adjusting stud (32) and adjacent to rear brakeshoe.
7. Insert a 0.020 in. (.51 mm) feeler gage in inspection hole (34).
8. Adjust brakeshoe by turning adjusting studs (32) on backing plate (3) until a slight drag is felt with feeler gage. Remove feeler gage,
9. Tighten nut (38) on anchor pin (39).
10. Install cover (35), new lockwasher (36), and nut (37) over inspection hole (34) on brakedrum (33).

4-33. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A1, M105A1, AND M107A1) (Con't).

e. MINOR ADJUSTMENT**NOTE**

Perform this adjustment at each wheel to compensate for normal brakeshoe lining wear.

1. Raise axle (1) enough to allow wheel to spin freely. Support axle with suitable jackstand.
2. Adjust brakeshoes by turning two adjusting studs (32) on backing plate (3) until a slight drag is felt when wheel is spun.
3. Back off adjustment until wheel spins freely.
4. Remove jackstand and lower axle (1).

FOLLOW-ON TASKS:

- Bleed brakes, if axle hydraulic lines were disconnected from backing plate (para 4-39).
- Install wheel (para 3-8).

4-34. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C).

This Task Covers:

- | | |
|----------------------------|---------------|
| a. Disassembly | c. Assembly |
| b. Cleaning and Inspection | d. Adjustment |
-

Initial Setup:

Equipment Conditions:

- Hub and brakedrum removed (para 4-49).
- Axle hydraulic lines disconnected from backing plate, if removing backing plate (para 4-37).

Materials/Parts:

- Dry cleaning solvent (Item 6, Appendix E)
- Eighteen lockwashers

Tools/Test Equipment:

- General mechanic's tool kit
-

a. DISASSEMBLY

WARNING

DO NOT handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned. There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an Industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death.

NOTE

If replacing brakeshoes (8 and 18) only, perform steps 1 through 5.

1. Remove two springs (1) from pins (7, 19, 20, and 29).
2. Disconnect handbrake cable (17) from brake lever (5).
3. Remove two slotted washers (2), flatwashers (3), spring washers (4), brake lever (5), and link (6) from pins (7 and 20).
4. Remove screw (30), lockwasher (31), flatwasher (32), sleeve (33), and brakeshoe (8) from backing plate (12). Discard lockwasher.
5. Remove nut (24), lockwasher (23), flatwasher (22), sleeve (21), bolt (14), and brakeshoe (18) from backing plate (12). Discard lockwasher.
6. Remove 12 nuts (15), lockwashers (16), bolts (26), cable ramp (25), two supports (11), and backing plate (12) from axle (13). Discard lockwashers.
7. Remove brake adjusting screw (28) and slack adjusting wheel (27) from each support (11).
8. Remove four nuts (10) and lockwashers (9) from pins (7, 19, 20, and 29). Remove pins from brakeshoes (8 and 18). Discard lockwashers.

4-34. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C) (Con't).

b. CLEANING AND INSPECTION

WARNING

- DO NOT handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned, There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an Industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death.
- Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

1. Clean all parts with dry cleaning solvent. Dry thoroughly.
2. inspect all removed components for damage. Replace any damaged parts.

TA505276

4-34. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C) (Con't).

3. Inspect brakeshoe linings (34) for cracks. Brakeshoe linings should have a minimum thickness of $\frac{1}{8}$ in. (3.2 mm). Replace brakeshoes if cracked or if lining thickness is less than $\frac{1}{8}$ in. (3.2 mm).
4. Measure rivets (35) for $\frac{1}{16}$ in. (1.6 mm) depth below brakeshoe lining (34). Replace brakeshoe if depth of rivets is not at least $\frac{1}{16}$ in. (1.6 mm) below brakeshoe lining.

NOTE

If replacing brakeshoes (8 and 18) only, perform steps 4 through 9.

1. Install pins (7, 19, 20, and 29) on brakeshoes (8 and 18) with four new lockwashers (9) and nuts (10).
2. Install slack adjusting wheel (27) and brake adjusting screw (28) on each support (11).
3. Position backing plate (12), two supports (11), and cable ramp (25) on axle (13) and install 12 bolts (26), new lockwashers (16), and nuts (15),
4. Position brakeshoe (18) on backing plate (12) and install bolt (14), sleeve (21), flatwasher (22), new lockwasher (23), and nut (24).
5. Position brakeshoe (8) on backing plate (12) and install sleeve (33), flatwasher (32), new lockwasher (31), and screw (30).
6. Install link (6) on pin (20). install brake lever (5) on pin (7). Pin on brake lever must engage slot in link.
7. install two spring washers (4), flatwashers (3), and slotted washers (2) on pins (7 and 20).
8. Install two springs (1) on pins (7, 19, 20, and 29).
9. Connect handbrake cable (17) to brake lever (5).
10. if disconnected, connect axle hydraulic lines to backing plate (para 4-37).
11. install hub and brakedrum (para 4-49).

4-34. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C) (Con't).

4-34. SERVICE BRAKE ASSEMBLY MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C) (Con't).

d. ADJUSTMENT

NOTE

- To ensure an accurate adjustment this procedure must be performed when brakeshoe are cool.
- Perform this adjustment at each wheel to adjust brakes.

1. Turn upper brakeshoe adjusting bolt (36) counterclockwise until wheel locks, then back off enough to allow wheel to turn freely,
2. Repeat step 1 for lower brakeshoe adjusting bolt (37) .

FOLLOW-ON TASKS:

- Bleed brakes, if axle hydraulic lines were disconnected from backing plate (para 4-39),
- Install wheel (para 3-8).
- Adjust handbrake cable (para 4-32).

4-35. MASTER CYLINDER REPLACEMENT (ALL EXCEPT M105A2C).

This Task Covers:

a. Removal

b. Installation

Initial Setup:

Materials/Parts:

- Rags (Item 11, Appendix E)
- One gasket
- Six lockwashers

Tools/Test Equipment:

- General mechanic's tool kit
- Drain pan

a. REMOVAL

NOTE

A suitable container should be used to catch any draining brake fluid. Ensure that all spills are cleaned up.

1. Remove hose (12) and reducer (11) from master cylinder (15).
2. Remove three nuts (13), lockwashers (14), master cylinder (15), and airbrake chamber (1) from bracket (18). Discard lockwashers.
3. Remove boot (16) from master cylinder (15).
4. Loosen clamp (9) and remove hose (10) from vent tube (8).
5. Remove vent tube (8), filler cap (7), baffle (6), and gasket (5) from master cylinder (15). Discard gasket.
6. If bracket (18) is damaged, remove three nuts (4), lockwashers (3), screws (2), and bracket from crossmember (17). Discard lockwashers.

TA505280

4-35. MASTER CYLINDER REPLACEMENT (ALL EXCEPT M105A2C) (Con't).

b. INSTALLATION

1. If removed, install bracket (18) on crossmember (17) with three screws (2), new lockwashers (3), and nuts (4).
2. Install new gasket (5), baffle (6), filler cap (7), and vent tube (8) on master cylinder (15).
3. install hose (10) on vent tube (8) and tighten clamp (9).
4. Install boot (16) on master cylinder (15).
5. Position airbrake chamber (1) and master cylinder (15) on bracket (18) and install three new lockwashers (14) and nuts (13).
6. Install reducer (11) and hose (12) on master cylinder (15).

FOLLOW-ON TASKS:

- Bleed brakes (para 4-39).

4-36. WHEEL CYLINDER REPLACEMENT (ALL EXCEPT M105A2C).

This Task Covers:

- a. Removal b. Installation

Initial Setup:

Equipment Conditions:

- Service brakes disassembled (para 4-33 or 4-34).
- General mechanic's tool kit
- Drain part

Materials/Parts:

- Rags (Item 11, Appendix E)

a. REMOVAL

NOTE

- Chassis model M103A1 has only one wheel cylinder for each service brake assembly. Chassis model M103A3 has two wheel cylinders for each service brake assembly. This procedure is typical for all models.
- A suitable container should be used to catch any draining brake fluid. Ensure that all spills are cleaned up.

1. Remove bolt (1), flatwasher (2), and spacer (4) from connector (3) and wheel cylinder (5).
2. Remove two screws (8), wheel cylinder (5), and shield (6) from backing plate (7).

b. INSTALLATION

1. Position shield (6) and wheel cylinder (5) on backing plate (7) and install two screws (8).
2. Install spacer (4), flatwasher (2), and bolt (1) on connector (3) and wheel cylinder (5).

FOLLOW-ON TASKS:

- Assemble service brakes (para 4-33 or 4-34).
- Bleed brakes (para 4-39).

TA505282

4-37. HYDRAULIC LINES, HOSES, AND FITTINGS REPLACEMENT.

This Task Covers:

- a. Hose Replacement
- b. Axle Lines and Axle Tee Replacement
- c. Backing Plate Line Replacement
- d. Hydraulic Tank Tube Assembly Replacement (M105A2C)

Initial Setup:

Materials/Parts:

- Rags (item 11, Appendix E)
- One lockwasher
- One connector

Tools/Test Equipment:

- General mechanic's tool kit
- Drain pan

a. HOSE REPLACEMENT

NOTE

A suitable container should be used to catch any draining brake fluid. Ensure that all spills are cleaned up.

1. Remove hose (3) from reducer (2) and connector (7).
2. Install new hose (3) on connector (7) and reducer (2).

TA505283

4-37. HYDRAULIC LINES, HOSES, AND FITTINGS REPLACEMENT (Con't).

b. AXLE LINES AND AXLE TEE REPLACEMENT

NOTE

- A suitable container should be used to catch any draining brake fluid. Ensure that all spills are cleaned up.
- This procedure covers right and left axle lines (4).

1. Remove two axle lines (4) from connectors (5 and 7) and axle clips (6).
2. If connected, disconnect hose (3) from connector (7).
3. Remove nut (8), lockwasher (9), and connector (7) from axle (1). Discard lockwasher and connector.
4. Install new connector (7) to axle (1) with new lockwasher (9) and nut (8), Connect hose (3) to connector.

NOTE

Instructions for manufacturing axle lines (4) can be found in Appendix G.

5. Install new axle lines (4) on axle clips (6) and connectors (5 and 7).

c. BACKING PLATE LINE REPLACEMENT

NOTE

- A suitable container should be used to catch any draining brake fluid, Ensure that all spills are cleaned up.
- This procedure covers right and left sides of trailer.

1. Remove backing plate lines (11 and 12) from connectors (10 and 5),
2. Install new backing plate lines (11 and 12) on connectors (10 and 5).

4-37. HYDRAULIC LINES, HOSES, AND FITTINGS REPLACEMENT (Con't).

d. HYDRAULIC TANK TUBE ASSEMBLY REPLACEMENT (M105A2C)

NOTE

A suitable container should be used to catch any draining brake fluid. Ensure that all spills are cleaned up.

1. Remove screw (17) and clamp (16) from tube assembly (14) and framerail (15).
2. Remove tube assembly (14) from master cylinder (18) and hydraulic tank (13).
3. Install new tube assembly (14) on hydraulic tank (13) and master cylinder (18).
4. Secure tube assembly (14) to framerail (15) with clamp (16) and screw (17).

FOLLOW-ON TASKS:

- Bleed brakes (para 4-39).

4-38. HYDRAULIC TANK MAINTENANCE (M105A2C).

This Task Covers:

- | | |
|--------------|-----------------|
| a. Servicing | c. Installation |
| b. Removal | |
-

Initial Setup:

Tools/Test Equipment:

- General mechanic's tool kit
- Drain pan

Materials/Parts:

- Brake fluid (Item 2, Appendix E)
 - Rags (Item 11, Appendix E)
 - Four lockwashers
-

a. SERVICING

1. Remove cap (2) from hydraulic tank (3).
2. Add brake fluid, as required, to within ½ in. (13 mm) from top of hydraulic tank (3).
3. Install cap (2) on hydraulic tank (3).

b. REMOVAL

NOTE

A suitable container should be used to catch any draining brake fluid. Ensure that all spills are cleaned up.

1. Disconnect tube assembly (8) from hydraulic tank (3). Disconnect tube assembly (1) from cap (2).
2. Remove four nuts (5), lockwashers (6), screws (7), and hydraulic tank (3) from bracket (4). Discard lockwashers.

TA505286

4-38. HYDRAULIC TANK MAINTENANCE (M105A2C) (Con't).

c. INSTALLATION

1. Install hydraulic tank (3) on bracket (4) with four screws (7), new lockwashers (6), and nuts (5).
2. Connect tube assembly (8) to hydraulic tank (3). Connect tube assembly (1) to cap (2).

FOLLOW-ON TASKS:

- Bleed brakes (para 4-39).

4-39. BLEEDING HYDRAULIC BRAKE SYSTEM.

This Task Covers: Manual Bleeding

Initial Setup:

Equipment Conditions:

- Master cylinder and hydraulic tank serviced (Chapter 3, Section 1)

Tools/Test Equipment:

- General mechanic's tool kit
- Quart container

Materials/Parts:

- Brake fluid (Item 2, Appendix E)
- Plastic tubing

Personnel Required: Two

MANUAL BLEEDING

NOTE

- Ensure that fluid level in hydraulic tank (if present) and master cylinder (3) is within $\frac{1}{2}$ in. (13 mm) from top at all times during task to avoid allowing air to enter hydraulic system.
 - Hydraulic brake system manual bleeding is the same for all models except for air/hydraulic. For M103A1 M103A3, M105A1, M107A1, M107A2, and M107A2C begin with step 5.
 - Plastic tubing (1) should be approximately 18 in. (46 cm) long.
1. Begin with bleeder valve furthest from master cylinder. Connect plastic tubing (1) to bleeder valve (2) on master cylinder (3).

TA506288

4-39. BLEEDING HYDRAULIC BRAKE SYSTEM (Con't).

NOTE

Ensure that end of plastic tubing (1) remains submerged in brake fluid for entire procedure.

2. Fill container (4) approximately halfway with brake fluid and place free end of plastic tubing (1) in container.
3. Have an assistant pump brake pedal slowly and smoothly. Open bleeder valve (2), allowing brake fluid to flow into container (4).
4. When brake fluid flow contains no air bubbles, close bleeder valve (2) and disconnect plastic tubing (1).

5. Connect plastic tubing (1) to bleeder valve (5) on backing plate (6).

NOTE

Ensure that end of plastic tubing (1) remains submerged in brake fluid for entire procedure.

6. Fill container (4) approximately halfway with brake fluid and place free end of plastic tubing (1) in container.
7. Have an assistant pump brake pedal slowly and smoothly. Open bleeder valve (5), allowing brake fluid to flow into container (4).
8. When brake fluid flow contains no air bubbles, close bleeder valve (5) and disconnect plastic tubing (1).

4-40. VACUUM CHAMBER AND MASTER CYLINDER REPLACEMENT (M105A2C).

This Task Covers:

a. Removal

b. Installation

Initial Setup:

Materials/Parts:

- Rags (Item 11, Appendix E)
- Eight lockwashers

Tools/Test Equipment:

- General mechanic's tool kit
- Drain pan

a. REMOVAL

1. Remove two clamps (21), vacuum hoses (1), and fittings (22) from cylinder (6).

NOTE

A suitable container should be used to catch any draining brake fluid. Ensure that all spills are cleaned up.

2. Remove bolt (7), flatwasher (8), connector (9), flatwasher (10), valve (11), and flatwasher (12) from cylinder (6).

TA505290

4-40. VACUUM CHAMBER AND MASTER CYLINDER REPLACEMENT (M105A2C) (Con't).

3. Remove bolt (23), flatwasher (24), connector (25), and flatwasher (26) from cylinder (6).
4. Remove nut (29) and lockwasher (28) from brace (27) and cylinder (6). Discard lockwasher.
5. Remove two nuts (3), lockwashers (4), screws (5), and brace (27) from crossmember (2). Discard lockwashers.
6. Remove two screws (19), lockwashers (18), cylinder (6), and spacer (20) from mounting bracket (14). Discard lockwashers.
7. Remove three nuts (17), lockwashers (16), screws (13), and mounting bracket (14) from crossmember (15). Discard lockwashers.

b. INSTALLATION

1. Install mounting bracket (14) on crossmember (15) with three screws (13), new lockwashers (16), and nuts (17).
2. Install spacer (20) and cylinder (6) on mounting bracket (14) with two new lockwashers (18) and screws (19).

TA505291

4-40. VACUUM CHAMBER AND MASTER CYLINDER REPLACEMENT (M105A2C) (Con't).

3. Position brace (27) on crossmember (2) and cylinder (6) and install two screws (5), new lockwashers (4), nuts (3), new lockwasher (28) and nut (29).
4. install flatwasher (26), connector (25), flatwasher (24), and bolt (23) on cylinder (6).
- 50 Install flatwasher (12) and valve (11) on cylinder (6).
6. Install flatwasher (10), connector (9), flatwasher (8), and bolt (7) on valve (11).
7. Install two fittings (22), vacuum hoses (1), and clamps (21) on cylinder (6).

FOLLOW-ON TASKS:

- Bleed brakes (para 4-39).

4-41. VACUUM QUICK COUPLING REPLACEMENT (M105A2C).

This Task Covers:

- a. Removal b. Installation
-

Initial Setup:

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- Two lockwashers
-

a. REMOVAL

1. Remove plug and chain (1) from dummy coupling (2).
2. Remove two nuts (5), lockwashers (4), screws (7), and dummy coupling (2) with bracket (3) from crossmember (6). Discard lockwashers.

3. Remove two screws (12) and clamps (11) from hose (10) and drawbar (15).
4. Remove two hose clamps (9), vacuum quick coupling (8), hose (10), and spring (14) from adapter (13).

4-41. VACUUM QUICK COUPLING REPLACEMENT (M105A2C).

b. INSTALLATION

1. Position spring (14), hose (10), and vacuum quick coupling (8) on adapter (13) and install two hose clamps (9).
2. Position two clamps (11) on hose (10) and drawbar (15) and install two screws (12).
3. Install dummy coupling (2) with bracket (3) on crossmember (6) with two screws (7), new lockwashers (4), and nuts (5),
4. Install plug and chain (1) in dummy coupling (2).

4-42. VACUUM LINES, HOSES, AND FITTINGS REPLACEMENT (M105A2C).

This Task Covers:

- a. Intervehicular Vacuum Hose Replacement
- b. Vacuum Line Replacement
- c. Coupling Replacement

Initial Setup:

Equipment Conditions:

- Vacuum quick coupling removed (para 4-41).

Tools/Test Equipment:

- General mechanic's tool kit
-

a. INTERVEHICULAR VACUUM HOSE REPLACEMENT

NOTE

Right and left side intervehicular vacuum hoses are (11) replaced the same way. This procedure covers one side.

1. Remove two screws (12) and clamps (13) from intervehicular vacuum hose (11) and drawbar (14).
2. Remove intervehicular vacuum hose (11) from coupling (10).

NOTE

Instructions for manufacturing intervehicular vacuum hose (11) are found in Appendix G.

3. Install new intervehicular vacuum hose (11) on coupling (10).
4. Install intervehicular vacuum hose (11) to drawbar (14) with two clamps (13) and screws (12).

b. VACUUM LINE REPLACEMENT

NOTE

Right and left side vacuum lines (2) are replaced the same way except right vacuum line has three clamps (6) and left vacuum line has four clamps.

1. Remove three screws (5) and clamps (6) from vacuum line (2) and framerail (1).
2. Remove vacuum line (2) from coupling (10).
3. Loosen clamp (3) and remove vacuum line (2) from hose (4).

NOTE

Instructions for manufacturing vacuum line (2) are found in Appendix G.

4. Install new vacuum line (2) on hose (4) and tighten clamp (3).
5. install vacuum line (2) on coupling (10).
6. Install vacuum line (2) to framerail (1) with three clamps (6) and screws (5).

4-42. VACUUM LINES, HOSES, AND FITTINGS REPLACEMENT (M105A2C) (Con't).

c. COUPLING REPLACEMENT

1. Remove intervehicular vacuum hose (11) and vacuum line (2) from coupling (10).
2. Remove nut (9), flatwasher (8), and coupling (10) from crossmember (7).
3. Install new coupling (10) through crossmember (7) and secure with flatwasher (8) and nut (9).
4. Install intervehicular vacuum hose (11) and vacuum line (2) on coupling (10).

FOLLOW-ON TASKS:

- Install vacuum quick coupling (para 4-41)

4-43. AIRBRAKE CHAMBER REPLACEMENT.

This Task Covers:

- a. Removal b. Installation
-

Initial Setup:

Materials/Parts:

- Three lockwashers

Tools/Test Equipment:

- General mechanic's tool kit
-

a. REMOVAL

1. Remove tube (2) and adapter (1) from airbrake chamber (7).

CAUTION

Master cylinder (3) must be supported when airbrake chamber (7) is removed. Damage to hydraulic brake line may result if master cylinder is not supported,

2. Remove three nuts (5), lockwashers (4), and airbrake chamber (7) from master cylinder (3) and bracket (6). Discard lockwashers.

b. Installation

1. Position airbrake chamber (7) on bracket (6). Install airbrake chamber to bracket and master cylinder (3) with three new lockwashers (4) and nuts (5),
2. Install adapter (1) and tube (2) on airbrake chamber (7),

TA505295

4-44. AIR RESERVOIR REPLACEMENT.

This Task Covers:

a. Removal

b. Installation

Initial Setup:

Equipment Conditions:

- Emergency relay valve removed (para 4-47).

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- Antiseize tape (Item 17, Appendix E)
 - Four lockwashers
-

a. REMOVAL

1. Remove nipple (4), pipe plug (6), and draincock (5) from air reservoir (7).
2. Remove four nuts (1), lockwashers (2), two U-bolts (3), and air reservoir (7) from mount (8). Discard lockwashers.

b. INSTALLATION

1. Install air reservoir (7) on mount (8) with two U-bolts (3), four new lockwashers (2), and nuts (1).
2. Apply antiseize tape to draincock (5), pipe plug (6), and nipple (4) and install on air reservoir (7).

FOLLOW-ON TASKS:

- Install emergency relay valve (para 4-47).

4-45. AIR FILTER MAINTENANCE.

This Task Covers:

- | | |
|----------------------------|-----------------|
| a. Removal | d. Assembly |
| b. Disassembly | e. Installation |
| c. Cleaning and Inspection | |
-

Initial Setup:

Materials/Parts:

- Dry cleaning solvent (Item 6, Appendix E)
- One filter element
- One gasket
- Two lockwashers

Tools/Test Equipment:

- General mechanic's tool kit
-

a. REMOVAL

1. Disconnect two tubes (2) from air filter (3).
2. Remove two nuts (4), lockwashers (5), U-bolt (1), and air filter (3) from crossmember (6). Discard lockwashers.

b. DISASSEMBLY

Remove plug (8), adapter (9), gasket (10), spring (11), spring washer (12), and filter element (13) from body (7). Discard gasket and filter element.

4-45. AIR FILTER MAINTENANCE (Con't).

c. CLEANING AND INSPECTION

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

1. Clean all components with dry cleaning solvent and dry thoroughly.
2. Replace any damaged components.

d. ASSEMBLY

Install new filter element (13), spring washer (12), spring (11), new gasket (10), adapter (9), and plug (8) in body (7).

e. INSTALLATION

1. install air filter (3) on crossmember (6) with U-bolt (1), two new lockwashers (5), and nuts (4).
2. Connect two tubes (2) to air filter (3).

4-46. AIR COUPLING AND HOSE ASSEMBLY MAINTENANCE.

This Task Covers:

- | | |
|---|-------------------------------|
| a. Air Coupling Preformed Packing Replacement | c. Hose Assembly Installation |
| b. Hose Assembly Removal | |

Initial Setup:

Materials/Parts:

- One preformed packing

Tools/Test Equipment:

- General mechanic's tool kit

a. AIR COUPLING PREFORMED PACKING REPLACEMENT

1. Remove dummy coupling (1) from air coupling (9). Remove preformed packing (10) from air coupling and discard.
2. Install new preformed packing (10) inside air coupling (9). Install dummy coupling (1) on air coupling.

b. HOSE ASSEMBLY REMOVAL

1. Remove two screws (8) and clamps (7) from hose assembly (2) and drawbar (6).
2. Loosen nut (5) and slide back on hose assembly (2).
3. Remove hose assembly (2) and sleeve (3) from straight adapter (4).

c. HOSE ASSEMBLY INSTALLATION

1. Install hose assembly (2) and sleeve (3) on straight adapter (4).
2. Tighten nut (5) on hose assembly (2).
3. Position two clamps (7) on hose assembly (2) and drawbar (6) and install two screws (8).

TA505299

4-47. EMERGENCY RELAY VALVE REPLACEMENT.

This Task Covers:

- a. Removal b. Installation
-

Initial Setup:

Materials/Parts:

- Marker tags (Item 16, Appendix E)
- Antiseize tape (Item 17, Appendix E)

Tools/Test Equipment:

- General mechanic's tool kit
-

WARNING

Wear safety goggles to prevent eye injury when opening air reservoir draincock (2).
Step away from airstream to prevent injuries.

1. Open draincock (2) on air reservoir (3), and allow all air pressure to release. Close draincock.

NOTE

To ensure proper installation, air lines (5) should be tagged.

2. Remove three air lines (5) and two elbows (6) from emergency relay valve (1).
3. Turn emergency relay valve (1) counterclockwise and remove from nipple (4).

b. INSTALLATION

1. Apply antiseize tape to threads of nipple (4), Turn emergency relay valve (1) clockwise to install on nipple.
2. Apply antiseize tape to threads of two elbows (6). Install elbows and three air lines (5) on emergency relay valve (1).

TA505300

Section VIII, WHEELS, HUBS, AND BRAKEDRUMS MAINTENANCE

Paragraph Title	Page Number
Hub, Wheel Bearing, and Brakedrum Maintenance (M103A1, M105A1, and M107A1)	4-76
Hub, Wheel Bearing, and Brakedrum Maintenance (M103A3, M105A2, M105A2C, M107A2, and M107A2C)	4-81
Tire and Tube Maintenance	4-85

4-48. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A1 , M105A1 , AND M107A1).

This Task Covers:

- | | |
|---|--|
| <ul style="list-style-type: none"> a. Removal b. Disassembly c. Assembly | <ul style="list-style-type: none"> d. Installation e. Wheel Bearing Adjustment |
|---|--|
-

Initial Setup:

Equipment Conditions:

- Wheel removed (para 3-8).

Tools/Test Equipment:

- General mechanic's tool kit
- Floor jack
- Jackstand
- Wheel bearing socket, ¾ in. drive, 3 in.

Materials/Parts:

- Dry cleaning solvent (item 6, Appendix E)
- Grease (item 7, Appendix E)
- One gasket
- One oil seal
- Sixteen lockwashers

References:

- TM 9-214
-

a. REMOVAL

1. Position jackstand under axle (9) and remove floor jack.
2. Remove eight screws (1), lockwashers (2), hubcap (3), and gasket (4) from hub (13). Discard lockwashers and gasket.
3. Remove outer adjusting nut (5), keyed washer (6), and inner adjusting nut (7) from hub (13) and axle (9).
4. Pull hub (13) out slightly on axle (9) to loosen outer wheel bearing cone (8). Remove outer wheel bearing cone from hub and axle.

4-48. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A1, M105A1, AND M107A1) (Con't).

WARNING

DO NOT handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned. There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death.

5. Remove hub (13) and brakedrum (12) from axle (9).
6. Tap inner wheel bearing cone (11) and oil seal (10) out of hub (13). Discard oil seal.

4-48. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A1, M105A1, AND M107A1) (Con't).

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

NOTE

If outer and inner wheel bearing cones (8 and 11) need replacing, bearing cups (14) must also be replaced (subpara b).

7. Clean and inspect outer and inner wheel bearing cones (8 and 11) in accordance with TM 9-214. Discard if damaged.

b. DISASSEMBLY**WARNING**

DO NOT handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned, There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death.

1. Remove eight screws (20) and lockwashers (21). Remove adapter (22) and brakedrum (12) assembly from hub (13). Discard lockwashers.
2. Remove ten nuts (15), flatwashers (16), inspection cover (17), screws (18), adapter (22), and deflector (19) from brakedrum (12).

NOTE

Perform step 3 only if bearing cups (14) are being replaced, Bearing cups should always be replaced when outer and inner wheel bearing cones (8 and 11) are replaced.

3. Remove two bearing cups (14) from hub (13).
4. If damaged, remove six wheel bolts (23) from hub (13).

c. ASSEMBLY

1. If removed, install six wheel bolts (23) in hub (13).
2. If removed, tap two bearing cups (14) into position in hub (13).
3. Position deflector (19) and adapter (22) on brakedrum (12) and install ten screws (18), inspection cover (17), ten flatwashers (16), and nuts (15).
4. Position adapter (22) and brakedrum (12) assembly on hub (13) and install eight new lockwashers (21) and screws (20).

4-48. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A1, M105A1, AND M107A1) (Con't).

NOTE

Instructions on packing outer and inner wheel bearing cones (8 and 11) can be found in TM 9-214.

5. Pack inner wheel bearing cone (11) with grease, position in hub (13), and install new oil seal (10).

d. INSTALLATION

1. Position brakedrum (12) and hub (13) on axle (9).
2. Pack outer wheel bearing cone (8) with grease. Position outer wheel bearing cone on hub (13) and axle (9), and install inner adjusting nut (7).

e. WHEEL BEARING ADJUSTMENT

1. Tighten inner adjusting nut (7) while turning hub (13) and brakedrum (12) until drag is felt.
2. Rotate hub (13) and brakedrum (12) one full turn and loosen inner adjusting nut (7) while rocking hub back and forth until looseness is felt.
3. Tighten inner adjusting nut (7) until looseness is no longer felt.

TA505302

4-48. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A1, M105A1, AND M107A1) (Con't).

4. Install keyed washer (6) and outer adjusting nut (5) on axle (9). Bend one tab of keyed washer over flat of outer adjusting nut.
5. Install new gasket (4) and hubcap (3) on hub (13) with eight new lockwashers (2) and screws (1).
6. Position floor jack under axle (9) and raise enough to remove jackstand.

FOLLOW-ON TASKS:

- Adjust brakes (para 4-33).
- install wheel (para 3-8).

4-49. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C).

This Task Covers:

- | | |
|----------------|-----------------------------|
| a. Removal | d. Installation |
| b. Disassembly | e. Wheel Bearing Adjustment |
| c. Assembly | |
-

*Initial Setup:***Equipment Conditions:**

- Wheel removed (para 3-8).

Tools/Test Equipment:

- General mechanic's tool kit
- Floor jack
- Jackstand
- Socket, wheel bearing, $\frac{3}{4}$ in. drive, **3 $\frac{1}{2}$** in.

Materials/Parts:

- Dry cleaning solvent (item 6, Appendix E)
- Grease (item 7, Appendix E)
- One gasket
- One oil seal
- Three lockwashers

References:

- TM 9-214
-

4-49. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C) (Con't).

a. REMOVAL

1. Position jackstand under axle (16) and remove floor jack,
2. Remove three screws (1), lockwashers (2), hubcap (3), and gasket (4) from hub (10). Discard lockwashers and gasket,
3. Remove outer adjusting nut (5), keyed washer (6), and inner adjusting nut (7) from hub (10) and axle (16).
4. Pull hub (10) out slightly on axle (16) to loosen outer wheel bearing cone (8). Remove outer wheel bearing cone from hub and axle.

WARNING

DO NOT handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned. There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death.

5. Remove hub (10) and brakedrum (12) from axle (16).
6. Tap inner wheel bearing cone (21), oil seal (20), and spacer sleeve (17) out of hub (10) or axle (16). Discard oil seal.

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and **DO NOT** breathe vapors. **DO NOT** use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

NOTE

If outer and inner wheel bearing cones (8 and 21) need replacing, bearing cups (9) must also be replaced (subpara b).

7. Clean and inspect outer and inner wheel bearing cones (8 and 21) in accordance with TM 9-214. Discard if damaged.

4-49. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C) (Con't).

b. DISASSEMBLY

WARNING

DO NOT handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned. There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death.

1. Remove six nuts (11) and bolts (22) and remove adapter plate (19) and brakedrum (12) from hub (10).
2. Remove 18 nuts (14), flatwashers (13), bolts (18), and adapter plate (19) from brakedrum (12).

4-49. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C) (Con't).

NOTE

Perform step 3 only if bearing cups (9) are being replaced. Bearing cups should always be replaced when outer and inner wheel bearing cones (8 and 21) are replaced.

3. Tap two bearing cups (9) out of hub (10).
4. If damaged, remove six wheel bolts (15) from hub (10).

c. ASSEMBLY

1. If removed, install six wheel bolts (15) in hub (10).
2. If removed, tap two bearing cups (9) into hub (10).
3. Position adapter plate (19) on brakedrum (12), and install 18 bolts (18), flatwashers (13), and nuts (14),
4. Position adapter plate (19) and brakedrum (12) on hub (10) and install six bolts (22) and nuts (11).

NOTE

- Instructions for packing outer and inner wheel bearing cones (8 and 21) are found in TM 9-214.
- When installing spacer sleeve (17), ensure that flange faces inside of trailer,

5. Pack inner wheel bearing cone (21) with grease, Install inner wheel bearing cone, new oil seal (20), and spacer sleeve (17) on hub (10).

d. INSTALLATION

1. Install hub (10) and brakedrum (12) on axle (16).
2. Pack outer wheel bearing cone (8) with grease, Install outer wheel bearing cone and Inner adjusting nut (7) on hub (10) and axle (16).

e. WHEEL BEARING ADJUSTMENT

1. Tighten inner adjusting nut (7) while turning hub (10) and brakedrum (12) until drag is felt.
2. Rotate hub (10) and brakedrum (12) one full turn. Loosen inner adjusting nut (7) while rocking hub back and forth until looseness is felt.
3. Tighten inner adjusting nut (7) slowly while rocking hub (10) until looseness is no longer felt.
4. Install keyed washer (6) and outer adjusting nut (5) on axle (16). Bend tabs of keyed washer over flat of outer adjusting nut.
5. Install new gasket (4) and hubcap (3) on hub (10) with three new lockwashers (2) and screws (1).
6. Position floor jack under axle (16) and raise enough to remove jackstand.

4-49. HUB, WHEEL BEARING, AND BRAKEDRUM MAINTENANCE (M103A3, M105A2, M105A2C, M107A2, AND M107A2C) (Con't).

FOLLOW-ON TASKS:

- Adjust brakes (para 4-34).
- Install wheel (para 3-8).

4-50. TIRE AND TUBE MAINTENANCE.

Refer to TM 9-2610-200-24 for instructions on tire and tube maintenance.

TA505305

Section IX. FRAME AND TOWING ATTACHMENTS MAINTENANCE

Paragraph Title	Page Number
Adjustable Caster Assembly Maintenance	4-90
Drawbar Ring Replacement	4-96
Leveling Jack Maintenance (M448)	4-93
Rear Support Leg Replacement (M105 Series)	4-88
Safety Chain Replacement	4-87

4-51. DRAWBAR RING REPLACEMENT.

This Task Covers:

- | | |
|------------|-----------------|
| a. Removal | b. Installation |
|------------|-----------------|

Initial Setup:

Materials/Parts:

- One cotter pin

Tools/Test Equipment:

- General mechanic's tool kit

a. REMOVAL

1. Remove cotter pin (1) from nut (2). Discard cotter pin.
2. Remove nut (2), flatwasher (3), and drawbar ring (5) from drawbar coupler (4).

b. INSTALLATION

NOTE

Drawbar ring (5) is adjustable.

1. Place drawbar ring (5) in high or low position on drawbar coupler (4).
2. Install flatwasher (3) and nut (2) on drawbar ring (5).
3. install new cotter pin (1) on nut (2).

4-52. SAFETY CHAIN REPLACEMENT.

This Task Covers:

a. Removal

b. Installation

Initial Setup:

Materials/Parts:

- One lockwasher

Tools/Test Equipment:

- General mechanic's tool kit
-

a. REMOVAL

1. Unhook safety chain (3) from stowage hook (5).
2. Remove nut (1), lockwasher (2), and safety chain (3) from drawbar coupler (4). Discard lockwasher.

b. INSTALLATION

1. Install safety chain (3) through drawbar coupler (4) with new lockwasher (2) and nut (1).
2. Hook safety chain (3) on stowage hook (5).

4-53. REAR SUPPORT LEG REPLACEMENT (M105 SERIES).

This Task Covers:

- | | |
|----------------------------|-----------------|
| a. Removal | c. Installation |
| b. Cleaning and Inspection | |

Initial Setup:

Materials/Parts:

- Dry cleaning solvent (Item 6, Appendix E)
- Grease (Item 7, Appendix E)
- One cotter pin
- Four lockwashers

Tools/Test Equipment:

- General mechanic's tool kit

a. REMOVAL

1. Remove cotter pin (9), pin (8), and spring (10) from rear support leg (7). Discard cotter pin.
2. Remove nut (5), screw (12), and rear support leg (7) from bracket (11). Remove grease fitting (6).
3. Remove two nuts (15), lockwashers (14), screws (13), and bracket (11) from frame (3). Discard lockwashers.
4. Remove two nuts (1), lockwashers (2), screws (4), and bracket (16) from frame (3). Discard lockwashers.

TA505308

4-53. REAR SUPPORT LEG REPLACEMENT (M105 SERIES) (Con't).

b. CLEANING AND INSPECTION

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

1. Clean all parts with dry cleaning solvent. Dry thoroughly.
2. Inspect all parts for damage. Replace any damaged parts.

c. INSTALLATION

1. Install bracket (16) to frame (3) with two screws (4), new lockwashers (2), and nuts (1),
2. install bracket (11) to frame (3) with two screws (13), new lockwashers (14), and nuts (15).
3. Install rear support leg (7) to bracket (11) with screw (12) and nut (5). Install grease fitting (6).
4. Install spring (10), pin (8), and new cotter pin (9) in rear support leg (7).
5. Lubricate rear support leg (7) at grease fitting (6) (Chapter 3, Section 1).

4-54. ADJUSTABLE CASTER ASSEMBLY MAINTENANCE.

This Task Covers:

- | | |
|----------------------------|-----------------|
| a. Removal | d. Assembly |
| b. Disassembly | e. Installation |
| c. Cleaning and Inspection | |

Initial Setup:

Materials/Parts:

- Dry cleaning solvent (Item 6, Appendix E)
- Two cotter pins
- Five lockwashers

Tools/Test Equipment:

- General mechanic's tool kit
- Floor jack
- Two jackstands

a. REMOVAL

1. Raise front of trailer and position two jackstands under chassis (8).
2. Remove nut (1), lockwasher (2), and bolt (4) from yoke (10) and frame (3). Discard lockwasher.
3. Remove adjustable caster assembly (9) from frame (3).

b. DISASSEMBLY

1. Remove two pins (6), release handle (7), and spring (5) from adjustable caster assembly (9).
2. Remove four bolts (22), lockwashers (21), and landing leg (11) from yoke (10). Discard lockwashers.
3. Remove nut (16), bolt (14) and handle (15) from handcrank (13).
4. Remove nut (17), bolt (12), and handcrank (13) from landing leg (11).
5. Remove two cotter pins (18), wheels (19), and axle (20) from landing leg (11). Discard cotter pins.

TA505309

4-54. ADJUSTABLE CASTER ASSEMBLY MAINTENANCE (Con't).

c. CLEANING AND INSPECTION

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and **DO NOT** breathe vapors. **DO NOT** use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

1. Clean all parts in dry cleaning solvent. Dry thoroughly.
2. Inspect all parts for damage. Replace any damaged parts.

d. ASSEMBLY

1. Position axle (20) and two wheels (19) on landing leg (11) and install two new cotter pins (18).
2. Install handcrank (13) to landing leg (11) with bolt (12) and nut (17).
3. Install handle (15) to handcrank (13) with bolt (14) and nut (16).
4. Install landing leg (11) to yoke (10) with four new lockwashers (21) and bolts (22).
5. Position spring (5) and release handle (7) on adjustable caster assembly (9) and install two pins (6).

TA505310

4-54. ADJUSTABLE CASTER ASSEMBLY MAINTENANCE (Con't).

e. INSTALLATION

1. Position adjustable caster assembly (9) and yoke (10) at frame (3) and install bolt (4), new lockwasher (2), and nut (1).
2. Remove two jackstands from under chassis (8) and lower front of trailer to ground.

TA505311

4-55. LEVELING JACK MAINTENANCE (M448).

This Task Covers:

- | | |
|----------------------------|-------------|
| a. Disassembly | c. Assembly |
| b. Cleaning and Inspection | |
-

Initial Setup:

Materials/Parts:

- Dry cleaning solvent (Item 6, Appendix E)

Tools/Test Equipment:

- General mechanic's tool kit
 - Common No. 1 shop set
 - Retaining ring pliers
-

a. **DISASSEMBLY**

1. Remove nut (4) from handle (1) and housing (14).
2. Remove flatwasher (5), sleeve (6), two pins (9), ratchet pawls (7), and springs (8). Remove handle (1), spring (2), and ball bearing (3) from housing (14).
3. Remove housing (14) from tube assembly (13).
4. Remove retaining ring (12), ratchet wheel (11), and screw (10) from housing (14).

TA505312

4-55. LEVELING JACK MAINTENANCE (M448) (Con't).

b. CLEANING AND INSPECTION

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help, if solvent contacts eyes, immediately wash your eyes and get medical aid.

1. Clean all parts with dry cleaning solvent. Dry thoroughly.
2. Inspect all parts for damage. Replace any damaged parts.

c. ASSEMBLY

1. Position ratchet wheel (11) and screw (10) on housing (14) and install retaining ring (12).
2. Position housing (14) on tube assembly (13).
3. Position handle (1), spring (2), ball bearing (3), two ratchet pawls (7), and springs (8) on housing (14), Install two pins (9).
4. Position sleeve (6) and flatwasher (5) on housing (14). Install nut (4).

TA505313

Section X. SPRINGS AND SHOCK ABSORBERS MAINTENANCE

Paragraph Title	Page Number
Spring Replacement	4-95
Spring Shackle Replacement..	4-98

4-56. SPRING REPLACEMENT.

This Task Covers:

- | | |
|--|---|
| <ul style="list-style-type: none"> a. Removal b. Cleaning and inspection | <ul style="list-style-type: none"> c. Installation |
|--|---|
-

Initial Setup:

Equipment Conditions:

- Wheel removed (para 3-8).

Tools/Test Equipment:

- General mechanic's tool kit
- Floor jack
- Jackstand

Materials/Parts:

- Dry cleaning solvent (Item 6, Appendix E)
- Three lockwashers

Personnel Required: Two

4-56. SPRING REPLACEMENT (Con't).

a. REMOVAL

NOTE

Right and left springs (13) are removed the same way. This procedure covers one spring.

1. Position jackstand under rear crossmember (1) and lower axle (15) with floor jack enough to remove weight from spring (13).
2. Remove four nuts (4), two U-bolts (14), plates (3 and 16), and auxiliary spring (12) from spring (13).
3. Lower floor jack enough to give 1 in. (2.5 cm) clearance between spring (13) and axle (15).
4. Remove grease fitting (9), two nuts (11), lockwashers (10), and screws (7) from shackle (6). Discard lockwashers.
5. Tap pin (8) out of shackle (6) and disconnect spring (13).
6. Remove grease fitting (17), nut (19), lockwasher (20), and screw (21) from spring hanger (2). Discard lockwasher.
7. Tap pin (18) out of spring hanger (2). Remove spring (13),

b. CLEANING AND INSPECTION

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130°F (38°C-59°C). If you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

1. Clean all parts with dry cleaning solvent. Dry thoroughly.
2. Inspect all parts for damage. Replace all damaged parts.

c. INSTALLATION

NOTE

Right and left springs (13) are installed the same way. This procedure covers one spring.

1. Position spring (13) at spring hanger (2) and tap in pin (18), aligning groove for screw (21).
2. Install screw (21), new lockwasher (20), nut (19), and grease fitting (17) to spring hanger (2).
3. Position spring (13) in shackle (6) on spring hanger (5). Tap pin (8) in shackle.
4. Install two screws (7), new lockwashers (10), nuts (11), and grease fitting (9) in shackle (6).

4-56. SPRING REPLACEMENT (Con't).

5. Raise axle (15) with floor jack enough to align axle with spring (13).
6. Position plates (3 and 16) and auxiliary spring (12) on spring (13) and install two U-bolts (14) and four nuts (4).
7. Raise floor jack and remove jackstand from rear crossmember (1).

FOLLOW-ON TASKS:

- Lubricate spring shackle pins (Chapter 3, Section 1).
- Install wheel (para 3-8).

TA505314

4-57. SPRING SHACKLE REPLACEMENT.

This Task Covers:

- | | |
|----------------------------|-----------------|
| a. Removal | c. Installation |
| b. Cleaning and Inspection | |
-

Initial Setup:

Equipment Conditions:

- Wheel removed (para 3-8).

Tools/Test Equipment:

- General mechanic's tool kit
- Floor jack
- Jackstand

Materials/Parts:

- Dry cleaning solvent (Item 6, Appendix E)
- Three lockwashers

Personnel Required: Two

a. REMOVAL

NOTE

Right and left spring shackles (13) are removed the same way. This procedure covers one spring shackle.

1. Position jackstand under rear crossmember (1) and lower axle (15) with floor jack enough to remove weight from spring (10).
2. Remove grease fitting (8), two nuts (11), lockwashers (12), screws (7), and pin (9) from spring shackle (13). Discard lockwashers.
3. Remove grease fitting (6), nut (4), lockwasher (3), screw (14), and pin (5) from spring hanger (2). Discard lockwasher.
4. Remove spring shackle (13) from spring hanger (2).

b. CLEANING AND INSPECTION

WARNING

Dry cleaning solvent P-D-680 is toxic and flammable. Always wear protective goggles and gloves, and use only in a well-ventilated area. Avoid contact with skin, eyes, and clothes, and DO NOT breathe vapors. DO NOT use near open flame or excessive heat. The solvent's flash point is 100°F-130° (38°C-59°C). if you become dizzy while using cleaning solvent, immediately get fresh air and medical help. If solvent contacts eyes, immediately wash your eyes and get medical aid.

1. Use dry cleaning solvent to clean mud and dirt from all exposed parts, including spring bearings, shackle bearings, and shackle pins.
2. Inspect all removed parts for damage. Replace if damaged.

4-57. SPRING SHACKLE REPLACEMENT (Con't).

c. INSTALLATION
NOTE

Right and left spring shackles (13) are installed the same way. This procedure covers one spring shackle.

1. Position spring shackle (13) at spring hanger (2) and install pin (5) with groove aligned for screw (14). Install screw, new lockwasher (3), nut (4), and grease fitting (6).
2. Aline spring (10) with spring shackle (13) and install pin (9). Install two screws (7), new lockwashers (12), nuts (11), and grease fitting (8) on shackle.
3. Raise floor jack and remove jackstand from rear crossmember (1).

FOLLOW-ON TASKS:

- Lubricate spring shackle (Chapter 3, Section 1).
- Install wheel (para 3-8).

Section XI. CARGO BODY MAINTENANCE (M105 SERIES)

4-58. TAILGATE REPLACEMENT,

This Task Covers:

a. Removal

b. Installation

Initial Setup:

Materials/Parts:

- Two lockwashers
- Four cotter pins

Tools/Test Equipment:

- Tool kit, general mechanic's

Personnel Required: Two

a. REMOVAL.

1. Secure tailgate (5) in closed position with two safety chain hooks (1).

NOTE

Step 2 applies only to M105A2.

2. Remove two screws (9), lockwashers (8), flatwashers (7), and bumpers (6) from tailgate (5). Discard lockwashers.
3. Remove four cotter pins (3) and hinge pins (4) from tailgate (5) and body (2). Discard cotter pins.

NOTE

Assistance is required to support tailgate (5) for step 4.

4. Unhook two safety chain hooks (1) and remove tailgate (5) from body (2).

TA505316

4-58. TAILGATE REPLACEMENT (Con't).

b. INSTALLATION**NOTE**

Assistance is required to support tailgate (5) for step 1.

1. Position tailgate (5) on body (2) in closed position and secure with two safety chain hooks (1).
2. Install four hinge pins (4) and new cotter pins (3) on tailgate (5) and body (2).

NOTE

Step 3 applies only to M105A2.

3. Install two bumpers (6) with flatwashers (7), new lockwashers (8), and screws (9).

Section XII. WATER TANK BODY MAINTENANCE (M107 SERIES)

Paragraph Title	Page Number
Fender and Fender Extensions Replacement	4-102
Piping and Valves Replacement	4-104
Vent Maintenance	4-109

4-59. FENDER AND FENDER EXTENSIONS REPLACEMENT.

This Task Covers:

- | | |
|------------|-----------------|
| a. Removal | b. Installation |
|------------|-----------------|

Initial Setup:

Materials/Parts:

- Fifteen lockwashers

Tools/Test Equipment:

- General mechanic's tool kit

a. REMOVAL

NOTE

Right and left fenders (14) and fender extensions (9 and 16) are removed the same way. This procedure covers one side.

1. Remove nut (2), lockwasher (3), and screw (15) securing underside offender extension (16) to chassis frame (1). Discard lockwasher,

TA505317

4-59. FENDER AND FENDER EXTENSIONS REPLACEMENT (Con't).

2. Remove three nuts (10), lockwashers (11), and screws (12) securing fender extension (16) to fender (14). Discard lockwashers.
3. Remove two nuts (6), lockwashers (7), screws (8), and fender extension (16) from tank frame (17) . Discard lockwashers.
4. Repeat steps 1 through 3 to remove fender extension (9) .
5. Remove three nuts (4), lockwashers (5), screws (13), and fender (14) from tank frame (17). Discard lockwashers.

b. INSTALLATION**NOTE**

Right and left fenders (14) and fender extension (9 and 16) are installed the same way. This procedure covers one side.

1. Position fender (14) on tank frame (17) and loosely install three screws (13), new lockwashers (5), and nuts (4).
2. Position fender extension (16) on tank frame (17) and loosely install two screws (8), new lockwashers (7), and nuts (6).
3. Loosely install three screws (12), new lockwashers (11), and nuts (10) to fender extension (16) and fender (14).
4. Loosely install screw (15), new lockwasher (3), and nut (2) to underside of fender extension (16) and chassis frame (1).
5. Repeat steps 2 through 4 to install fender extension (9).
6. Fully tighten three nuts (4), four nuts (6), six nuts (10), and two nuts (2).

4-60. PIPING AND VALVES REPLACEMENT.

This Task Covers:

- | | |
|----------------------------|-----------------|
| a. Removal | c. Installation |
| b. Cleaning and Inspection | |
-

Initial Setup:

Equipment Conditions:

- Discharge valve in OFF position.

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- One hose
 - Ten lockwashers
-

a. REMOVAL

NOTE

if removing faucets (6) only, perform step 1.

1. Remove six faucets (6) from two faucet boxes (5 and 7).
2. Remove four nuts (1), lockwashers (2), screws (3), and plate (4) from two faucet boxes (5 and 7). Discard lockwashers.

TA505318

4-60. PIPING AND VALVES REPLACEMENT (Con't).

3. Remove two clamps (8) and hose (9) from nipple (19) and discharge valve (14). Discard hose.
4. Remove six nuts (13), lockwashers (12), bolts (10), and three guards (11 and 15). Discard lockwashers.

TA505319

4-60. PIPING AND VALVES REPLACEMENT (Con't).

5. Remove elbow (31), nipple (32), and tee (33) from pipe (17).
6. Remove elbow (24), nipple (23), tee (22), nipple (21), and tee (20) from pipe (18).
7. Remove nipple (30), elbow (29), pipe (16), elbow (28), nipple (27), and nipple (19) from tee (26).
8. Remove tee (26), nipple (25), and pipe (18) from manifold valve (34).
9. Remove manifold valve (34) and pipe (17) from faucet box (5).

b. CLEANING AND INSPECTION

1. Clean all parts and inspect for cracks, damaged threads, and evidence of leakage.
2. Replace any damaged parts.

c. INSTALLATION

NOTE

If installing faucets (6) only, perform step 9.

1. Position pipe (17) in faucet box (5) and install manifold valve (34).
2. Install pipe (18), nipple (25), and tee (26) on manifold valve (34).

TA505320

4-60. PIPING AND VALVES REPLACEMENT (Con't).

3. Install nipple (19), nipple (27), elbow (28), pipe (16), elbow (29), and nipple (30) On tee (26).
4. Install tee (20), nipple (21), tee (22), nipple (23), and elbow (24) on pipe (18).
5. Install tee (33), nipple (32), and elbow (31) on pipe (17).
6. Position three guards (11 and 15) on pipes (17 and 18) and nipple (30) and install six bolts (10), new lockwashers (12), and nuts (13).
7. Position new hose (9) on nipple (19) and discharge valve (14) and install two clamps (8).

TA505321

4-60. PIPING AND VALVES REPLACEMENT (Con't).

8. Position plate (4) on two faucet boxes (5 and 7) and install four screws (3), new lockwashers (2), and nuts (1).
9. Install six faucets (6) in two faucet boxes (5 and 7).

TA505322

4-61. VENT MAINTENANCE.

This Task Covers:

- | | |
|----------------------------|-------------|
| a. Disassembly | c. Assembly |
| b. Cleaning and Inspection | |

Initial Setup:

Materials/Parts:

- Three cotter pins

Tools/Test Equipment:

- General mechanic's tool kit

a. DISASSEMBLY

1. Remove wingnut (2) and flatwasher (1) from bolt (12). Remove cotter pin (11), flatwasher (10), pin (9), and bolt from vent (8). Discard cotter pin.
2. Remove cotter pin (16), flatwasher (15), pin (13), and disconnect hinge (3) from cover (14). Remove cover. Discard cotter pin.
3. Remove cotter pin (5), flatwasher (6), pin (7), and hinge (3) from vent (8). Remove strainer (4) from vent. Discard cotter pin.

b. CLEANING AND inspection

1. Clean all parts and inspect for damage.
2. Replace any damaged parts.

TA505323

4-61. VENT MAINTENANCE (Con't).

c. ASSEMBLY

1. Install strainer (4) inside vent (8). Position hinge (3) on vent and install pin (7), flatwasher (6), and new cotter pin (5).
2. Position cover (14) on vent (8). Connect hinge (3) to cover with pin (13), flatwasher (15), and new cotter pin (16).
3. Install bolt (12) on vent (8) with pin (9), flatwasher (10) and new cotter pin (11). Install flatwasher (1) and wingnut (2) on bolt.

TA505324

Section XIII. SHOP VAN BODY MAINTENANCE (M448)

Paragraph Title	Page Number
Front Ventilator Replacement	4-133
Left Rear Door Maintenance	4-110
110-volt Electrical System Maintenance	4-134
110-volt Electrical System Testing	4-141
Rear Door Seal and Bumper Replacement	4-127

Initial Setup:

Materials/Parts:

- One cotter pin
- One seal
- **Thirty-one lockwashers**

Tools/Test Equipment:

- General mechanic's tool kit

Personnel Required: Two

4-62. LEFT REAR DOOR MAINTENANCE (Con't).

a. REMOVAL

1. Remove ladder from door (6).
2. Open door (6). While assistant supports door, remove 14 screws (4) and door from hinge (2),
3. Remove 14 screws (3) and hinge (2) from body (1).

b. DISASSEMBLY

1. Remove 13 nuts (8), lockwashers (7), screws (28), and ventilator (5) from door (6). Discard lockwashers.
2. Remove two nuts (27), lockwashers (26), bumpers (25), and carriage bolts (23) from rack (24). Discard lockwashers.
3. Remove four nuts (10), lockwashers (9), screws (22), and rack (24) from door (6). Discard lockwashers.
4. Remove four screws (20) and latch (21) from door (6).

T A 5 0 5 3 2 5

4-62. LEFT REAR DOOR MAINTENANCE (Con't).

5. Remove four nuts (14), lockwashers (15), screws (18), clamp (17), and pad (16) from door (6). Discard lockwashers.
6. Remove two nuts (11), lockwashers (12), screws (19), and holder assembly (13). Discard lockwashers.
7. Remove two screws (36), lockwashers (35), and guide (34) from door (6). Discard lockwashers.

8. Remove four screws (31), lockwashers (30), and latch (29) and control rod (33) assembly from door (6). Discard lockwashers.
9. Remove cotter pin (32) and separate latch (29) and control rod (33). Discard cotter pin.
10. Remove ten screws (38), seal (37), retainer (39), spacer (40), and channel (41) from door (6). Discard seal.
11. Remove reflector (para 4-72).

TA505326

4-62. LEFT REAR DOOR MAINTENANCE (Con't).

c. ASSEMBLY

1. Install reflector (para 4-72).
2. Position channel (41), spacer (40), retainer (39), and new seal (37) on door (6) and install ten screws (38).
3. Assemble control rod (33) to latch (29) with new cotter pin (32).
4. Install latch (29) and control rod (33) assembly on door (6) with four new lockwashers (30) and screws (31).
5. Install guide (34) on door (6) with two new lockwashers (35) and screws (36).

6. install holder assembly (13) on door (6) with two screws (19), new lockwashers (12), and nuts (11).
7. Install pad (16) and clamp (17) on door (6) with four screws (18), new lockwashers (15), and nuts (14).
8. Install latch (21) on door (6) with four screws (20).

TA505327

4-62. LEFT REAR DOOR MAINTENANCE (Con't).

9. Install rack (24) on door (6) with four screws (22), new lockwashers (9), and nuts (10).
10. Install two carriage bolts (23), bumpers (25), new lockwashers (26), and nuts (27) on rack (24).
11. Install ventilator (5) on door (6) with 13 screws (28), new lockwashers (7), and nuts (8).

d. INSTALLATION

1. Install hinge (2) on body (1) with 14 screws (3).

NOTE

Assistance is required for step 2.

2. Position door (6) on hinge (2) and install 14 screws (4). Close door.
3. Install ladder on door (6).

4-63. RIGHT REAR DOOR MAINTENANCE.

This Task Covers:

- | | |
|----------------|-----------------|
| a. Removal | c. Assembly |
| b. Disassembly | d. Installation |
-

Initial Setup:

Materials/Parts:

- One gasket
- Two cotter pins
- Two seals
- Twenty-eight lockwashers

Tools/Test Equipment:

- General mechanic's tool kit

Personnel Required: Two

a. REMOVAL

1. While assistant supports door (4), remove 14 screws (5) and door from hinge (8).
2. Remove 14 screws (6) and hinge (8) from body (7) .

b. DISASSEMBLY

1. Remove 16 nuts (3) **screws** (17), seal (1), and retainer plate (2) from **channel** (16) Discard **seal**.
2. Remove 13 nuts (9), lockwasher (10), screws (14), and ventilator (15) from door (4). **Discard lockwashers.**
3. Remove three nuts (11), screws (13), and bracket (12) from door (4).

4-63. RIGHT REAR DOOR MAINTENANCE (Con't).

4-63. RIGHT REAR DOOR MAINTENANCE (Con't).

4. Remove ten screws (33), seal (32), retainer (34), spacer (35), and channel (36) from door (4). Discard seal.
5. Remove four screws (42) and latch (41) from door (4).
6. Remove two nuts (37), lockwashers (38), screws (40), and holder assembly (39) from door (4). Discard lockwashers,
7. Remove nut (28), lockwasher (27), shim (49), and handle (44) with ring (45) from lock (29). Discard lockwasher.
8. Remove two screws (46), plate (47), and gasket (48) from door (4). Discard gasket.
9. Remove two cotter pins (25), pins (26), clevises (24), and rods (23) from lock (29). Discard cotter pins.
10. Remove two nuts (43), four lockwashers (31), two bolts (30), and lock (29) from door (4). Discard lockwashers.
11. Remove eight nuts (18), screws (22), lockwashers (21), upper and lower guides (20), and two shims (19) from door (4). Discard lockwashers.
12. Remove reflector (para 4-72).

c. ASSEMBLY

1. Install reflector (para 4-72).
2. Install two shims (19) and upper and lower guides (20) on door (4) with eight new lockwashers (21), screws (22), and nuts (18).
3. Install shim (49) and lock (29) on door (4) with four new lockwashers (31), two bolts (30), and nuts (43).
4. Position two rods (23) and clevises (24) on lock (29) and install two pins (26) and new cotter pins (25).
5. Install new gasket (48) and plate (47) on door (4) with two screws (46).
6. Install handle (44) with ring (45) on lock (29) with new lockwasher (27) and nut (28).
7. Install holder assembly (39) on door (4) with two screws (40), new lockwashers (38), and nuts (37).
8. Install latch (41) on door (4) with four screws (42).
9. Install retainer (34), new seal (32), spacer (35), and channel (36) on door (4) with ten screws (33).

4-63. RIGHT REAR DOOR MAINTENANCE (Con't).

TA505330

4-63. RIGHT REAR DOOR MAINTENANCE (Con't).

10. Install bracket (12) on door (4) with three screws (13) and nuts (11).
11. Install ventilator (15) on door (4) with 13 screws (14), new lockwashers (10), and nuts (9).
12. Install new seal (1) and retainer plate (2) on channel (16) with 16 screws (17) and nuts (3).

d. INSTALLATION

1. Install hinge (8) on body (7) with 14 screws (6).

NOTE

Assistance is required for step 2.

2. Position door (4) on hinge (8) and install 14 screws (5).

TA505331

4-64. SIDE DOOR MAINTENANCE.

This Task Covers:

- | | |
|--------------------------------|---------------------------------------|
| a. Removal | d. Left Side Battery Door Disassembly |
| b. Right Side Door Disassembly | e. Left Side Battery Door Assembly |
| c. Right Side Door Assembly | f. Installation |

Initial Setup:

Materials/Parts:

- ▮ Two liners
- ▮ Twenty lockwashers

Tools/Test Equipment:

- ▮ General mechanic's tool kit
- ▮ Drain pan

Personnel Required: Two

a. REMOVAL

NOTE

- All side doors (6) are removed the same way. Removal of right side door is shown.
- Assistance is required to hold side door (6) closed during removal.

1. Remove two nuts (17), lockwashers (16), and bolts (12) from folding arm (13) and rear corner (15). Discard lockwashers.
2. Remove two nuts (3), lockwashers (4), and bolts (7) from folding arm (9) and front corner (5). Discard lockwashers.
3. Remove 20 screws (10) from front and rear hinge (8 and 11) and floor (14).
4. Open two handles (1) on upper side panel (2) and remove side door (6).

TA505332

4-64. SIDE DOOR MAINTENANCE (Con't).

b. RIGHT SIDE DOOR DISASSEMBLY

1. Remove six screws (18) and panel (19) from side door (6).
2. Remove four nuts (24), lockwashers (25), two plates (26), four bolts (29), and two folding arms (9 and 13) from side door (6). Discard lockwashers.
3. Remove 12 screws (27), rear hinge (11), and seal (28) from side door (6).
4. Remove nine screws (23), front hinge (8), and seal (22) from side door (6).
5. Remove four screws (21) and handle (20) from side door (6).

NOTE

To ensure proper adjustment for installation, position of plates (30) should be marked.

6. Mark position of plates (30). Remove four bolts (32), lockwashers (31), and plates from side door (6). Discard lockwashers.
7. Remove reflectors (para 4-72).

TA505333

4-64. SIDE DOOR MAINTENANCE (Con't).

c. RIGHT SIDE DOOR ASSEMBLY

1. Install reflectors (para 4-72).
2. Position four plates (30) on side door (6) as marked, and install four new lockwashers (31) and bolts (32).
3. Install handle (20) on side door (6) with four screws (21).
4. Install seal (22) and front hinge (8) on side door (6) with nine screws (23).
5. Install seal (28) and rear hinge (11) on side door (6) with 12 screws (27).
6. Install two folding arms (9 and 13) on side door (6) with four bolts (29), two plates (26), four new lockwashers (25), and nuts (24).
7. Install panel (19) on side door (6) with six screws (18).

TA505334

4-64. SIDE DOOR MAINTENANCE (Con't).

d. LEFT SIDE BATTERY DOOR DISASSEMBLY

1. Remove eight thumbscrews (33), four bands (34), two covers (35), pans (36), and liners (37) from side door (6). Discard liners.

WARNING

Battery acid (electrolyte) is extremely dangerous. Use care when removing battery shop door caps (39). Serious injury to personnel may result if battery acid contacts skin or eyes.

2. Remove two caps (39) from side door (6) and drain any battery acid into a suitable container.
3. Remove four nuts (24), lockwashers (25), two plates (26), four bolts (29), and two folding arms (9 and 13) from side door (6). Discard lockwashers.
4. Remove 12 screws (27), rear hinge (11), and seal (28) from side door (6).
5. Remove nine screws (23), front hinge (8), and seal (22) from side door (6).
6. Remove four screws (21) and handle (20) from side door (6).

NOTE

To insure proper adjustment for installation, position of plates (30) should be marked.

7. Mark position of plates (30). Remove four bolts (32), lockwashers (31), and plates from side door (6). Discard lockwashers.
8. Remove 16 nuts (38), screws (41), and eight spring nuts (40) from side door (6).
9. Remove reflector (para 4-72),

e. LEFT SIDE BATTERY DOOR ASSEMBLY

1. Install reflector (para 4-72).
2. Install eight spring nuts (40) on side door (6) with 16 screws (41) and nuts (38).
3. Position four plates (30) on side door (6) as marked, and install four new lockwashers (31) and bolts (32).
4. Install handle (20) on side door (6) with four screws (21).
5. Install seal (22) and front hinge (8) on side door (6) with nine screws (23).
6. Install seal (28) and rear hinge (11) on side door (6) with 12 screws (27).
7. Install two folding arms (9 and 13) on side door (6) with four bolts (29), two plates (26), four new lockwashers (25), and nuts (24).
8. install two caps (39) on side door (6).
9. Position two new liners (37), pans (36), covers (35), and four bands (34) on side door (6) and install eight thumbscrews (33).

4-64. SIDE DOOR MAINTENANCE (Con't).

TA505335

4-64. SIDE DOOR MAINTENANCE (Con't).

f . INSTALLATION

NOTE

● All side doors (8) are installed the same way. Installation of right side door is shown.

● Assistance is required to hold side door (6) closed for installation.

1. Position side door (6) on upper side panel (2) and floor (14) in closed position. Close two bandies (1).
2. install front and rear hinge (8 and 11) on floor (14) with 20 screws (10).
3. install folding arm (9) on front corner (5) with two bolts (7), new lockwashers (4), and nuts (3).
4. install folding arm (13) on rear corner (15) with two bolts (12), new lockwashers (16), and nuts (17).

TA505336

4-65. REAR DOOR SEAL AND BUMPER REPLACEMENT.

This Task Covers:

a. Removal

b. Installation

Initial Setup:

Equipment Conditions:

- Doors open.

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- One seal
 - Thirteen lockwashers
-

a. REMOVAL

NOTE

There are four rear door seals and two door bumpers with clips. This procedure is typical for all.

1. Remove four nuts (6), lockwashers (5), screws (1), capping (2), filler (3), seal (8), and retainer (7) from rear corner (4). Discard lockwashers.
2. Remove nine screws (9), seal (8), and retainer (7) from filler (3). Discard seal.

TA505337

4-65. REAR DOOR SEAL AND BUMPER REPLACEMENT (Con't).

3. Remove four nuts (16), lockwashers (15), bolts (13), and bracket (14) from rear corner (4). Discard lockwashers.
4. Remove nut (21), lockwasher (22), screw (10), flatwasher (11), and bumper (12) from bracket (14). Discard lockwasher.

NOTE

Step 5 applies only to lower bumpers,

5. Remove four nuts (20), lockwashers (19), screws (18), and clip (17) from bracket (14). Discard lockwashers.

b. INSTALLATION

NOTE

Step 1 applies only to lower bumpers.

1. Install clip (17) on bracket (14) with four screws (18), new lockwashers (19), and nuts (20).
2. Install bumper (12) on bracket (14) with screw (10), flatwasher (11), new lockwasher (22), and nut (21).
3. Install bracket (14) on rear corner (4) with four bolts (13), new lockwashers (15), and nuts (16).

TA505338

4-65. REAR DOOR SEAL AND BUMPER REPLACEMENT (Con't).

4. Position new seal (8) and retainer (7) on filler (3) and install nine screws (9).
5. Install seal (8), retainer (7), filler (3), and capping (2) on rear corner (4) with four screws (1), new lockwashers (5), and nuts (6).

4-66. SIDE DOOR UPPER SEAL AND MOLDING REPLACEMENT.

This Task Covers:

- a. Removal b. Installation
-

Initial Setup:

Equipment Conditions:

- Side door open,

Materials/Parts:

- One upper seal

Tools/Test Equipment:

- General mechanic's tool kit
-

a. REMOVAL

1. Remove 28 screws (6), retainer (3), and upper seal (2) from panel (1). Discard upper seal.
2. Remove 28 screws (5) and molding (4) from panel (1).

b. INSTALLATION

1. Install molding (4) on panel (1) with 28 screws (5).
2. Install new upper seal (2) and retainer (3) on panel (1) with 28 screws (6).

TA505340

4-67. SIDE DOOR LATCH REPLACEMENT.

This Task Covers:

a. Removal

b. Installation

Initial Setup:

Equipment Conditions:

- Side door open.

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- Two gaskets
- Eight lockwashers

a. REMOVAL

NOTE

All four side door latches are removed the same way. This procedure covers one latch.

1. Remove nut (1), lockwasher (2), and handle (11) with gasket (10) from lock (15). Discard lockwasher and gasket.
2. Remove two screws (12), plate (9), and gasket (8) from panel (5). Discard gasket.
3. Remove four nuts (17), lockwashers (16), screws (13), lock (15), and spacer (14) from panel (5). Discard lockwashers.
4. Remove three nuts (3), lockwashers (4), screws (7), and bracket (6) from panel (5). Discard lockwashers.

TA505341

4-67. SIDE DOOR LATCH REPLACEMENT (Con't).

b. INSTALLATION

NOTE

All four side door latches are installed the same way. This procedure covers one latch.

1. Install bracket (6) on panel (5) with three screws (7), new lockwashers (4), and nuts (3).
2. Install spacer (14) and lock (15) on panel (5) with four screws (13), new lockwashers (16), and nuts (17).
3. Install new gasket (8) and plate (9) on panel (5) with two screws (12).
4. Install new gasket (10) and handle (11) on lock (15) with new lockwasher (2) and nut (1).

TA505342

4-68. FRONT VENTILATOR REPLACEMENT.

This Task Covers:

a. Removal

b. Installation

Initial Setup:

Materials/Parts:

- Thirteen lockwashers

Tools/Test Equipment:

- General mechanic's tool kit

Personnel Required: Two

a. REMOVAL

Remove 13 nuts (2), lockwashers (3), screws (5), and front ventilator (1) from front wall (4). Discard lockwashers.

b. INSTALLATION

Position front ventilator (1) on front wall (4) and install 13 screws (5), new lockwashers (3), and nuts (2).

4-69. 110-VOLT ELECTRICAL SYSTEM MAINTENANCE.

This Task Covers:

- a. Removal b. Installation
-

Initial Setup:

Equipment Conditions:

- Auxillary power cable disconnected (para 2-15).

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- Marker tags (item 16, Appendix E)
 - One gasket
 - Eight lockwashers
-

a. REMOVAL

WARNING

Auxillary power cable must be disconnected from outside housing before performing any work on 110-volt electrical system. Failure to follow this warning may result in injury or death.

NOTE

During removal, circuit breaker box (8) should be visually inspected for burnt wires, arcing, damaged circuit breakers, and loose connections that may cause damage to equipment. Wires should be visually inspected for damaged or broken insulation that may cause shorting.

1. Remove four screws (17) and cover (16) from junction box (11).
2. Loosen four screws (14) at two receptacles (15). Tag two wire leads (3), ground wire lead (5), and jumper wire (9).
3. Disconnect two wire leads (3), ground wire lead (5), and jumper wire (9) from two receptacles (15).
4. Remove two receptacles (15) from junction box (11).
5. Remove connector (10) from conduit (4) and junction box (11).
6. Remove two screws (13) and junction box (11) from wall (12).
7. Remove four screws (1) from two hinges (2) and box (8).
8. Remove two setscrews (20), flatwashers (19), and cover (18) from box (8).
9. Loosen screw (6) which secures ground wire lead (5) to terminal board (7). Tag ground wire lead (5) and two wire leads (3).
10. Remove ground wire lead (5) from terminal board (7).

4-69. 110-VOLT ELECTRICAL SYSTEM MAINTENANCE (Con't).

4-69. 110-VOLT ELECTRICAL SYSTEM MAINTENANCE (Con't).

11. Loosen two screws (30) and remove two wire leads (3) from two circuit breakers (31),
12. Remove four screws (29) and two circuit breakers (31) from bus bar (32). Repeat for two spare circuit breakers (25).
13. Remove ground wire lead (5) and two wire leads (3) from box (8).
14. Remove connector (33) and conduit (4) from box (8).
15. Loosen three screws (24) and screw (23) and tag three inlet wire leads (27) and ground wire lead (26).
16. Disconnect three inlet wire leads (27) from bus bars (32) and ground wire lead (26) from terminal board (7).

17. Remove connector (28) from conduit (37) and box (8).
18. Remove two screws (21), flatwashers (22), and box (8) from wall (12).
19. Remove connector (36) and conduit (37) from elbow (34) and floor (35).

4-69. 110-VOLT ELECTRICAL SYSTEM MAINTENANCE (Con't).

20. Remove four nuts (43), lockwashers (42), screws (39), insert housing (38), and gasket (41) from elbow (34). Remove insert (40). Discard lockwashers and gasket.

NOTE

For repair of wire leads, refer to Paragraph 4-71.

21. Tag three inlet wire leads (27) and ground wire lead (26) and remove from insert (40).
22. Remove four nuts (46), lockwashers (45), screws (44), and elbow (34) from floor (35). Discard lockwashers.

4-69. 110-VOLT ELECTRICAL SYSTEM MAINTENANCE (Con't).

b. INSTALLATION

NOTE

- To test receptacles and circuit breakers, refer to paragraph 4-70.
- Ensure that all work loads and ground wire leads are installed as tagged.
- Instructions for manufacturing wire leads can be found in Appendix G.

1. Install elbow (34) on floor (35) and with four screws (44), new lockwashers (45), and nuts (46).
2. Install three inlet wire leads (27) and ground wire lead (26) in insert (40). Install insert in insert housing (38).
3. Install new gasket (41) and insert housing (38) on elbow (34) with four screws (39), new lockwashers (42), and nuts (43).
4. Install conduit (37) on elbow (34) with connector (36).
5. Position box (8) on wall (12) alining hole in box with conduit (37). Install two flatwashers (22) and screws (21).
6. Install conduit (37) on box (8) with connector (28)

TA505347

4-69. 110-VOLT ELECTRICAL SYSTEM MAINTENANCE (Con't).

7. Connect three inlet wire leads (27) and ground wire lead (26) on bus bars (32) and terminal board (7). Tighten three screws (24) and screw (23).
8. Install conduit (4) on box (8) with connector (33).
9. Position ground wire lead (5) and two wire leads (3) inside box (8),
10. Install two circuit breakers (31) on bus bars (32) with four screws (29), Repeat for two spare circuit breakers (25).
11. Install two wire leads (3) on two circuit breakers (31) and tighten two screws (30).

4-69. 11 O-VOLT ELECTRICAL SYSTEM MAINTENANCE (Con't).

12. Install ground wire lead (5) on terminal board (7) and tighten screw (6).
13. Install cover (18) on box (8) with two flatwashers (19) and setscrews (20).
14. Install four screws (1) on two hinges (2) and box (8).
15. Install junction box (11) on wall (12) with two screws (13).
16. Install conduit (4) to junction box (11) with connector (10).
17. Position two receptacles (15) inside junction box (11). Connect two wire leads (3), ground wire lead (5), and jumper wire (9) on two receptacles and tighten four screws (14).
18. Install cover (16) on junction box (11) with four screws (17).

FOLLOW-ON TASKS:

- Connect auxillary power cable and check operation of 110-volt electrical system (para 2-15).

TA505349

4-70. 110-VOLT ELECTRICAL SYSTEM TESTING.

This Task Covers:

- a. Receptacle Testing
 - b. Circuit Breaker Testing
 - c. Auxiliary Power Cable Testing
-

Initial Setup:

Tools/Test Equipment:

- General mechanic's tool kit
 - Common No. 1 shop set
 - Multimeter
-

a. RECEPTACLE TESTING

NOTE

Ensure that multimeter is set at lowest resistance measuring scale for all continuity checks.

1. Touch black probe (4) to terminal screw (3) on receptacle (2).
2. Insert red probe (1) into receptacle slot (5) on receptacle (2).
3. Repeat steps 1 and 2 for all receptacle slots (5) and terminal screws (3). If multimeter does not indicate continuity on both sides of receptacle (2), replace receptacle. If multimeter indicates continuity, repeat steps 1 and 2 for both upper receptacle slots.

TA505350

4-70. 110-VOLT ELECTRICAL SYSTEM TESTING (Con't).

b. CIRCUIT BREAKER TESTING

NOTE

Ensure that multimeter is set at lowest resistance measuring scale for all continuity checks.

1. Set ON/OFF lever (6) to ON position.
2. Touch black probe (4) to terminal screw (9).
3. Touch red probe (1) to terminal (8). If multimeter does not indicate continuity, replace circuit breaker (7).

c. AUXILIARY POWER CABLE TESTING

NOTE

- **Ensure that multimeter is set at lowest resistance measuring scale for all continuity checks.**
- **To test auxiliary power cable (11), the pin and associated contact at each end of cable must be touched at the same time. All pins and contacts are identified by letters.**

1. Touch red probe (1) to contact B (10) on auxiliary power cable (11).
2. Touch black probe (4) to pin B (12) on auxiliary power cable (11).
3. Repeat steps 1 and 2 for each pin and associated contact. If multimeter does not indicate continuity, replace auxiliary power cable (11).

4-71. RECEPTACLE REPAIR.

This Task Covers:

o. Disassembly

b. Assembly

Initial Setup:

Equipment Conditions:

- Receptacle removed (para 4-69).

Tools/Test Equipment:

- Common no. 1 shop set
- Soldering gun

Materials/Parts:

- Solder (item 15, Appendix E)
 - Marker tags (Item 16, Appendix E)
-

a. DISASSEMBLY

NOTE

Wire leads (2) should be tagged for assembly.

1. Remove nut (1) from connector shell (5). Remove grommet (4) with wire leads (2) from connector shell.
2. Remove pins (3) from grommet (4).

NOTE

Unsolder only those wire leads (2) being replaced.

3. Remove pins (3) from wire leads (2).

b. ASSEMBLY

1. Solder new wire leads (2) to pins (3).
2. Insert pins (3) into grommet (4).
3. Position grommet (4) on connector shell (5) and install nut (1).

FOLLOW-ON TASKS:

- Install receptacle (para 4-69).
- Check operation of 110-volt electrical system (para 2-15).

Section XIV. ACCESSORY ITEMS MAINTENANCE

Paragraph Title	Page Number
Data Plate Replacement	4-146
Reflector Replacement	4-144

4-72. REFLECTOR REPLACEMENT.

This Task Covers:

- | | |
|----------------------------------|-----------------------|
| a. Replacement (All Except M448) | b. Replacement (M448) |
|----------------------------------|-----------------------|

Initial Setup:

Materials/Parts:

- Two lockwashers

Tools/Test Equipment:

- General mechanic's tool kit

a. REPLACEMENT (ALL EXCEPT M448)

1. Remove two nuts (3), lockwashers (2), screws (5), and reflector (1) from body (4). Discard lockwashers.
2. Install reflector (1) on body (4) with two screws (5), new lockwashers (2), and nuts (3).

4-72. REFLECTOR REPLACEMENT (Con't).

b. REPLACEMENT (M448)

1. Remove two screws (6) and reflector (1) from body (4).
2. Install reflector (1) on body (4) with two screws (6).

4-73. DATA PLATE REPLACEMENT.

This Task Covers:

Replacement

Initial Setup:

Tools/Test Equipment:

- General mechanic's tool kit
-

REPLACEMENT

NOTE

All data plates are replaced the same way; quantity of screws may vary

1. Remove six screws (3) and data plate (2) from frame (1).
2. Install data plate (2) on frame (1) with six screws (3).

TA505355

Section XV. PREPARATION FOR STORAGE OR SHIPMENT

Paragraph Title	Page Number
Care of Equipment in Administrative Storage	4-149
Definition of Administrative Storage	4-147
Exercise Schedule, Table 4-3.	4-149
General	4-147
Preparation of Equipment for Administrative Storage	4-147
Preparation of Equipment for Shipment	4-150
Procedures for Common Components and Miscellaneous Items	4-150
Removal of Equipment from Administrative Storage	4-150

4-74. GENERAL.

- a. This section contains requirements and procedures for administrative storage of equipment that is issued to and in use by Army activities worldwide.
- b. The requirements specified herein are necessary to maintain equipment in administrative storage in such a way as to achieve the maximum readiness condition.
- c. Equipment that is placed in administrative storage should be capable of being readied to perform its mission within a 24-hour period, or as otherwise may be prescribed by the approving authority. Before equipment is placed in administrative storage, a current preventive maintenance checks and services (PMCS) should be completed and deficiencies corrected.
- d. Report equipment in administrative storage as prescribed for all reportable equipment.
- e. Perform inspections, maintenance services, and lubrication as specified herein.
- f. Records and reports to be maintained for equipment in administrative storage are those prescribed by DA Pam 738-750, for equipment in use.
- g. A 10% variance is acceptable on time, running hours, or mileage used to determine the required maintenance actions.
- h. Accomplishment of applicable PMCS, as mentioned throughout this section, will be on a quarterly basis.

4-75. DEFINITION OF ADMINISTRATIVE STORAGE.

The placement of equipment in administrative storage can be for short periods of time when a shortage of maintenance effort exists. Items should be ready for use within the time factors as determined by the directing authority. During the storage period, appropriate maintenance records will be kept.

4-76. PREPARATION OF EQUIPMENT FOR ADMINISTRATIVE STORAGE.

a. Storage Site.

- (1) Select the best available site for administrative storage. Separate stored equipment from equipment in use. Conspicuously mark the area "Administrative Storage"
- (2) Covered space is preferred.
- (3) Open sites should be improved hardstand, if available. Unimproved sites should be firm, well-drained, and kept free of excessive vegetation.

4-76. PREPARATION OF EQUIPMENT FOR ADMINISTRATIVE STORAGE (Con't).

b. Storage Plan.

(1) Store equipment so as to provide maximum protection from the elements and to provide access for inspection, maintenance, and exercising. Anticipate removal or deployment problems and take suitable precautions.

(2) Take into consideration environmental conditions, such as extreme heat or cold; high humidity; blowing sand, dust, or loose debris; soft ground; mud; heavy snows; or combinations thereof, and take adequate precautions.

(3) Establish a fire plan and provide for adequate firefighting equipment and personnel.

c. Maintenance Services and inspection.

(1) Maintenance Semites. Prior to storage, perform the next scheduled organizational PMCS.

(2) inspection. Inspect and approve the equipment prior to storage. Do not place equipment in storage in a nonmission-capable condition.

d. Auxiliary Equipment and Basic Issue Items,

(1) Process auxiliary and basic issue items simultaneously with the major item to which they are assigned.

(2) If possible, store auxiliary and basic issue items with the major item.

(3) If stored apart from the major item, mark auxiliary and basic issue items with tags indicating the major item, its registration or serial number and location, and store in protective type closures. In addition, place a tag or list indicating the location of the removed items in a conspicuous place on the major item.

e. Correction of Shortcoming and Deficiencies. Correct all shortcomings and deficiencies prior to storage, or obtain a deferment from the approving authority.

f. Lubrication, Lubricate equipment in accordance with instructions in Chapter 3, Section I.

g. General Cleaning, Painting and Presentation.

CAUTION

Do not direct water or steam, under pressure, against unsealed electrical systems or any exterior opening. Failure to follow this caution may result in damage to equipment

(1) Cleaning. Clean the equipment of dirt, grease, and other contaminants, but do not use vapor degreasing.

(2) Painting. Remove rust and damaged paint by scraping, wire brushing, sanding, or buffing. Sand to a smooth finish and spot paint as necessary (TB 43-0209).

(3) Preservation. After cleaning and drying, immediately coat unpainted metal surfaces with oil or grease, as appropriate (Chapter 3, Section i).

CAUTION

Place a piece of barrier material (Item 1, Appendix E) between desiccant bags and metal surfaces.

NOTE

Air circulation under draped covers reduces deterioration from moisture and heat.

(4) Weatherproofing. Sunlight, heat, moisture (humidity), and dirt tend to accelerate deterioration. Install all covers (including vehicle protective closures) authorized for the equipment. Close and secure all openings except those required for venting and draining. Seal openings to prevent the entry of rain, snow, or dust. Insert desiccant when complete seal is required. Place equipment and provide blocking or framing to allow for ventilation and water drainage. Support cover away from item surfaces which may rust, rot, or mildew.

4-77. CARE OF EQUIPMENT IN ADMINISTRATIVE STORAGE.

a. Maintenance Services. After equipment has been placed in administrative storage, inspect, service, and exercise as specified herein.

b. inspection. Inspection will usually be visual and must consist of at least a walk-around examination of all equipment to detect any deficiencies. Inspect equipment in open storage weekly and equipment in covered storage monthly. Inspect all equipment immediately after any severe storm or environmental change. The following are examples of things to look for during a visual inspection:

- (1) Low or flat tires.
- (2) Condition of preservatives, seals, and wraps.
- (3) Torn, frayed, or split canvas covers and tops.
- (4) Corrosion or other deterioration.
- (5) Missing or damaged parts.
- (6) Water in compartments.
- (7) Any other readily recognizable shortcomings or deficiencies.

c. Repair During Administrative Storage. Keep equipment in an optimum state of readiness. Accomplish the required services and repairs as expeditiously as possible. Whenever possible, perform all maintenance on-site.

d. Exercising. Exercise equipment in accordance with Table 4-3, Exercise Schedule, and the following instructions.

(1) Vehicle Major Exercise. Depreserve equipment by removing only that material restricting exercise. Close all drains, remove blocks, latch tailgates, and perform all before-operation checks. Couple trailer to towing vehicle, and drive for at least 25 mi (40 km). Make several right and left 90° turns. Make several hard braking stops without skidding. Do the following during exercising when it is convenient and safe: operate all other functional components and perform all during- and after-operation checks.

(2) Scheduled Services. Scheduled services will include inspection per subparagraph b above, and will be conducted in accordance with Table 4-3. Lubricate in accordance with instructions in Chapter 3, Section I.

(3) Corrective Action. Immediately take action to correct shortcomings and deficiencies noted. Record inspection and exercise results *on* DA Form 2404. Record and report all maintenance actions on DA Form 2407. After exercising, restore the preservation to the original condition. Replenish lubricants used during exercising, and note the amount on DA Form 2408.

Table 4-3. Exercise Schedule.

Weeks	2	4	6	8	10	12	14	16	18	20	22	24
PMCS						X						X
Scheduled Services		X		X		X		X		X		
Major Exercise												X

e. Rotation. Rotate items in accordance with any rotational plan that will keep the equipment in an operational condition and reduce the maintenance effort.

4-78. PROCEDURES FOR COMMON COMPONENTS AND MISCELLANEOUS ITEMS.

a. Tires. Visually inspect tires during each walk-around inspection. This inspection includes checking tires with a tire gage. Inflate, "repair, or replace as necessary those found to be low, damaged, or excessively worn. Mark inflated and repaired tires with a crayon for checking at the next inspection.

b. Air Lines and Reservoirs, Drain air lines and reservoirs of condensation, and leave draincocks open, Attach a caution tag, annotated to provide for closing of draincocks when the equipment is exercised. Place tags in a conspicuous location.

c. M107 Series Water Tank, Piping, and Faucets, Drain and purge with dried compressed air. Do not apply contact preservatives. Leave all drains, valves, and faucets open.

d. Seals. Seals may develop leaks during storage, or shortly thereafter. If leaking persists, refer to the applicable maintenance section in this manual for corrective maintenance procedures.

4-79. REMOVAL OF EQUIPMENT FROM ADMINISTRATIVE STORAGE.

a. Activation. Restore the equipment to normal operating condition in accordance with the instructions contained in Chapter 4, Section II.

b. Servicing. Resume the maintenance service schedule in effect at the commencement of storage, or service the equipment before the scheduled dates in order to produce a staggered maintenance workload.

4-80. PREPARATION OF EQUIPMENT FOR SHIPMENT.

a. Refer to TM 55-200, TM 55-601, and TM 743-200-1 for additional instructions on processing, storage, and shipment of materiel.

b. Trailers that have been removed from storage for shipment do not have to be reprocessed if they will reach their destination within the administrative storage period. Reprocess only if inspection reveals any corrosion, or if anticipated in-transit weather conditions make it necessary.

c. When a trailer is received and has already been processed for domestic shipment, as indicated on DD Form 1397, the trailer does not have to be reprocessed for storage unless corrosion and deterioration are found during the inspection upon receipt, List on SF 364 all discrepancies found because of poor preservation, packaging, packing, marking, handling, loading, storage, or excessive preservation. Repairs that cannot be handled by the receiving unit must have tags attached listing needed repairs. A report of these conditions will be submitted by the unit commander for action by an ordnance maintenance unit.

CHAPTER 5 DIRECT SUPPORT AND GENERAL SUPPORT MAINTENANCE

Section I. REAR AXLE MAINTENANCE

5-1. REAR AXLE REPLACEMENT.

This Task Covers:

- | | |
|------------|-----------------|
| a. Removal | b. Installation |
|------------|-----------------|

Initial Setup:

Equipment Conditions:

- Hub and brakedrum removed (para 4-48 or 4-49).

Tools/Test Equipment:

- General mechanic's tool kit
- Drain pan
- Floor jack
- Two jackstands

Materials/Parts:

- Rags (Item 11, Appendix E)
- Twenty-five lockwashers

Personnel Required: Two

a. REMOVAL

WARNING

Axle (4) is heavy and awkward to handle. Use caution, provide adequate support, and use assistance during removal. Failure to follow this warning may result in serious injury.

1. Raise axle (4) with floor jack and place a jackstand under each corner of rear crossmember (1).
2. Disconnect handbrake cable (3) from handbrake lever (2).

TA505356

5-1. REAR AXLE REPLACEMENT (Con't).

- Loosen two nuts (5) and remove handbrake cable (3) from guide bracket (11) on backing plate (10).

NOTE

A suitable container should be used to catch any draining brake fluid. Ensure that all spills are cleaned up.

- Loosen nut (7) and disconnect tube (6) from connector (9).
- Remove 12 nuts (14), lockwashers (13), flatwashers (12), screws (8), and backing plate (10) from axle (4). Discard lockwashers.
- Repeat steps 2 through 5 on opposite end of axle (4).

- Remove nut (18), lockwasher (17), connector (16), and two tubes (6) from axle (4). Discard lockwasher.

5-1. REAR AXLE REPLACEMENT (Con't).

8. Using floor jack, raise and support axle (4) at both ends. Remove eight nuts (20), four U-bolts (22), and two plates (19) from axle (4) and springs (21).
9. Carefully lower and remove axle (4) from springs (21).

lb. INSTALLATION

WARNING

Axle (4) is heavy and awkward to handle. Use caution, provide adequate support, and use assistance during installation. Failure to follow this warning may result in serious injury.

1. Carefully raise and position axle (4) on springs (21). Support axle at both ends.
2. install four U-bolts (22), two plates (19), and eight nuts (20) on axle (4) and springs (21).
3. Install connector (20) and two tubes (6) on axle (4) with new lockwasher (21) and nut (22). Secure tubes under clips (15).
4. Install backing plate (10) on axle (4) with 12 screws (8), flatwashers (12), new lockwashers (13), and nuts (14).
5. Connect tube (6) to connector (9) and tighten nut (7).
6. Position handbrake cable (3) under guide bracket (11) and tighten two nuts (5).

TA505358

5-1. REAR AXLE REPLACEMENT (Con't).

7. Connect handbrake cable (3) to handbrake lever (2).
8. Repeat steps 4 through 7 for opposite end of axle (4).

FOLLOW-ON TASKS:

- Install hub and brakedrum (para 4-48 or 4-49)
- Bleed brakes (para 4-39).

Section II. BRAKEDRUM AND TIRE MAINTENANCE

Paragraph Title	Page Number
Brakedrum Repair	5-5
Tire Repair	5-6

5-2. BRAKEDRUM REPAIR.

This Task Covers:

- | | |
|---------------|-----------|
| a. Inspection | b. Repair |
|---------------|-----------|

Initial Setup:

Equipment Conditions:

- Hub and brakedrum removed (para 4-48 or 4-49).

Tools/Test Equipment:

- General mechanic's tool kit
- Field automotive shop set
- Brakedrum lathe
- Dial indicator
- Inside micrometer, with extension

a. INSPECTION

WARNING

DO NOT handle brakeshoes, brakedrums, or other brake components unless area has been properly cleaned. There may be asbestos dust on these components which can be dangerous if you touch it or breathe it. Wear an approved filter mask and gloves. Never use compressed air or a dry brush to clean brake components. Dust may be removed using an industrial-type vacuum cleaner. Clean dust or mud away from brake components with water and a wet, soft brush or cloth. Failure to follow this warning may result in serious illness or death.

1. Inspect stud holes (2) for cracks (3). Discard brakedrum (1) if cracks are present.

5-2. BRAKEDRUM REPAIR (Con't).

WARNING

DO NOT use a brakedrum that exceeds maximum wear specifications. Failure to follow this warning may result in brake failure and serious injury or death.

2. Inspect braking surface (6) for cracks (3), heat checking (4), and scoring (5). Reface braking surface if damaged (subpara b).
3. Inspect braking surface (6) for out-of-round at 45° intervals. Out-of-round should not exceed 0.006 in. (0.15 mm). If runout exceeds 0.006 in. (0.15 mm), reface braking surface (subpara b).
4. Measure inside diameter of brakedrum (1). Discard brakedrum if inside diameter exceeds 15.23 in. (38.68 cm).

b. REPAIR

WARNING

DO NOT use a brakedrum that exceeds maximum wear specifications. Failure to follow this warning may result in brake failure and serious injury or death.

1. Reface braking surface (6) with brakedrum lathe, removing a maximum of 0.01 in. (0.25 mm) per cut.
2. Discard brakedrum (1) if inside diameter exceeds 15.23 in. (38.68 cm) after repair.

FOLLOW-ON TASKS:

- Install hub and brakedrum (para 4-48 or 4-49)

5-3. TIRE REPAIR.

Refer to TM 9-2610-200-24 for instructions on tire repair.

TA505361

Section III. CARGO BODY MAINTENANCE (M105 SERIES)

Paragraph Title	Page Number
Cargo Body Maintenance (M105A1)	5-7
Cargo Body Maintenance (M105A2 and M105A2C)	5-10

5-4. CARGO BODY MAINTENANCE (M105A1).

This Task Covers:

- | | |
|---|---|
| <ul style="list-style-type: none"> a. Removal b. Repair | <ul style="list-style-type: none"> c. Installation |
|---|---|
-

Initial Setup:

Materials/Parts:

- Sixteen locknuts

References:

- TB 9-2300-247-40
- TM 9-237

Tools/Test Equipment:

- General mechanic's tool kit
- Welder's tool kit

Personnel Required: Two

5-4. CARGO BODY MAINTENANCE (M105A1) (Con't).

a. REMOVAL

1. Remove 12 locknuts (9) and bolts (3) from cargo body (1) and chassis (4). Discard locknuts.
2. Remove four locknuts (2), bolts (8), flatwashers (7), springs (6), and two brackets (5) from cargo body (1) and chassis (4). Discard locknuts.

WARNING

Stand clear of lifting device when raising or lowering cargo body (1). Failure to follow this warning may result in serious injury or death.

3. Using a suitable lifting device, lift cargo body (1) from chassis (4).

b. REPAIR

Refer to TB 9-2300-247-40 for instructions on cargo body repair.

c. INSTALLATION

WARNING

Stand clear of lifting device when raising or lowering cargo body (1). Failure to follow this warning may result in serious injury or death.

1. Lift cargo body (1) into position on chassis (4).

NOTE

Perform step 2 if front mounts on cargo body (1) do not align with holes on chassis (4).

2. Remove front mounts from cargo body (1) and weld in proper position (TM 9-237).
3. Position two brackets (5) on cargo body (1) and chassis (4) and loosely install four bolts (8), flatwashers (7), springs (6), and new locknuts (2).
4. Loosely install 12 bolts (3) and new locknuts (9) on cargo body (1) and chassis (4).
5. Fully tighten 16 locknuts (2 and 9).

5-4. CARGO BODY MAINTENANCE (M105A1) (Con't).

5-5. CARGO BODY MAINTENANCE (M105A2 AND M105A2C).

This Task Covers:

- | | |
|------------|-----------------|
| a. Removal | c. Installation |
| b. Repair | |
-

Initial Setup:

Materials/Parts:

- Ten lockwashers

References:

- TB 9-2300-247-40
- TM 9-237

Tools/Test Equipment:

- General mechanic's tool kit
- Welder's tool kit

Personnel Required: Two

a. REMOVAL

1. Remove ten nuts (2), lockwashers (3), and screws (4) from cargo body (1) and chassis (5). Discard lockwashers.

WARNING

Stand clear of lifting device when raising or lowering cargo body (1). Failure to follow this warning may result in serious injury or death.

2. Using a suitable lifting device, lift cargo body (1) from chassis (5).

b. REPAIR

Refer to TB 9-2300-247-40 for instructions on cargo body repair.

c. INSTALLATION

WARNING

Stand clear of lifting device when raising or lowering cargo body (1). Failure to follow this warning may result in serious injury or death.

1. Lift cargo body (1) into position on chassis (5).

NOTE

Perform step 2 if front mounts on cargo body (1) do not align with holes on chassis (5).

2. Remove front mounts from cargo body and weld in proper position (TM 9-237).
3. Install ten screws (4), new lockwashers (3), and nuts (2) on cargo body (1) and chassis (5).

5-5. CARGO BODY MAINTENANCE (M105A2 AND M105A2C) (Con't).

Section IV. WATER TANK BODY MAINTENANCE (M107 SERIES)

Paragraph Title	Page Number
Discharge Valve Replacement	5-12
Frame Assembly Maintenance	5-18
Manhole Cover Maintenance,	5-20
Water Tank Body Maintenance	5-13

5-6. DISCHARGE VALVE REPLACEMENT.

This Task Covers:

- | | |
|------------|-----------------|
| a. Removal | b. Installation |
|------------|-----------------|

Initial Setup:

Equipment Conditions:

- Water drained from tank (para 2-14).

Materials/Parts:

- One hose

a. REMOVAL

1. Loosen two clamps (2) and remove hose (3) from nipples (1 and 4). Discard hose.
2. Remove nipple (4) from discharge valve (5).
3. Remove discharge valve (5) and nipple (6) from bushing (7) and water tank body.

b. INSTALLATION

1. Install nipple (6) and discharge valve (5) on bushing (7) and water tank body.
2. Install nipple (4) on discharge valve (5).
3. Install new hose (3) on nipples (1 and 4) and tighten two clamps (2).

TA505364

5-7. WATER TANK BODY MAINTENANCE.

This Task Covers:

- | | |
|--------------------------------------|-----------------|
| a. Removal | c. Repair |
| b. Cleaning and Refinishing interior | d. Installation |
-

Initial Setup:

Equipment Condition:

- Water drained from tank (para 2-14).

Tools/Test Equipment:

- General mechanic's tool kit
- Abrasive mask
- Air blower, displacement
- Air filter
- Canvas sleeves
- Fresh air mask
- Rubber apron
- Rubber gloves
- Safety rope
- Safety shoes

Materials/Parts:

- Scrub brush (Item 3, Appendix E)
- Sandblast sand (item 12, Appendix E)
- Scouring powder (Item 13, Appendix E)
- Bleach (item 14, Appendix E)
- Eight locknuts
- Eight rubber shock mounts

Personnel Required: Two

References:

- FM 21-10
 - TM 9-237
 - TM 43-0139
-

a. REMOVAL.

1. Remove discharge valve (8) from water tank (1) (para 5-6).

TA505365

5-7. WATER TANK BODY MAINTENANCE (Con't).

2. Remove eight locknuts (2), mounts (3), packings with retainers (4), and screws (7) from water tank (1) and frame (6). Discard locknuts.

WARNING

Stand clear of lifting device when raising or lowering water tank (1). Failure to follow this warning may result in serious injury or death.

3. Using a suitable lifting device, carefully remove water tank (1) from frame (6).
4. Remove eight rubber shock mounts (5). Discard rubber shock mounts.

b. CLEANING AND REFINISHING INTERIOR

NOTE

Refer to FM 21-10 for further information on cleaning and disinfecting procedures.

1. Remove drainplug (15) from water tank (1). If installed, remove discharge valve (8) (para 5-6).
2. Loosen wingnut (11), open cover (12), and remove strainer (10) from vent (9).
3. Loosen wingnut (13) and open manhole cover (14).

5-7. WATER TANK BODY MAINTENANCE (Con't).

WARNING

- **NEVER** work alone inside water tank. A safety rope must be secured around chest and under arms of person entering water tank. Opposite end of safety rope must be held by a person stationed at the manhole opening. This will allow for quick removal of person from water tank in the event of accident or personal injury.
 - An adequate air evacuation system must be used to quickly exhaust fumes from inside water tank. Failure to follow this warning may result in injury or death.
 - Personnel must wear rubber gloves, canvas sleeves, safety shoes, rubberized apron, and protective mask while performing abrasive cleaning operation. A portable air filter must also be used. Failure to follow this warning may result in injury.
 - Nozzle pressure must not exceed 35 psi (241 kPa). Do not hold spray nozzle on any one area for extended periods of time. Failure to do so may result in tank rupture or damage and possible injury.
4. Clean all interior surfaces of water tank (1), including baffle plates, corners, seams, drains, and outlets, with sandblast sand. Insert sandblasting nozzle and hose into piping to remove all corrosion and scale. Remove all traces of corrosion and old coatings.
 5. Remove dust, dirt, and sandblasting material from water tank (1) with vacuum cleaner or other suitable equipment.
 6. Scrub interior of body with scrub brush, water, and scouring powder solution.
 7. Rinse water tank (1) repeatedly with warm water, approximately 120°F (49°C), to remove all traces of soapy solution.
 8. Install drainplug (15). Install discharge valve (para 5-6).
 9. Fill water tank (1) with water and add four gal (15 l) of liquid laundry bleach. Let stand eight hours to complete sanitation process. Drain water from tank (para 2-14).
 10. Remove drainplug (15). Remove discharge valve (para 5-6).

TA505367

5-7. WATER TANK BODY MAINTENANCE (Con't).

11. Rinse water tank (1) repeatedly with warm water, approximately 120°F (49 °C), to remove all traces of bleach solution.
12. Dry water tank (1) completely with forced air heater.
13. Install drainplug (15). Install discharge valve (para 5-6).
14. Install strainer (10), close cover (12), and tighten wingnut (11) on vent (9).
15. Close manhole cover (14) and tighten wingnut (13).

c. REPAIR

1. Refer to TM 9-237 for instructions on water tank body welding repair.
2. Refer to TM 43-0139 for instructions on painting water tank body exterior.

d. INSTALLATION

WARNING

Stand clear of lifting device when raising or lowering water tank (1). Failure to follow this warning may result in serious injury or death.

1. Position eight new rubber shock mounts (5) on water tank (1). Carefully lift water tank (1) onto frame (6).

5-7. WATER TANK BODY MAINTENANCE (Con't).

2. Install eight screws (7), packings with retainers (4), mounts (3), and new locknuts (2) on water tank (1) and frame (6).
3. Install discharge valve (8) (para 5-6).

5-8. FRAME ASSEMBLY MAINTENANCE.

This Task Covers:

- a. Removal
- b. Repair
- c. Installation

Initial Setup:

Equipment Conditions:

- Fender and fender extensions removed (para 4-59).
- Water tank body removed (para 5-7).

Tools/Test Equipment:

- General mechanic's tool kit
- Welder's tool kit

Materials/Parts:

- Twenty-four lockwashers

Personnel Required: Two

References:

- TM 9-237

a. REMOVAL

WARNING

Stand clear of lifting device when raising or lowering frame assembly (1). Failure to follow this warning may result in serious injury or death.

1. Remove 24 nuts (5), lockwashers (4), and bolts (2) from frame assembly (1) and chassis (3). Discard lockwashers.
2. Using a suitable lifting device, carefully lift frame assembly (1) from chassis (3).

TA505370

5-8. FRAME ASSEMBLY MAINTENANCE (Con't).

b. REPAIR

Refer to TM 9-237 for instructions on frame assembly repair.

c. INSTALLATION

WARNING

Stand clear of lifting device when raising or lowering frame assembly (1). Failure to follow this warning may result in serious injury or death.

1. Carefully lift frame assembly (1) on chassis (3).
2. Loosely install 24 bolts (2), new lockwashers (4), and nuts (5) on frame assembly (1) and chassis (3). Fully tighten nuts.

FOLLOW-ON TASKS:

- Install water tank body (para 5-7).
- Install fender and fender extensions (para 4-59).

5-9. MANHOLE COVER MAINTENANCE.

This Task Covers:

- a. Removal
- b. Disassembly

Assembly
Installation

Initial Setup:

Tools/Test Equipment:

- General mechanic's tool kit

Materials/Parts:

- One seal
- Three cotter pins

a. REMOVAL

1. Remove wingnut (1) from eyebolt (3).
2. Remove cotter pin (4), flatwasher (5), pin and chain assembly (7), and remove cover (9) from bracket (6). Remove seal (8) from cover (9). Discard cotter pin and seal.

b. DISASSEMBLY

1. Remove cotter pin (10), pin (11), hinge (2), vent (12), and nipple (13) from cover (9). Discard cotter pin.
2. Remove cotter pin (17), flatwasher (16), pin (14), and eyebolt (3) from bracket (15). Discard cotter pin.

c. ASSEMBLY

1. Install eyebolt (3) on bracket (15) with pin (14), flatwasher (16), and new cotter pin (17),
2. Install nipple (13) and vent (12) on cover (9).
3. Install hinge (2) on cover (9) with pin (11) and new cotter pin (10).

TA505371

5-9. MANHOLE COVER MAINTENANCE (Con't).

d. INSTALLATION

1. Install new seal (8) on cover (9). Install cover (9) on bracket (6) with pin and chain assembly (7), flatwasher (5), and new cotter pin (4).
2. Close cover (9) and install wingnut (1) on eyebolt (3).

Section V. SHOP VAN BODY MAINTENANCE (M448)

5-10. SHOP VAN BODY MAINTENANCE.

This Task Covers:

- | | |
|------------|-----------------|
| a. Removal | c. Installation |
| b. Repair | |
-

Initial Setup:

Materials/Parts:

- Two liners
- Eight locknuts

References:

- TM 9-237

Tools/Test Equipment:

- General mechanic's tool kit
- Welder's tool kit

Personnel Required: Two

a. REMOVAL

WARNING

Stand clear of lifting device when raising or lowering shop van body (1). Failure to follow this warning may result in serious injury or death.

1. Remove eight locknuts (4) and screws (2) from shop van body (1) and chassis (5). Discard locknuts.
2. Using a suitable lifting device, carefully lift shop van body (1) from chassis (5).
3. Remove two liners (3) from chassis (5). Discard liners.

b. REPAIR

Refer to TM 9-237 for instruction on shop van body repair.

c. INSTALLATION

WARNING

Stand clear of lifting device when raising or lowering shop van body (1). Failure to follow this warning may result in serious injury or death.

1. Position two new liners (3) on chassis (5).
2. Carefully lift shop van body (1) on chassis (5).
3. Install eight screws (2) and new locknuts (4) on shop van body (1) and chassis (5).

5-10. SHOP VAN BODY MAINTENANCE (Con't).

TA506373

APPENDIX A REFERENCES

A-1. SCOPE.

This appendix lists all forms, field manuals, technical manuals, and other publications referenced in this manual and which apply to the operation, organizational, direct, and general support maintenance of the M103, M105, M107, and M448 Series Trailers.

A-2. PUBLICATION INDEX.

DA Pam 25-30, Consolidated Index of *Army Pub/cat/ens and Blank Forms*, should be consulted frequently for latest changes or revisions and for new publications relating to materiel covered in this technical manual.

A-3. FORMS.

Refer to DA Pam 738-750, *The Army Maintenance Management System (TAMMS)*, for instructions on the use of maintenance forms.

Equipment Inspection and Maintenance Worksheet.....	DA Form 2404
Equipment Log Assembly (Records).....	DA Form 2408
Maintenance Request	DA Form 2407
Organizational Control Record for Equipment	DA Form 2401
Preventive Maintenance Schedule and Record	DD Form 314
Processing and Reprocessing Record for Shipment, Storage, and Issue of Vehicles and Spare Engines	DD Form 1397
Product Quality Deficiency Report	SF 368
Recommended Changes to Equipment Technical Publications	DA Form 2028-2
Recommended Changes to Publications and Blank Forms.....	DA Form 2028

APPENDIX B

MAINTENANCE ALLOCATION CHART (MAC)

Section 1: INTRODUCTION

B-1. General

This introduction provides a general explanation of all maintenance and repair functions authorized at the two maintenance levels under the Two-Level Maintenance System concept.

The MAC (immediately following the introduction) designates overall authority and responsibility for the performance of maintenance functions on the identified end item or component. The application of the maintenance functions to the end item or component shall be consistent with the capacities and capabilities of the designated maintenance levels, which are shown on the MAC in column (4) as:

Field — includes two subcolumns, Unit (C (operator/crew) and O (unit) maintenance) and Direct Support (F) maintenance

Sustainment — includes two subcolumns, general support (H) and depot (D)

The tools and test equipment requirements (immediately following the MAC) list the tools and test equipment (both special tools and common tool sets) required for each maintenance function as referenced for the MAC).

The remarks (immediately following the tools and test equipment requirements) contain supplemental instructions and explanatory notes for a particular maintenance function.

B-2. Maintenance Functions

Maintenance functions are limited to and defined as follows:

1. **Inspect.** To determine the serviceability of an item by comparing its physical, mechanical, and/or electrical characteristics with established standards through examination (e.g.; by sight, sound, or feel). This includes scheduled inspection and gauging and evaluation of cannon tubes.
2. **Test.** To verify serviceability by measuring the mechanical, pneumatic, hydraulic, or electrical characteristics of an item and comparing those characteristics with prescribed standards on a scheduled basis, i.e., load testing of lift devices and hydrostatic testing of pressure hoses.
3. **Service.** Operations required periodically to keep an item in proper operating condition, e.g., to clean (includes decontaminate, when required), to preserve, to drain, to paint, or to replenish fuel, lubricants, chemical fluids, or gases. This includes scheduled exercising and purging or recoil mechanisms.
4. **Adjust.** To maintain or regulate, within prescribed limits, by bringing into proper position, or by setting the operating characteristics to specified parameters.
5. **Align.** To adjust specified variable elements of an item to bring about optimum or desired performance.
6. **Calibrate.** To determine and cause corrections to be made or be adjusted on instruments of test, measuring, and diagnostic equipment used in precision measurement. Consists of comparisons of two instruments, one of which is a certified standard of known accuracy, to detect and adjust any discrepancy in the accuracy of the instrument being compared.
7. **Remove/Install.** To remove and install the same item when required to perform service or other maintenance functions. Install may be the act of emplacing, seating, or fixing into position a spare, repair part, or module (component or assembly) in a manner to allow the proper functioning of an equipment or system.
8. **Replace.** To remove an unserviceable item and install a serviceable counterpart in its place. "Replace" is authorized by the MAC and assigned maintenance level is shown as the third position code of the Source, Maintenance, and Recoverability (SMR) code.
9. **Repair.** The application of maintenance services, including fault location/troubleshooting, removal/installation, disassembly/assembly procedures, and maintenance actions to identify troubles and restore serviceability to an item by correcting specific damage, fault, malfunction, or failure in a part, subassembly, module (component or assembly), end item, or system.

APPENDIX B
MAINTENANCE ALLOCATION CHART (MAC)
Section 1: INTRODUCTION (Cont.)

B-2. Maintenance Functions (Cont.)

NOTE

The following definitions are applicable to the "repair" maintenance function services: Inspect, test, service, adjust, align, calibrate, and/or replace.

- Fault location/troubleshooting. The process of investigating and detecting the cause of equipment malfunctioning; the act of isolating a fault within a system of Unit Under Test (UUT).
 - Disassembly/assembly. The step-by-step breakdown (taking apart) of a spare/functional group coded item to the level of its least component, that is assigned an SMR code of the level of maintenance under consideration (i.e., identified as maintenance significant).
 - Actions. Welding, grinding, riveting, straightening, facing, machining, and/or resurfacing.
10. Overhaul. That maintenance effort (service/action) prescribed to restore an item to a completely serviceable/operational condition as required by maintenance standards in appropriate technical publications. Overhaul is normally the highest degree of maintenance performed by the Army. Overhaul does not normally return an item to "like new" condition.
11. Rebuild. Consists of those services/actions necessary for the restoration of unserviceable equipment to a "like new" condition in accordance with original manufacturing standards. Rebuild is the highest degree of material maintenance applied to Army equipment. The rebuild operation includes the act of returning to zero those age measurements (e.g., hours/miles) considered in classifying Army equipment/components.

Explanation of Columns in the MAC

Column (1) Group Number. Column (1) lists FGC numbers, the purpose of which is to identify maintenance significant components, assemblies, subassemblies, and modules with the Next Higher Assembly (NHA).

Column (2) Component/Assembly. Column (2) contains the item names of components, assemblies, subassemblies, and modules for which maintenance is authorized.

Column (3) Maintenance Function. Column (3) lists the functions to be performed on the item listed in column (2). (For a detailed explanation of these functions, refer to "Maintenance Functions" outlined above).

Column (4) Maintenance Level. Column (4) specifies each level of maintenance authorized to perform each function listed in column (3), by indicating work time required (expressed as man-hours in whole hours or decimals) in the appropriate subcolumn. This work time figure represents the active time required to perform that maintenance function at the indicated level of maintenance. If the number or complexity of the tasks within the listed maintenance function varies at different maintenance levels, appropriate work time figures are to be shown for each level. The work time figure represents the average time required to restore an item (assembly, subassembly, component, module end item, or system) to a serviceable condition under typical field operating conditions. This time includes preparation time (including any necessary disassembly/assembly time), troubleshooting/fault location time, and quality assurance time in addition to the time required to perform the specific tasks identified for the maintenance functions authorized in the MAC. The symbol designations for the various maintenance functions are as follows:

<p><u>Field:</u> C Operator or crew maintenance O Unit maintenance F Direction support maintenance</p>	<p><u>Sustainment:</u> H General support maintenance D Depot maintenance</p>
---	--

NOTE

The "L" maintenance level is not included in column (4) of the MAC. Functions to this level of maintenance are identified by a work time figure in the "H" column of column (4), and an associated reference code is used in the REMARKS column (6). This code is keyed to the remarks and the SRA complete repair application is explained there.

Column (5) Tools and Equipment Reference Code. Column (5) specifies, by code, those common tool sets (not individual tools), common Test, Measurement and Diagnostic Equipment (TMDE), and special tools, special TMDE and special support equipment required to perform the designated function. Codes are keyed to the entries in the tools and test equipment table.

Column (6) Remarks Code. When applicable, this column contains a letter code, in alphabetical order, which is keyed to the remarks table entries.

APPENDIX B
MAINTENANCE ALLOCATION CHART (MAC)
Section 1: INTRODUCTION (Cont)

Explanation of Columns in the Tools and Test Equipment Requirements

Column (1) Tool or Test Equipment Reference Code. The tool or test equipment reference code correlates with a code used in column (5) of the MAC.

Column (2) Maintenance Level. The lowest level of maintenance authorized to use the tool or test equipment.

Column (3) Nomenclature. Name or identification of the tool or test equipment.

Column (4) National Stock Number (NSN). The NSN of the tool or test equipment.

Column (5) Tool Number. The manufacturer's part number, model number, or type number.

Explanation of Columns in the Remarks

Column (1) Remarks Code. The code recorded in column (6) of the MAC.

Column (2) Remarks. This column lists information pertinent to the maintenance function being performed as indicated in the MAC.

Section IV. REMARKS

REFERENCE CODE	REMARKS
A	Composite light, taillight, stoplight, and blackout light repair is limited to door, preformed packing, gasket, and lamp replacement.
B	Chassis wiring harness and intervehicular cable assembly repair is limited to terminal lug, insulator, shell, and hardware replacement.
C	Brakedrum repair is limited to refacing braking surface using a brakedrum lathe.
D	Refer to TM 9-2610-200-24 for tire and tube repair.
E	Frame, fenders, and body repair consists of welding, straightening, and reconditioning of damaged part or parts.

APPENDIX C

COMPONENTS OF END ITEM AND BASIC ISSUE ITEMS LISTS

Section I. INTRODUCTION

C-1. SCOPE.

This appendix lists Components of End Item and Basic Issue Items for the trailers to help you inventory items required for safe and efficient operation.

C-2. GENERAL.

The Components of End Item and Basic Issue Items Lists are divided into the following sections:

a. Section II. Components of End Item (COEI). This listing is for informational purposes only, and is not authority to requisition replacements. These items are part of the end item, but are removed and separately packaged for transportation or shipment. As part of the end item, these items must be with the end item whenever it is issued or transferred between property accounts. Illustrations are furnished to assist you in identifying the items.

b. Section III. Basic Issue Items (BII). These are the minimum essential items required to place the trailer in operation, to operate it, and to perform emergency repairs. Although shipped separately packaged, BII must be with the trailer during operation and whenever it is transferred between property accounts. The illustrations will assist you with hard-to-identify items. This manual is your authority to request/requisition replacement BII, based upon TOE/MTOE authorizations of the end item.

C-3. EXPLANATION OF COLUMNS.

The following provides an explanation of columns found in the tabular listing:

a. Column (1) - Illustration Number (Illus Number). This column indicates the number of the illustration in which the item is shown.

b. Column (2) - National Stock Number. Indicates the National Stock Number (NSN) assigned to the item and will be used for requisitioning purposes,

c. Column (3) - Description, Indicates the Federal Item Name and, if required, a description to identify and locate the item. The last line for each item indicates the Commercial and Government Entity (CAGE) Code in parentheses, followed by the part number. If item needed differs for different models of this equipment, the model is shown under the "Usable On Code" heading in this column. These codes are identified as:

<i>Code</i>	<i>Used On</i>
701	M448

d. Column (4) - Unit of Measure (U/M). Indicates the measure used in performing the actual operational/maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in., pr).

e. Column (5) - Quantity Required (Qty Rqr). Indicates the quantity of the item authorized to be used with/on the equipment.

Section II. COMPONENTS OF END ITEM

The trailers currently do not have any Components of End Item assigned.

Section III. BASIC ISSUE ITEMS

(1) Illus Number	(2) National Stock Number	(3) Description CAGE and Part Number	Usable on Code	(4) U/M	(5) Qty Rqr'd
1	2590-00-790-2297	Cable Assembly, Power, Electrical (19207) 10885376	701	ea	1
2	2590-00-491-6856	Jack, Leveling, Support (19207) 10885200	701	ea	2
3	2540-00-961-1307	Ladder, Vehicle Boarding (19207) 10885309	701	ea	1
4	6140-00-792-8294	Lead, Storage Battery (19207) 7335514	701	ea	1
5	2590-00-790-2293	Lever, Manual Control (19207) 7534675	701	ea	1
6	2510-00-790-2296	Rod Assembly, Trailer (19207) 8380403	701	ea	1

TA505374

APPENDIX D
ADDITIONAL AUTHORIZATION LIST

There currently is no Additional Authorization List assigned to the trailers.

APPENDIX E

EXPENDABLE/DURABLE SUPPLIES AND MATERIALS LIST

Section I. INTRODUCTION

E-1. SCOPE.

This appendix lists expendable/durable supplies and materials you will need to operate and maintain the trailers. This listing is for informational purposes only and is not authority to requisition the listed items. These items are authorized to you by CTA 50-970, Expendable/Durable Items (Except Medical, *Class V*, Repair Parts, and *Heraldic Items*), or CTA 8-100, *Army Medical Department Expendable/Durable Items*.

E-2. EXPLANATION OF COLUMNS.

a. Column (1)- Item Number. This number is assigned to the entry in the listing and is referenced in the "Initial Setup" of maintenance paragraphs or narrative instructions to identify the material needed (e.g., Dry cleaning solvent, Item 6, Appendix E).

b. Column (2)- Level. This column identifies the lowest level of maintenance that requires the listed item.

C - Operator/Crew
O - Unit Maintenance
F - Direct Support Maintenance
H - General Support Maintenance

c. Column (3) - National Stock Number. This is the National Stock Number assigned to the item; use it to request or requisition the item.

d. Column (4) - Description. Indicates the Federal item Name and , if required, a description to identify the item. The last line for each item indicates the Commercial and Government Entity (CAGE) in parentheses followed by the part number, if applicable.

e. Column (5) - Unit of Measure (U/M). indicates the measure used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e. g., ea, in., pr). If the unit of measure differs from the unit of issue, requisition the lowest unit of issue that will satisfy your requirements.

APPENDIX F REPAIR PARTS AND SPECIAL TOOLS LISTS

Section I. INTRODUCTION

F-1. SCOPE.

This RPSTL lists and authorizes spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE); and other special support equipment required for performance of organizational, direct support, and general support maintenance of the Chassis, Cargo, Water Tank, and Shop Van Trailers. It authorizes the requisitioning, issue, and disposition of spares, repair parts and special tools as indicated by the source, maintenance and recoverability (SMR) codes.

F-2. GENERAL.

In addition to Section 1, Introduction, this Repair Parts and Special Tools List is divided into the following sections:

a. **Section II. Repair Parts List.** A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed in item name sequence. Repair parts kits are listed separately in their own functional group within Section II. Repair parts for reparable special tools are also listed in this section. Items listed are shown on the associated illustration (s)/figure(s).

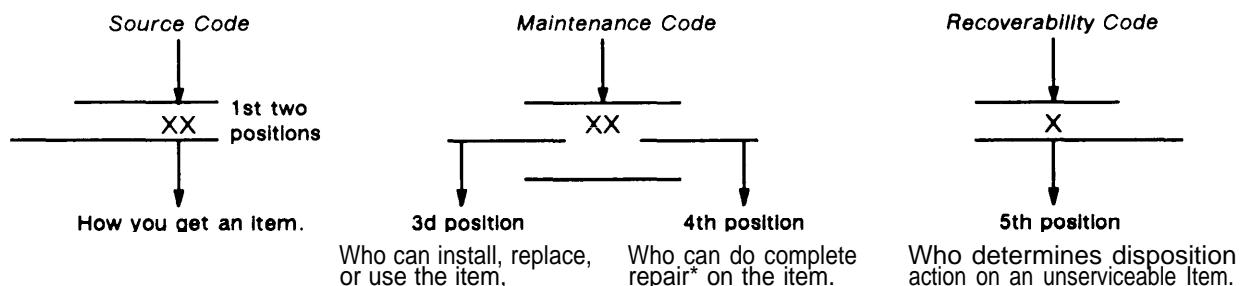

b. **Section III. Special Tools List.** A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL [as indicated by Basis of Issue (BOI) information in the *DESCRIPTION AND USABLE ON CODE* column] for the performance of maintenance.

c. **Section IV. National Stock Number and Part Number Index.** A list, in National Item Identification Number (NIIN) sequence, of all National stock numbered items appearing in the listing, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration/figure and item number appearance. The figure and item number index lists figure and item numbers in alphanumeric sequence and cross-references NSN, CAGE, and part numbers.

F-3. EXPLANATION OF COLUMNS (SECTIONS II AND III).

a. **ITEM NO. [Column (1)].** Indicates the number used to identify items called out in the illustration.

b. **SMR CODE [Column (2)].** The Source, Maintenance, and Recoverability (SMR) code is a 5-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instruction, as shown in the following breakout:

* **Complete Repair:** Maintenance capacity, capability, and authority to perform all corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

F-3. EXPLANATION OF COLUMNS (SECTIONS II AND III) (Con't).

(1) Source Code, The source code tells you how to get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follow:

<u>Code</u>	<u>Application/Explanation</u>
PA PB PC** PD PE PF PG	Stocked items; use the applicable NSN to request/requisition items with these source codes. They are authorized to the category indicated by the code entered in the 3d position of the SMR code. <p style="text-align: center;">** /terms coded PC are subject to deterioration.</p> <p>.....</p>
KD KF KB	Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance category indicated in the 3d position of the SMR code. The complete kit must be requisitioned and applied. <p>.....</p>
MO - <i>Made at ORG/ AVUM Level</i> MF - <i>Made at DS/AVUM Level</i> MH - <i>Made at GS Level</i> MD - <i>Made at Depot</i>	Items with these codes are not to be requested/requisitioned individually. They must be made from bulk materiel which is identified by the part number in the <i>DESCR/PT/ON AND USABLE ON CODE (UOC)</i> column and listed in the bulk materiel group of the repair parts list in this RPSTL. If the item is authorized to you by the 3d position code of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance. <p>.....</p>
AO - <i>Assembled by ORG/AVUM Level</i> AF - <i>Assembled by DS/ AVUM Level</i> AH - <i>Assembled by GS Level</i> AD - <i>Assembled at De- pot</i>	Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicted by the source code. If the 3d position code of the SMR code authorizes you to replace the item, but the source code indicates that the item is assembled at a higher level, order the item from the higher level of maintenance. <p>.....</p>

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA."

XA - DO NOT requisition an "XA"-coded item. Order its next higher assembly.

XB - If an "XB" item is not available from salvage, order it using the CAGE and part number given,

F-3. EXPLANATION OF COLUMNS (SECTIONS II AND III) (Con't).

- XC - Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.
- XD - Item is not stocked. Order an "XD"-coded item through normal supply channels using the CAGE and part number given, if no NSN is available.

(2) Maintenance Code. Maintenance codes tell you the level (s) of maintenance authorized to use and repair support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

- (a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following levels of maintenance.

<u>Code</u>	<u>Application/Explanation</u>
C	- Crew or operator maintenance done within unit maintenance or aviation unit maintenance.
O	- Unit maintenance or aviation unit can remove, replace, and use the item.
F	- Direct support or aviation intermediate level can remove, replace, and use the item.
H	- General support level can remove, replace, and use the item.
L	- Specialized repair activity can remove, replace, and use the item.
D	- Depot level can remove, replace, and use the item.

NOTE

Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.

- (b) The maintenance code entered in the fourth position tells whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i. e., perform all authorized "Repair" functions). This position will contain one of the following maintenance codes:

<u>Code</u>	<u>Application /Explanation</u>
o	Unit maintenance or aviation unit is the lowest level that can do complete repair of the item.
F	Direct support or aviation intermediate is the lowest level than can do complete repair of the item.
H	General support is the lowest level that can do complete repair of the item.
L	Specialized repair activity is the lowest level that can do complete repair of the item.
D	Depot is the lowest level that can do complete repair of the item.
Z	Nonreparable. No repair is authorized.
B	No repair is authorized. (No parts or special tools are authorized for the maintenance of a "B" -coded item.) However, the item may be reconditioned by adjusting, lubricating, etc., at the user level.

F-3. EXPLANATION OF COLUMNS (SECTIONS II AND III) (Con't).

(3) **Recoverability Code.** Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR code as follows:

<u>Code</u>	<u>Application/Explanation</u>
z	Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in the 3d position of the SMR code.
o	Reparable item. When uneconomically reparable, condemn and dispose of the item at unit maintenance or aviation unit level.
F	Reparable item. When uneconomically reparable, condemn and dispose of the item at the direct support or aviation intermediate level.
H	Reparable item. When uneconomically reparable, condemn and dispose of the item at the general support level.
D	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item not authorized below depot level.
L	Reparable item, Condemnation and disposal of item not authorized below specialized repair activity (SRA).
A	Item requires special handling or condemnation procedures because of specific reasons (e. g., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. **CAGEC [Column (3)].** The Commercial and Government Entity (CAGE) Code (C) is a 5-digit alphanumeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

NOTE

When you use an NSN to requisition an item, the item you receive may have a different part number from the part ordered.

d. **PART NUMBER [Column (4)].** Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

e. **DESCRIPTION AND USABLE ON CODE (UOC) [Column (5)].** This column includes the following information:

- (1) The Federal item name and, when required, a minimum description to identify the item.
- (2) Physical security classification. Not Applicable.
- (3) Items that are included in kits and sets are listed below the name of the kit or set on Figure KIT.
- (4) Spare/repair parts that make up an assembled item are listed immediately following the assembled item line entry.

(5) Part numbers for bulk materials are referenced in this column in the line item entry for the item to be manufactured/fabricated.

(6) When the item is not used with all serial numbers of the same model, the effective serial numbers are shown on the last line(s) of the description (before UOC). (See paragraph 5, *Special information*)

F-3. EXPLANATION OF COLUMNS (SECTIONS II AND III) (Con't).

(7) The usable on code, when applicable, (See paragraph F-5, Special Information)

(8) In the Special Tools List section, the Basis of Issue (BOI) appears **as the last line(s) in the entry** for each special tool, special TMDE, and other special support equipment. When density of equipments supported exceeds density spread indicated in the Basis of Issue, the total authorization is increased proportionately.

(9) The statement "END OF FIGURE" appears just below the last item description in Column 5 for a given figure in both Section II and Section III.

f. QTY [Column (6)]. The QTY (quantity per figure) column indicates the quantity of the item used in the breakout shown on the Illustration/figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that the quantity is variable and the quantity may vary from application to application.

F-4. EXPLANATION OF COLUMNS (SECTION IV).

a. National Stock Number (NSN) Index.

(1) **STOCK NUMBER Column.** This column lists the NSN by National Item Identification Number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN (i.e., NSN
530501 674 1467). When using this column to locate an item, ignore the first 4 digits of the NSN. However,

the complete NSN should be used when ordering items by stock number.

(2) **FIG. Column.** This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section II and Section III.

(3) **ITEM Column.** The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. **Part Number Index.** Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

(1) **CAGEC Column.** The Commercial and Government Entity (CAGE) Code (C) is a 5-digit alphanumeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

(2) **PART NUMBER Column.** Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards and inspection requirements to identify an item or range of items.

(3) **STOCK NUMBER Column.** This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and CAGE columns to the left.

(4) **FIG. Column.** This column lists the number of the figure where the item is identified/located in Section II and Section III.

(5) **ITEM Column.** The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

F-5. SPECIAL INFORMATION.

a. **Usable On Code.** The usable on code appears in the lower left corner of the Description column heading. Usable on codes are shown as “UOC:” in the Description column (justified left) on the first line applicable item description/nomenclature. Uncoded items are applicable to all models. Identification of the usable on codes used in this RPSTL are:

<u>Code</u>	<u>Used On</u>	<u>Code</u>	<u>Used On</u>
698	M1105A2C	711	M103A3
701	M448	713	M105A2
702	M103A1	714	M107A2
704	M105A1	715	M107A2C
706	M107A1		

b. **Fabrication Instructions.** Bulk materials required to manufacture items are listed in the Bulk Materiel Functional Group of RPSTL. Part numbers for bulk materials are also referenced in the DESCRIPTION column of the line item” entry for the item to be manufactured/fabricated. Detailed fabrication instructions for items source coded to be manufactured or fabricated are found in *Appendix G* of this manual.

c. **Assembly Instructions.** Detailed assembly instructions for items source coded to be assembled from component spare/repair parts are found in *Chapters 4* and *5*. Items that make up the assembly are listed immediately following the assembly item entry or reference is made to an applicable figure.

d. **Kits.** Line item entries for repair parts kits appear in group 9401 in Section II. Not Applicable.

e. **index Numbers.** Items which have the word BULK in the FIG. column will have an index number shown in the item column, This index number is a cross-reference between the National Stock Number/Part Number Index and the bulk materiel list in Section II.

F-6. HOW TO LOCATE REPAIR PARTS.

a. **When National Stock Number or Part Number is Not Known:**

(1) **First.** Using the Table of Contents, determine the assembly group or subassembly group to which the item belongs, This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

(2) **Second.** Find the figure covering the assembly group or subassembly group to which the item belongs.

(3) **Third.** Identify the item on the figure and use the Figure and Item Number Index to find the NSN.

b. **When National Stock Number or Part Number is Known:**

(1) **First.** Using the National Stock Number or Part Number Index, find the pertinent National Stock Number or Part Number. The NSN Index is in National Item Identification Number (NIIN) sequence [see paragraph F-4a(1)], The part numbers in the Part Number Index are listed in ascending alphanumeric sequence (see paragraph F-4.b), Both indexes cross-reference you to the illustration/figure and item number of the item you are looking for.

(2) **Second.** Turn to the figure and item number, verify that the item is the one you’re looking for, then locate the item number in the repair parts list for the figure.

F-7. ABBREVIATIONS.

For standard abbreviations see MIL-STD-12D, *Military Standard Abbreviations for Use on Drawings, Specifications, Standards, and in Technical Documents.*

APPENDIX G

ILLUSTRATED LIST OF MANUFACTURED ITEMS

Section 1. INTRODUCTION

G-1 . SCOPE.

a. This appendix includes complete instructions for making items authorized to be manufactured or fabricated.

b. A part number index in alphanumeric order is provided for cross-referencing the part number of the item to be manufactured to the figure which covers fabrication criteria.

c. All bulk materials needed for manufacture of an item are listed by National Stock Number (NSN), part number, or specification number in the manufacturing instructions.

Table G-1. Manufactured Items Part Number Cross-reference Index.

Part Number	Figure Number
CCC-C-419	G-1
MIL-T-3520	G-4
MI 3486- 1-7	G-5
246115	G-2
8380420	G-3

Section II. MANUFACTURING INSTRUCTIONS

NOTES:

1. Make from NSN 8305-00-170-5812, Part Number CCC-C-419 stock.
2. Cut ends of material square.

Figure G-1 . Duck Cloth.

NOTES:

1. Make from NSN 4720-01-014-4915, Part Number 246115 stock,
2. Cut ends of hose square.

Figure G-2. Nonmetallic Hose.

TA505375

Section II. MANUFACTURING INSTRUCTIONS (Con't)

NOTES:

1. Make from NSN 9320-00-451-8080, Part Number 8380420 stock.
2. Cut ends of strip square.
3. Hole spacing is as required.

Figure G-3. Rubber Strip.

NOTES:

1. Make from NSN 4710-00-541-6887, Part Number MIL-T-3520 stock.
2. Cut ends of tube square.
3. Remove burrs from inside of tube.

Figure G-4. Tube.

Section II. MANUFACTURING INSTRUCTIONS (Con't)

NOTE: Make from NSN 6145-00-705-6678, Part Number MI 3486- 1-7 stock.

Figure G-5. Electrical Wire.

APPENDIX H TORQUE LIMITS

H-1 . SCOPE.

This appendix lists standard torque values, as shown in Table H-1, and provides general information for applying torque. Special torque values and tightening sequences are indicated in the maintenance procedures for applicable components.

H-2. GENERAL.

a. Always use the torque values listed in Table H-1 when the maintenance procedure does not give a specific torque value.

b. Unless otherwise specified, standard torque tolerance shall be +10%.

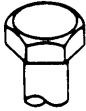

c. Torque values are based on clean, dry threads. Reduce torque by 10% when engine oil is used as a lubricant. Reduce torque by 20% if new plated capscrews are used.

d. Capscrews threaded into aluminum may require reductions in torque of 30% or more of Grade 5 capscrew torque. Capscrew threaded into aluminum must also attain two capscrew diameters of thread engagement.

CAUTION

If replacement capscrews are of a higher grade than originally supplied, use torque specifications for the original. This will prevent equipment damage due to overtorquing.

Table H-1. Torque Limits.

Current Usage	Much Used	Much Used	Used at Times	Used at Times
Quality of Material	Indeterminate	Minimum Commercial	Medium Commercial	Best Commercial
SAE Grade Number	1 or 2	5	6 or 7	8
Capscrew Head Markings				
Manufacturer's marks may vary				
These are all SAE Grade 5 (3 line)				
Capscrew Body Size Inches - Thread	Torque lb.-ft. (N•m)	Torque lb.-ft. (N•m)	Torque lb.-ft. (N•m)	Torque lb.-ft. (N•m)
$\frac{1}{4}$ 20	5 (7)	8 (11)	10 (14)	12 (16)

Testing 110-volt electrical system	4-70	4-141
Tire and tube maintenance	4-50	4-85
Tire repair	5-3	5-6
Torque limits	Appendix H	H-1
Towing instructions	2-11	2-17
Towing vehicle:		
Coupling trailer to	2-10	2-15
Uncoupling trailer from	2-12	2-17
Troubleshooting:		
Operator/crew	Table 3-1	3-8
Unit	Table 4-2	4-7
Symptom index:		
Operator/crew	3-5	3-8
Unit	4-14	4-7
Tube maintenance	4-50	4-85

INDEX

<i>Subject</i>	<i>Paragraph</i>	<i>Page</i>
U		
Uncoupling trailer from towing vehicle	2-12	2-17
Unit:		
Preventive maintenance checks and services (PMCS)	Table 4-1	4-4
Troubleshooting	Table 4-2	4-7
Troubleshooting symptom index	4-14	4-7
Upper seal and molding, side door (M448)	4-66	4-130
V		
Vacuum:		
Chamber (M105A2C)	4-40	4-63
Lines, hoses, and fittings (M105A2C)	4-42	4-68
Quick coupling (M105A2C)	4-41	4-66
Valve:		
Discharge (M107 series)	4-60	4-104
Emergency relay	4-47	4-75
Manifold (M107 series)	4-60	4-104
Ventilator, front (M448)	4-68	4-133
Vent (M107 series)	4-61	4-109
W		
Water tank trailer (M107 series):		
Body maintenance	5-7	5-13
Cleaning and refinishing interior	5-7	5-13
Frame assembly maintenance	5-8	5-18
Manhole cover	5-9	5-20
Operation of	2-14	2-18
Vent	4-61	4-109
Wheel:		
Bearing maintenance and adjustment:		
M103A1, M105A1, and M107A1	4-48	4-76
M103A3, M105A2, M105A2C, M107A2, and M107A2C	4-49	4-81
Cylinder (all except M105A2C)	4-36	4-55
Replacement	3-8	3-11
Tire and tube maintenance	4-50	4-85

INDEX

<i>Subject</i>	<i>Paragraph</i>	<i>Page</i>
Wiring harness:		
Chassis	4-24	4-24
Repair	4-25	4-26
Work safety	4-16	4-12

By Order of the Secretary of the Army:

Official:

CARL E. VUONO
General, United States Army
Chief of Staff

THOMAS F. SIKORA
Brigadier General, United States Army
The Adjutant General

By Order of the Secretary of the Air Force:

LARRY D. WELCH
General, United States Air Force
Chief of Staff

ALFRED G. HANSEN
General, United States Air Force
Commander, Air Force Logistics Command

Distribution:

To be distributed in accordance with DA Form 12-39-E, (Block No. 0572), Operator and Unit maintenance requirements for TM 9-2320-213-14&P.

RECOMMENDED CHANGES TO PUBLICATIONS AND BLANK FORMS						Use Part II (<i>reverse</i>) for Repair Parts and Special Tool Lists (RPSTL) and Supply Catalogs/Supply Manuals (SC/SM).	DATE Date you filled out this form.
For use of this form, see AR 25-30; the proponent agency is ODISC4.							
TO: (<i>Forward to proponent of publication or form</i>) (<i>Include ZIP Code</i>) AMSTALC-LPIT / TECH PUBS, TACOM-RI 1 Rock Island Arsenal Rock Island, IL 61299-7630						FROM: (<i>Activity and location</i>) (<i>Include ZIP Code</i>) Your mailing address	
PART I – ALL PUBLICATIONS (EXCEPT RPSTL AND SC/SM) AND BLANK FORMS							
PUBLICATION/FORM NUMBER TM 9-2330-213-14&P				DATE 9 Oct 1990		TITLE Chassis, Trailer: 1 1/2-Ton, 2- Wheel, M103A1	
ITEM NO.	PAGE NO.	PARA-GRAPH	LINE NO. *	FIGURE NO.	TABLE NO.	RECOMMENDED CHANGES AND REASON (Provide exact wording of recommended changes, if possible).	
	0004 00-2	4-7				Wrong POC is listed.

THE METRIC SYSTEM AND EQUIVALENTS

LINEAR MEASURE

1 Centimeter=10 Millimeters=0.01 Meters =0. 3937 Inches
 1 Meter =100 Centimeters=1000 Millimeters=39.37 Inches
 1 Kilometer=1000 Meters =0.621 Miles

WEIGHTS

1 Gram=0.001 Kilograms=1000 Milligrams=0.035 ounces
 1 Kilogram=1000 Grams= 2.2 Lb
 1 Metric Ton=1000 Kilograms=1 Megagram=1.1 Short Tons

LIQUID MEASURE

1 Milliliter=0.001 Liters=0.0338 Fluid Ounces
 1 Liter=1000 Milliliters=33.82 Fluid Ounces

SQUARE MEASURE

1 Sq Centimeter= 100 Sq Millimeters=0.155 Sq Inches
 1 Sq Meter =10,000 Sq Centimeters=10.76 Sq Feet
 1 Sq Kilometer=1,000,000 Sq Meters =0.0386 Sq Miles

CUBIC MEASURE

1 Cu Centimeter =1000 Cu Millimeters=0.06 Cu Inches
 1 Cu Meter=1,000,000 Cu Centimeters=35.31 Cu Feet

TEMPERATURE

$5/9 (^{\circ}\text{F} - 32) = ^{\circ}\text{C}$
 212 $^{\circ}$ Fahrenheit is equivalent to 100 $^{\circ}$ Celsius
 90 $^{\circ}$ Fahrenheit is equivalent to 32.2 $^{\circ}$ Celsius
 32 $^{\circ}$ Fahrenheit is equivalent to 0 $^{\circ}$ Celsius
 $9/5 \text{ C} + 32 = \text{F}$
